SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

The importance of technology in our modern world means that the technology industry is a true force to be reckoned with. The sheer size of the industry makes it one of the dominant sectors in the global economy, and the rapid growth and rate of change within the industry make it a central player in developing business standards and regulations. The impact of technology goes far beyond the core tech industry, though. While there are myriad opportunities directly related to digital product development or service delivery, there are countless more opportunities opening up around the world as technology influences every business and every industry vertical.

To start, consider economic output. According to the Bureau of Economic Analysis (BEA) within the U.S. Department of Commerce, overall GDP grew by 18% between Q1 of 2020 and Q1 of 2022. In contrast, the sub-industry that most closely represents the core tech industry (Data processing, internet publishing and other information services) grew by 47%. This growth rate trailed only two sub-industries related to oil and petroleum; many other sub-industries grew at much slower rates or experienced contraction during this time.

Internal Risk Factors

1. One of the Objects of the issue is for installation of EV charging station in which promoter has no experience

The Company is going to utilize ₹ 1,445.41 lakhs out of the net proceeds for installation of EV charging Station in which promoter has no experience. Our company intends to venture in to the new and emerging field of installation and operation of EV Charging Station. Our company vide letter dated April 19, 2022 issued by New & Renewable Energy Development Corporation of Andhra Pradesh Limited (NREDCAP), a State Government – ISO 9001:2015 has been provisionally empanelled for development of charging infrastructure for the year 2022-23. However, our promoter has no prior experience in the field of installation, operation and maintenance of the EV charging Station. If the Company is not able to implement successfully the EV charging station project, this may adversely affect our business, results of operations and financial condition of our company. For further details, please refer chapter “Objects of the Issue” on page 77 of this Draft Red Herring Prospectus

2. We may be unable to procure confirmed order from New & Renewable Energy Development Corporation of Andhra Pradesh Limited (NREDCAP) for the purpose for which funds are being raised from this Issue.

The partnership firm was converted into Private Limited company under part I (Chapter XXI) of the Companies Act, 2013 in the name and style of Sahana System Private Limited vide Certificate of Incorporation dated February 20, 2020, issued by the Registrar of Companies, Central Registration Centre, Ministry of Corporate Affairs. Upon conversion of partnership firm into company all the assets and liabilities of the partnership firm became the assets and liabilities of the Company. However, the TMB has not given effect of the said conversion of the partnership firm’s loan into Company’s name in its account and the cash credit limit sanctioned by the bank remained in the name of the partnership firm till date. Since the loan is not transferred in the company’s name, charge is not filed by our company with registrar of companies. Any such qualifications, material uncertainties, remarks or matters of emphasis in the auditors’ report on our financial statements in the future may also adversely affect the trading price of the Equity Shares.

6. We do not own the premises in which our registered office is located and the same is on leave and license arrangement. Any termination of such lease / license and / or non-renewal thereof could adversely affect our operations.

The Company will appoint the Chartered Accountant holding Peer Review Certificate as Statutory Auditor in the Annual General Meeting of the Company.

8. *We are a company with limited operating history, and therefore investors may not be able to assess our prospects on the basis of historical results.*

Our company was originally formed as a partnership firm in the name and style of “M/s. Oceans Technologies” through partnership deed dated March 1, 2013. The partnership firm was converted into Private Limited company under part I (Chapter XXI) of the Companies Act, 2013 in the name and style of Sahana System Private Limited vide Certificate of Incorporation dated February 20, 2020, issued by the Registrar of Companies, Central Registration Centre, Ministry of Corporate Affairs. As we do not have significant operating and financial history, it may be difficult to evaluate our current or future prospects on the basis of historical results and performance. Our past performance should not be construed as an indication of our future performance. For details regarding business and financial Information, please refer chapter titled “*Our Business*” and “*Restated Financial Statements*” on page 101 and 146 respectively of this Draft Red Herring Prospectus.

9. *Our business requires us to obtain and renew certain registrations, licenses, approvals, NOCs and permits in the ordinary course of our business. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.*

We are required to obtain and maintain a number of statutory and regulatory licences, registrations, permits and approvals, generally for carrying out our business. In addition, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek new approvals, licenses, registrations and permits from time to time, as and when required in the ordinary course of our business. Obtaining licences, registrations, permits and approvals or their renewals are time consuming processes and are subject to frequent delays. We have obtained licenses, registrations, permits and approvals from the relevant authorities and are renewing such statutory approvals periodically for our business.

Further, pursuant to conversion after complying with the relevant and the applicable provisions and procedures of Companies Act, 2013, the name of our company was changed. Many of the Licenses and approvals are in the old name, the same are required to be updated / changed with various government / semi government authorities and various organizations. We are in the process of taking necessary steps for transferring the approvals in the new name of our Company. There can be no assurance that the relevant authorities will renew or issue any of such permits or approvals in the time-frame anticipated by us or at all. Any failure to apply for and obtain the required approvals, licenses, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licenses, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and future prospects of the Company. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to the same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations.

Compliance with many of the regulations applicable to our operations may involve incurring significant costs and otherwise may impose restrictions on our operations. We cannot assure you that we will not be subject to any adverse regulatory action in the future. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and the business of our Company could be adversely affected. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of the terms and conditions stipulated under any of our licenses or permits, one or several of our licenses and certificates may be suspended or cancelled and we shall not be able to carry on the activities permitted thereunder.

For more information about the licenses required in our business, please refer chapter “*Government and other statutory approvals*” beginning on page 188 of this Draft Red Herring Prospectus.

10. We have not received No Objection Certificate (“NOC”) from the lender of erstwhile partnership firm M/s. Oceans Technologies.

As on the date of filing of this Draft Red Herring Prospectus, we have not received NoC from Tamilnad Mercantile Bank Limited, lender of erstwhile partnership firm M/s. Oceans Technologies. Our company was originally formed as a partnership firm in the name and style of M/s. Oceans Technologies. The partnership firm was then converted into Private Limited and subsequently in the Public Limited company. However, the TMB has not given effect of the said conversion of the partnership firm’s loan into Company’s name in its account and the cash credit limit sanctioned by the bank remained in the name of the partnership firm till date. We cannot assure you that our lender will grant us the NOC in the name of Sahana System Limited for this Issue. Our lender may take objection to this public issue by putting certain conditions to secure their outstanding dues or may ask to repay the outstanding dues subsequent to / during the Public Issue and may enter into litigation with the Company which may affect financial cash flows and financial performance of our Company.

11. Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.

Although, we generally do not enter into long-term contracts with our customers, our business is dependent on developing and maintaining a continuing relationship with our key clients and customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these clients and customers or that we will be able to replace these clients in case we lose any of them.

12. Failure to compete effectively against our competitors and new entrants in the industry in which we currently operate and the industry in which we intend to operate may adversely affect our business, financial condition and results of operations.

We are currently engaged in offering IT related services and trading of hardware instruments. We also intend to enter into Electric Vehicle industry by installing EV charging station at various locations in the state of Andhra Pradesh. We face competition in both the industry in which we currently operate and the industry in which we intend to operate. Our competitors may have substantially greater financial, management, research and marketing resources than we have as a result of which they may be able to utilise their resources and economies of scale to develop improved products, divert sales away from us by winning broader contracts or hire our employees by offering more lucrative compensation packages. Our competitors may be able to provide our customers, with different or greater capabilities or benefits than we can provide in areas such as technology, technical qualifications, post contract performance, price and availability of key professional personnel. Our failure to compete effectively with respect to any of these or other factors could have a material adverse effect on our business, prospects, financial condition or operating results. In such a scenario, we may find difficulties in maintaining our position in the market. To remain competitive, we must consistently provide innovative

products and services with superior performance and capability to our customers, advanced technology solutions and service at an affordable cost. Our inability to successfully do so could have a material adverse effect on our business, prospects, financial condition and / or operating results.

13. Our Company requires Shops & Establishments Licenses for the registered office in the ordinary course of our business(es) and the failure to obtain them in a timely manner may adversely affect its operations.

We require registration under Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019 for our registered office. The Company has not done application under the Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019. As per management confirmation, the Company is facing some technical issue on the government portal and hence the Company is not able to apply for the said certificate. For details, please refer to the section titled “Government and Other Key Approvals” on page 188 of the Draft Red Herring Prospectus. Furthermore, government approvals and licenses are subject to various conditions. If we fail to comply, or a regulator claim that our Company has not complied with these conditions, our business, financial position, and operations would be materially adversely affected.

14. One of our Promoter Group Member, Nilamben Kakadiya is a wilful Defaulter

Nilamben Ramjibhai Kakadiya is a sister of our promoter Pratik Kakadia and hence falls under our promoter group. She had raised loan from Oriental Bank of Commerce (Oriental Bank of Commerce subsequently merged into Punjab National Bank) in August 2014 for her family business purpose amounting to ₹ 80.00 lakhs. Subsequently, she was not able to service the loan on time as their business was facing financial difficulties. Due to this, a suit has been filed by Punjab National Bank for ₹ 32.53 lakhs. Currently, she is working to settle the outstanding loan of PNB. As she is part of promoter group this matter may affect our Promoter or Our Company.

15. If we fail to innovate in response to changing customer needs and adopt and develop new technologies, or adapt to evolving industry standards, our business, financial condition, and results of operations could be adversely affected.

We are engaged in an industry characterized by rapid technological innovation, evolving industry standards, frequent new service introductions and changing customer demands. If we are unable to keep pace with rapidly evolving customer requirements, or if new technologies emerge that are able to deliver competitive products at lower prices, more efficiently, more conveniently, or more securely than our business, financial condition, and results of operations could be adversely affected.

16. Our product and services expose us to numerous risks, including sometimes conflicting legal and regulatory requirements, and violation of these regulations could adversely our business and results of operations.

We have our customer network spread across geographies. As we continue to expand internationally, we are subject to compliance of numerous laws and regulations in other countries. Non-compliance with these regulations in the conduct of our business could result in termination of client contracts, fines, penalties, criminal actions against us or our officers, disgorgement of profits, prohibitions on doing business and may have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and / or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Many countries also seek to regulate the actions that companies take outside of their respective jurisdictions, subjecting us to multiple and sometimes competing legal frameworks in addition to our home country rules. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals. In addition, changes in regulations

could increase our costs and could potentially prevent us from delivering our product and services and solutions in a cost-efficient manner.

17. In past, there have been instances of delay in filing of certain forms under companies act with registrar of companies.

In the past, there have been certain instances of delays in filing statutory forms such as MGT-14, AOC-4 and DIR-12, as per the reporting requirements under the Companies Act, which have been subsequently filed by payment of an additional fee as specified by RoC. No show-cause notice in respect to the above has been received by our Company till date and except as stated in this Draft Red Herring Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position of our company

18. The Company is dependent on few numbers of customers for its sales. Loss of any of these large customers will significantly affect our revenues and profitability.

Our top ten customers contribute to 90.74%, 91.46%, 74.33%, and 68.07% of our revenue from operations for the period ended November 30, 2022, Financial Year 2022, Financial Year 2021, and Financial Year 2020 respectively. The loss of a significant client would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our financial condition and profitability.

19. Data networks are vulnerable to attacks, unauthorised access and disruptions. Losses or liabilities that are incurred as a result of any of the foregoing could materially adversely affect our business, financial condition and results of operations.

Data networks are also vulnerable to attacks, unauthorised access and disruptions. For example, in a number of public networks, hackers have bypassed firewalls and misappropriated confidential information, including personally identifiable information. It is possible that, despite existing safeguards, an employee could misappropriate our customers' proprietary information or data, exposing us to a risk of loss or litigation and possible liability. Our computer networks may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by third parties or employees. Although we have not experienced such attacks in the past, we cannot assure you that our security systems in place can prevent any such attacks in the future or that we will be able to handle such attacks effectively. A hacker who circumvents security measures could misappropriate proprietary information, including personally identifiable information, or cause interruptions or malfunctions in our operations. Further, computer attacks or disruptions may jeopardise the security of information stored in and transmitted through our computer systems. Actual or perceived concerns that our systems may be vulnerable to such attacks or disruptions may deter our customers from using our solutions or services. As a result, we may be required to expend significant resources to protect against the threat of these security breaches or to alleviate problems caused by these breaches

20. The length of our sales cycle may fluctuate significantly and depends on several external factors which may result in significant fluctuations in our revenues

A customer's decision to purchase our services or products often involves a comprehensive implementation process across the customer's network(s) which includes customer education, evaluation by a number of employees in our customers' organization and, often, a significant strategic

or operational decision by our customers. Our sales efforts involve educating our customers about the use and benefits of our products and solutions, including any potential cost savings achievable by organization that partner with us.

Customers typically undertake a significantly long evaluation process which also involves evaluation of our competitors' services and can result in a lengthy sales cycle. Moreover, a purchase decision by a potential customer typically requires extended evaluation, testing and the approval of senior decision makers, including the boards of directors of our customers. We spend substantial time, effort and money on our sales efforts without any assurance that our efforts will produce any sales. Additionally, implementing our products and any related services may entail a significant commitment of resources by prospective customers, accompanied by the risks and delays frequently associated with significant technology implementation projects. Such delays and fluctuations could cause our revenues and results of operation to fluctuate significantly across time periods, and we may not be able to adjust our costs quickly enough to offset such lower revenues, potentially adversely impacting our business, operating results and financial condition

21.Failure to offer client support in a timely and effective manner may adversely affect our relationships with our clients.

From time to time, our clients require our support teams to assist them in using our product and services effectively, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our clients effectively in a timely manner or at all, it could adversely affect our ability to retain existing clients and could prevent prospective clients from adopting our product and services. We may be unable to respond quickly enough to accommodate short-term increases in demand for client support. We also may be unable to modify the nature, scope and delivery of our client support to compete with changes in the support services provided by our competitors. Increased demand for client support, without corresponding revenue, could increase costs and adversely affect our reputation, business, results of operations and financial condition. Any failure to maintain high-quality client support, or a market perception that we do not maintain high-quality client support, could adversely affect our reputation, business, results of operations and financial condition

22.We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service. We may also be liable in the event of misuse of our services.

We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Majority of our contracts or service agreements involve projects that are critical to the operations of our clients' businesses. Any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers' businesses.

If we have any errors, defects, disruptions in service or other performance problems with our services, our customers could elect not to renew our contract, or delay or withhold payments to us and we could lose future sales. Further, our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. We may in the future, experience, misuse of our services. The occurrence of any such events in the future could lead to user dissatisfaction and discourage the use of our products and services. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation

23.If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions

24. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

In today's dynamic business environment which is filled with rapid change of technology, government policies, mounting competitive threats and constant new entrants into market, makes it challenging to sustain and handle the intricacies and provide competitive solutions to its clients. We face competition from domestic and international companies. We foresee this competition from organized and unorganized players to continue to grow as the demand for software development solutions increases. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

25. Our success depends heavily upon our Promoter and Senior Management for their continuing services, strategic guidance and financial support.

Our success depends heavily upon the continuing services of our promoter Pratik Kakadia who has control on our company. His experience and vision had played a key role in obtaining our current reputation and status in the market. We would also depend significantly on our senior managerial person for continuing our business operations successfully. If any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

26. We utilize the services of certain consultants for some of our operations. Any deficiency or interruption in their services could adversely affect our business operations and reputation.

We engage third party consultants from time-to-time for some of our services and development of our products and software. Our ability to control the manner in which services are provided by third party consultants is limited and we may be liable legally or suffer reputational damage on account of any deficiency of services on part of such consultants. We cannot assure you that we will be successful in continuing to receive uninterrupted and quality services from our third-party consultants. Any disruption or inefficiency in the services provided by our third-party consultants could interrupt our business operations and damage our reputation.

27. Product development is a long, expensive and uncertain process and our current expenditure in product development may not provide a sufficient or timely return.

The development of our products is a costly, complex and time-consuming process, and the investment in their development often involves a long wait until a return is achieved on such an investment. We have made, and will continue to make, significant investments in product development and related product opportunities. Investments in new technology and processes are inherently speculative. Commercial success depends on many factors, including the degree of innovation of the software products and services developed and effective distribution and marketing. Such expenditure may adversely affect our operating results if they are not offset by corresponding and timely revenue increases. We must continue to dedicate a significant number of resources to our research and development efforts in order to maintain our competitive position. However, significant revenues from new software product and service investments may not be achieved for a number of years, or at all. Moreover, new software products and services may not be profitable, and even if they are profitable,

operating margins for new software products and services may not be in line with the margins we have experienced for our existing or historical software products and services.

Moreover, we may determine that certain products or services do not have sufficient potential to warrant the continued allocation of resources and accordingly, we may elect to terminate the development of such products. If we terminate a product in development in which we have invested significant resources, our prospects may suffer, as we will have expended resources on a project that will not provide any return on our investment and also may have missed the opportunity to have allocated those resources to potentially more productive uses. In turn, this may adversely impact our business, operating results and financial condition.

28. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, agents and / or technicians may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

29. Our insurance coverage may not adequately protect us against potential risk, and this may have a material adverse effect on our business.

We maintain insurance coverage for key risks relating to our business. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

30. We have had negative cash flows from operating activities in the past and may, in the future, experience similar negative cash flows

We have experienced negative cash flows from operating activities for the period ended November 30, 2022 and for the financial years ended 2022, 2021 and 2020, and may, in the future, experience negative cash flows. The following table sets forth certain information relating to our cash flows for the periods indicated below:

Particulars	(₹ in lakhs)			
	For the period ended November 30, 2022	For the year ended March 31, 2022	For the year ended March 31, 2021	For the year ended March 31, 2020
Net Cash Flow from Operating Activities	(0.23)	29.91	(8.32)	(459.26)

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

31. We have not yet placed orders in relation to the capital expenditure to be incurred for the purchase of equipment / machinery. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machinery or other materials in a timely manner, or at all, may result in time and cost overruns and our business, prospects and results of operations may be adversely affected.

We intend to utilize portions of the Net Proceeds for funding capital expenditure requirements towards purchase of equipment / machinery. While we have procured quotations from vendors in relation to the capital expenditure to be incurred, we have not placed any firm orders for any of them. For details in respect of the foregoing, see “*Objects of the Issue*” on page 77 of this Draft Red Herring Prospectus. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Further, the actual amount and timing of our future capital requirements may differ from our estimates as a result of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure the requisite materials from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternate vendors to provide us with the materials which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

32. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control.

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions and have not been appraised by any bank or financial institution or another independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be change subject to the approval of shareholders by passing special resolution pursuant to section 27 of Companies Act, 2013 through postal ballot or subject to an authority given by the Company in general meeting by way of special resolution and based on various factors which are beyond our control. For further details, please see the section titled “*Objects of the Issue*” beginning on page 77 of this Draft Red Herring Prospectus.

33. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

34. Sometimes we do business with our customers on purchase order basis and do not have long term contracts with most of them.

Part of our business is conducted on purchase order basis, depending on the requirements of the client preferences and demand. We do not have long term contracts with most of our customers / clients and

there can be no assurance that we will continue to receive repeat orders from all or any of them, including our longstanding customers. Further, even if we were to continue receiving orders from our existing clients, there can be no assurance that they will be on the same terms and conditions, and the new terms may be less favourable to us than those under the present terms.

35. We develop certain software assessing and anticipating the requirement and usefulness of our software.

One of our business activities is to develop software either on the basis of the order received from the customers and or to develop the software on our own on the basis of our assessment and usefulness in the market. The software developed by us may not be acceptable by the market and at the cost /price fixed by us. We may have to put extra man hours to customize the already developed products for the clients resulting in to extra cost. Under the circumstances, our capital will be blocked, our business, financial condition, results of operations will be adversely affected.

36. Our Logo  is not Registered with the Trade Mark registration authority, we may be unable to protect the Logo from being infringed by others which may adversely affect our business value, financial condition and results of operations.

As on the date of this Draft Red Herring Prospectus, we have not yet obtained registration from the Trademark Registration Authority for our logo  and hence we do not enjoy the statutory protection accorded to a registered trademark. Additionally, we have not made any application for the registration of our logo. We may remain vulnerable to infringement or passing-off by third parties, however, we will not be able to enforce any rights against them resulting to change our logo, which may adversely affect our reputation & business and could require us to incur additional costs. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

37. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects

In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We cannot assure you

that the existing security measures shall be adequate, or we will be able to comply with all such obligations and that we will not incur liability nor have a claim for substantial damages against us.

39. We face risks associated with currency exchange rate fluctuation.

We export our services and hence changes in value of currencies with respect to the Indian Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our company's results of operations.

40. Increases in wages for IT professionals could reduce our cash flows and profit margins.

Historically, wage costs in the Indian IT services industry have been significantly lower than wage costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, wage increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, wage increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in wages, including an increase in the cash component of our compensation expenses, may reduce our cash flow resulting in affecting our business operations

41. Our Company has unsecured loans with a total outstanding amount of ₹ 122.88 lakhs as of November 30, 2022, that may be recalled by the lenders at any time.

Our Company has currently availed certain unsecured loans. The total outstanding amount of the unsecured loan as of November 30, 2022, was ₹ 122.88 lakhs. These loans may be recalled by the lenders at any time. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. If we are unable to procure such financing, we may not have adequate working capital to maintain the desired inventory level. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details of these unsecured loans, please refer to Chapter titled "Restated Financial Statements" beginning on page 146 of this Draft Red Herring Prospectus

42. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. 45. Sale of shares by our promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

The sale of shares by the promoter or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoter. However, the closing of trading windows during the period of financial results may restrict the promoter from selling the shares in the open market.

46. The issue price of the Equity Shares may not be indicative of market price of our equity shares after the issue and the market price of our Equity shares may decline below the issue price.

The issue price of our Equity shares is decided on the basis of both qualitative and quantitative factors. The Company has made progress in establishing its name in the IT Sector. All such point has been considered in deciding the issue price of the Equity Shares. Please refer chapter titled “Basis for Issue Price” beginning on the page 87 of this Draft Red Herring Prospectus. 49. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations

50. Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this issue, our Promoter and Promoter Group will collectively own [●] % of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing, or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

51. We have not independently verified certain data in this Draft Red Herring Prospectus.

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

52. Any future issuance of Equity Shares may dilute the shareholding of the Investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoter or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “*Capital Structure*” beginning on page 65 of this Draft Red Herring Prospectus. 53. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a book

building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

54. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

External Risk Factors

55. Financial instability in other countries, particularly countries with emerging markets, could disrupt Indian markets and our business and cause the trading price of the Equity Shares to decrease.

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and in the Indian economy. Any worldwide financial instability could also have a negative effect on the Indian economy. Accordingly, any significant financial disruption could have an adverse effect on our business, financial condition, and results of operations.

56. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition, and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business is subject to a significant number of state tax regimes and changes in legislations governing them, implementing them or the regulator enforcing them in any one of those jurisdictions could adversely affect our results of operations. The applicable categories of taxes and tax rates also vary significantly from state to state, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government or State Governments that affect our industry include GST, income tax and other taxes, duties or surcharges introduced from time to time and any adverse changes in any of the taxes levied by the Government or State Governments could adversely affect our competitive position and profitability. Such changes, including the instances mentioned below, may adversely affect our business, results of operations,

financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

57. Civil unrest, acts of violence including terrorism or war involving India or other countries could materially and adversely affect the financial markets and our business.

Any major hostilities involving India or other countries or other acts of violence, including civil unrest including acts of terrorism or similar events that are beyond our control, could have a material adverse effect on the Indian and/or global economies and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally. Such events could also potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition, and cash flows, and more generally, any of these events could lower confidence in India's economy.

India has witnessed civil disturbance in recent years, and it is possible that future civil unrest as well as other social, economic and political events in India could have a negative impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

58. Political instability and significant changes in Government policy could adversely affect economic conditions in India generally and our business in particular.

Changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments in and affecting India may have an adverse effect on our results of operations.

India has a mixed economy with a large public sector and an extensively regulated private sector. The role of the Government and that of the state governments in the Indian economy and their effect on producers, consumers, service providers and regulators has remained significant over the years. Both state and central governments have, in the past, among other things, imposed controls on the prices of a broad range of goods and services, restricted the ability of businesses to expand existing capacity and reduce the number of their employees and determined the allocation to businesses of raw materials and foreign exchange. Since 1991, successive Governments have pursued policies of economic liberalization, including significantly relaxing restrictions in the private sector. Nevertheless, the role of the Government and state governments in the Indian economy as producers, consumers and regulators has remained significant. There can be no assurance that the Government's past liberalization policies or political stability will continue in the future. Elimination or substantial change of such policies or the introduction of policies that negatively affect the security service industry could have an adverse effect on our business. Any significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and our business in particular.

59. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the Equity Listing Agreements with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our

disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

60. Any downgrading of India's debt rating by an international rating agency could adversely affect our business

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

61. The trading volume and market price of the Equity Shares may be volatile following the Issue.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties/ governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

62. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, upto an amount of ₹ 1 lakh, if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on

a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

63. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions specified by the RBI, then the prior approval of RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further details, please refer to section titled “*Restrictions on Foreign Ownership of Indian Securities*” beginning on page 255 of this Draft Red Herring Prospectus.

64. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

65. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/ Issue Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

GLOBAL ECONOMIC OVERVIEW

The global economy is experiencing a number of turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Normalization of monetary and fiscal policies that delivered unprecedented support during the pandemic is cooling demand as policymakers aim to lower inflation back to target. But a growing share of economies are in a growth slowdown or outright contraction. The global economy’s future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China.

Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic and reflects significant slowdowns for the largest economies: a US GDP contraction in the first half of 2022, a euro area contraction in the second half of 2022, and prolonged COVID-19 outbreaks and lockdowns in China with a growing property sector crisis. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation is forecast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024. Upside inflation surprises have been most widespread among advanced economies, with greater variability in emerging market and developing economies.

Inflation and Uncertainty

The world is in a volatile period: economic, geopolitical, and ecological changes all impact the global outlook. Inflation has soared to multidecade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia’s ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption. Although the pandemic’s impact has moderated in most countries, its lingering waves continue to disrupt economic activity, especially in China. And intense heat waves and droughts across Europe and central and south Asia have provided a taste of a more inhospitable future blighted by global climate change.

Global Growth: Near-Term Slowdown

A slowdown in global growth is forecast, from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023 (Table 1.1). The global slowdown in 2022 is as projected in the July 2022 WEO Update, while the forecast for 2023 is lower than projected by 0.2 percentage point (Table 1.1). This prognosis for the

global economy is far below average: global economic growth averaged 3.6 percent during 2000–21 (and the same during 1970–2021). For most economies, the outlook is significantly weaker than projected six months ago, in the April 2022 WEO. Forecasts are weaker than expected for 143 economies (accounting for 92 percent of world GDP) for 2023. The forecast for 2023 is the weakest since the 2.5 percent growth rate seen during the global slowdown of 2001—with the exception of those during the global financial and COVID-19 crises.

INDIAN ECONOMY

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

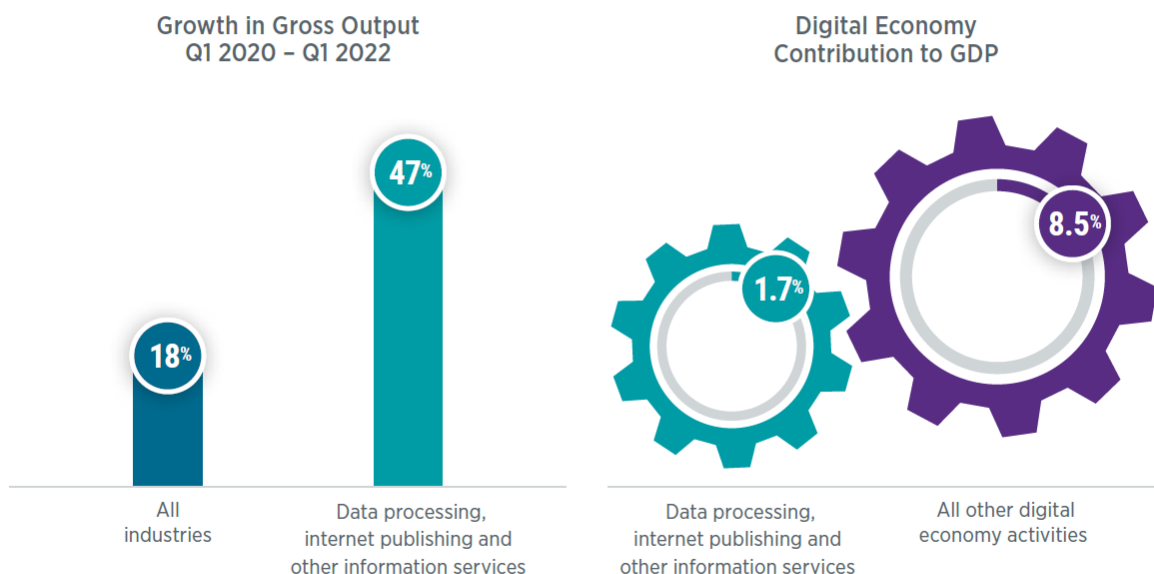

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Global IT Industry:

The importance of technology in our modern world means that the technology industry is a true force to be reckoned with. The sheer size of the industry makes it one of the dominant sectors in the global

economy, and the rapid growth and rate of change within the industry make it a central player in developing business standards and regulations. The impact of technology goes far beyond the core tech industry, though. While there are myriad opportunities directly related to digital product development or service delivery, there are countless more opportunities opening up around the world as technology influences every business and every industry vertical.

Economic Impact Of Technology

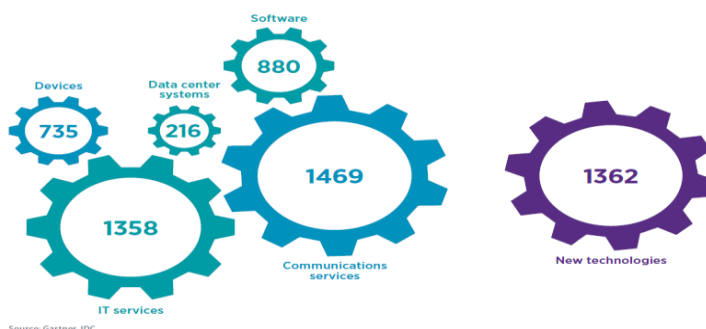

Source: U.S. Department of Commerce Bureau of Economic Analysis

To start, consider economic output. According to the Bureau of Economic Analysis (BEA) within the U.S. Department of Commerce, overall GDP grew by 18% between Q1 of 2020 and Q1 of 2022. In contrast, the sub-industry that most closely represents the core tech industry (Data processing, internet publishing and other information services) grew by 47%. This growth rate trailed only two sub-industries related to oil and petroleum; many other sub-industries grew at much slower rates or experienced contraction during this time.

Although that growth alone is noteworthy, it pales in comparison to the extended impact of digital activity. As of Q1 2022, the same sub-industry contributed to 1.7% of overall U.S. GDP. Looking across industries at three broad categories of digital economic activity (infrastructure, e-commerce and priced digital services), the BEA estimates that the overall digital economy contributed to 10.2% of U.S. GDP in 2020. Roughly speaking, the extended digital activities taking place outside the core IT industry have five times more impact than direct tech industry activity. The exact numbers differ from country to country, especially in maturing economies vs. mature economies, but the basic premise holds: Technology has a massive direct and indirect impact on economic growth.

Indian IT Industry

The IT & BPM sector has become one of the most significant growth catalysts for the Indian economy, contributing significantly to the country's GDP and public welfare. The IT industry accounted for 7.4% of India's GDP in FY22, and it is expected to contribute 10% to India's GDP by 2025.

As innovative digital applications permeate sector after sector, India is now prepared for the next phase of growth in its IT revolution. India is viewed by the rest of the world as having one of the largest Internet user bases and the cheapest Internet rates, with 76 crore citizens now having access to the internet.

The current emphasis is on the production of significant economic value and citizen empowerment, thanks to a solid foundation of digital infrastructure and enhanced digital access provided by the Digital India Programme. India is one of the countries with the quickest pace of digital adoption. This was accomplished through a mix of government action, commercial innovation and investment, and new digital applications that are already improving and permeating a variety of activities and different forms of work, thus having a positive impact on the daily lives of citizens.

India's rankings improved six places to the 40th position in the 2022 edition of the Global Innovation Index (GII).

According to National Association of Software and Service Companies (Nasscom), the Indian IT industry's revenue touched US \$ 227 billion in FY22, a 15.5% YoY growth.

According to Gartner estimates, IT spending in India is expected to increase to US \$ 101.8 billion in 2022 from an estimated US \$ 81.89 billion in 2021.

Indian software product industry is expected to reach US \$ 100 billion by 2025. Indian companies are focusing to invest internationally to expand their global footprint and enhance their global delivery centres.

The data annotation market in India stood at US \$ 250 million in FY20, of which the US market contributed 60% to the overall value. The market is expected to reach US \$ 7 billion by 2030 due to accelerated domestic demand for AI.

Exports from the Indian IT industry stood at US \$ 149 billion in FY21. Export of IT services has been the major contributor, accounting for more than 51% of total IT export (including hardware). BPM and Engineering and R&D (ER&D) and software products export accounted for 20.78% each to total IT exports during FY21. ER&D market is expected to grow to US \$ 42 billion by 2022.

The IT industry added 4.45 lakh new employees in FY22, bringing the total employment in the sector to 50 lakh employees.

India is the topmost offshoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India.

The Indian IT & business services industry is expected to grow to US \$ 19.93 billion by 2025. Spending on information technology in India is expected to reach US \$ 144 billion in 2023. The cloud market in India is expected to grow three-fold to US \$ 7.1 billion by 2022 with the help of growing adoption of big data, analytics, artificial intelligence, and the Internet of Things (IoT).

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, lauded the Indian IT sector for excelling its competitive strength with zero government interference. He further added that service exports from India has the potential to reach US \$ 1 trillion by 2030.

INDIA'S ARTIFICIAL INTELLIGENCE REVOLUTION

Technological advancements have revolutionized the industry and businesses in the past few years, thus influencing the production process and supply chain. Industry 4.0 has integrated new technologies, for instance, cloud computing, AI, analytics, and machine learning, into operations and production processes, unveiling a new generation of smart techniques. Digital technologies used in manufacturing processes facilitate self-optimization and automation, leading to operational proficiency across the entire value chain. Artificial intelligence in India is no longer a marginal technology, as enterprises and manufacturers will gain considerably from the superior deployment of machine learning technologies and AI. Companies in India are increasingly adopting AI to drive business outcomes. However, there is substantial hype around what constitutes AI.

The history of artificial intelligence in India is rich. The artificial intelligence market size has grown significantly over the past few decades. AI systems have gained eminence over the past few years due to their potential to unveil economic value and help mitigate social challenges. The adoption and development of AI surged considerably in recent years. According to a report published by the National Institute for Transforming India (NITI) Aayog in 2018, AI has the potential to add approximately US \$

957 billion or 15% of the current gross value to the country's economy in 2035. The robust value proposition of technology is also one factor that rapidly increases the need for AI in India. AI can enhance outcomes in key sectors such as education, agriculture, and healthcare. Furthermore, AI will play a crucial role in delivering specialized services, for instance, precision agriculture advisory or remote diagnostics, and increases the entrance to government welfare services.

Impact of Russia's invasion of Ukraine on the Indian IT sector

For a global economy still reeling from the epidemic, Russia's invasion of Ukraine poses a significant threat.

The battle appears to be Europe's most serious since World War II. In the immediate aftermath of the Russia-Ukraine conflict, both the area and the world are affected. Many people will experience grief and loss in the coming weeks due to this catastrophe when sorrow and loss have become trademarks of COVID-19.

Within a few days of Russia's invasion of the Ukrainian territory, countries worldwide have placed sanctions on Russia while extending their humanitarian support to the people of Ukraine. There is widespread global uncertainty about the future of business, even as peace negotiations continue. As an emerging player in the global IT industry, the Ukraine war is likely to have significant consequences, including the trickle-down effect on Indian IT firms that have delivery centers in and around Ukraine.

Ukraine is one of the main sites for offshore and near-shore third-party services, particularly engineering and information technology expertise. Thus, Russia's invasion of Ukraine wreaks havoc on American and European businesses.

India's IT services firms, which don't have a significant presence in Ukraine, have decided to adopt a wait-and-watch approach to the crisis and have activated business continuity plans in Eastern European countries such as Hungary, Poland, and Romania. An estimated 50,000 tech workers and 200,000-odd tech freelancers in Ukraine could be affected by the crisis, according to research firm ISG.

THE IMPACT OF THE WAR ON INDIAN IT BUSINESS

Data from the top Indian IT companies shows that Europe is the second-most important client geography, with 20-25% of the overall business. Approximately 90% of this business comes from Western Europe – however, the Eastern part has been growing as an essential strategic delivery center for Indian IT firms, mainly for proximity to European client offices to serve them more effectively. While no decisions are being taken yet, Indian IT service providers are considering moving their service/delivery locations from Eastern Europe to India. This will affect the service delivery flow and impact the local Ukrainian economy.

Many Indian engineering firms had started acquiring Eastern European firms in the banking, utilities, and energy sectors to enhance their delivery capabilities. With ongoing conflicts, many of these firms deal with supply constraints that could significantly affect operations and even cause the deals to fall through. Even if existing contracts are not affected, new ones could go on hold as businesses in Europe reconsider their strategies and finances. This has significant consequences for Indian IT firms seeking to expand the software start-up ecosystem.

From an employment perspective, too, the situation is concerning. European IT service providers are likely to pause or reduce their hiring for the foreseeable future, which could leave many talented Indian candidates either out of a job or competing fiercely for India/US-based jobs. At the same time, many of the global IT projects that were earlier outsourced to Ukraine and other East European countries (which are rapidly gaining a reputation as a hub of tech talent) are likely to be relocated to India, increasing the demand.

“There is going to be a lot of work moving to India, so there will be a short-term increase in the need for local talent.” Recently quoted by a leading research firm.

IT services industry growth to accelerate in FY22, profit margins to moderate:

IT services companies are expected to see growth in revenue, driven by robust demand for digital technologies resulting in higher awards of contracts, according to ratings agency ICRA. Further, the growth in the financial year 2021-22 will be supported by the pent-up demand of the financial year 2020-21 that was lower due to the initial impact of COVID-19.

“Enterprises have shifted to virtual models that have pushed the acceleration of digital outsourcing deals. Further, risks related to H-1B visa issuances have slightly abated with the election of the new US administration. Several proposed changes with respect to visa eligibility, wage levels, and selection procedures have been put on hold for further review or deferred or vacated by the court,” he added.

ICRA noted that the improvement in OPM (operating profit margin) witnessed in the financial year 2020-21 is unlikely to sustain going forward owing to wage inflation, pricing pressure on legacy services, and gradual resumption of normal office working, and travel compared to work-from-home options seen during the financial year 2020-21.

India is the topmost offshoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India.

The Indian IT & business services industry is expected to grow to US\$ 19.93 billion by 2025. Spending on information technology in India is expected to reach US\$ 144 billion in 2023. As per a survey by Amazon Web Services (2021), India is expected to have nine times more digitally skilled workers by 2025.

In November 2021, Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, lauded the Indian IT sector for excelling its competitive strength with zero government interference. Electric Vehicle (EV) Charging Business

EVs are cheaper to run and maintain, safer to drive, and better for the environment, ticking all boxes when it comes to preferences of modern car buyers. EVs continue to prove themselves as viable alternatives to petrol and diesel cars. Hence, EV charging stations are becoming more and more available as greater EV adoption is taking place. The requirement & demand of EV penetration is increasing day by day in India and world. The charging infrastructure availability also played a significant role in EV adoption rates

Indian Government in its push for green environment has been advocating to move from fossil fuel to green fuel. To make this possible, Government of India has a vision to have maximum electrical vehicles by the year 2030. This vision has opened up lots of opportunities in EV charging stations market and as per industry experts India would need around 50,000 charging stations by the year 2030.

The government of Andhra Pradesh in a push towards Green Energy Environment, wants to install EV charging stations all across the state so that the end user of electric vehicles will have ease of use. In this direction the government of Andhra Pradesh wants to develop at least 4,000 locations over a period of time to install EV charging stations for the use of General Public. The nodal agency for setting up EV charging stations all across Andhra Pradesh is New and Renewable Energy Development Corporation of Andhra Pradesh Limited (NREDCAP).

Our company vide letter dated April 19, 2022, received from NREDCAP, a State Government – ISO 9001:2015 has been provisionally empanelled for development of charging infrastructure for the year 2022 – 23. Pursuant to this letter, we have to conduct a feasibility study for various locations identified by NREDCAP. Upon successfully completion of feasibility study, our company will inform NREDCAP of our intention to set the EV charging station at a location of our choice. Subsequently, a tripartite agreement will be signed between our company, NREDCAP and land owner and thereafter process of setting EV charging station will commence. However, as on the date of this Draft Red Herring Prospectus, we have signed one tripartite agreement with NREDCAP.

Our company, as a provisionally empanelled member, has been allocated 500 locations in the state of Andhra Pradesh. We are already in the process of organizing surveys of the locations to ascertain the economic viability of the projects. At present, feasibility survey has been completed for 45 locations and the process of procuring the charging stations for 25 locations has also begun. Our company has already finalized the vendors for supply of charging stations after detailed technical and financial study of 25 locations

As per the guidelines of NREDCAP, a tri partite agreement will be signed between our company, NREDCAP and the land owner. This tri partite agreement will be signed once the locations are finalized. As on the date of this Draft Red Herring Prospectus, we have not signed any tri partite agreement

Below are some of the important clauses of the model tri partite agreement:

1. Land owner shall provide access to land area of approximately 500 square feet to the Charge Point Developer (CPD) for operating charging stations subject to revenue sharing as per the conditions outlined as per the agreement;
2. The tri partite agreement shall remain in full force and effect for a period of 120 months from the effective date of signing of the EV charging agreement
3. CPD shall also pay ₹ 0.50 per kWh (inclusive of applicable taxes) of power consumed as service charges to NREDCAP and ₹ 2.55 per kWh (inclusive of applicable taxes) towards rentals charges to land owner for charging units
4. The revenue generated from co-branding and advertisement will be deposited in NREDCAP designated bank account and will be shared between CPD and NREDCAP in equal ratio i.e. 50% each

As a part of our business strategy, we intend to enter into growing EV charging business. However, as on the date of this Draft Red Herring Prospectus, we have not signed any tri partite agreement and also neither our company nor our promoter has any prior experience of installation of EV charging station. For further details, please refer chapter titled “*Risk Factors*” and “*Objects of the issue*” on page 29 and 77 of this Draft Red Herring Prospectus

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 (“FDI Policy 2020”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy from time to time and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular. The RBI issues Master Directions on Foreign Investment in India and updates the same from time to time. Presently, FDI in India is being governed by Master Directions on Foreign Investment No. RBI/FED/2017-18/60 FED Master Direction No. 11/2017-18 dated January 4, 2018, as updated from time to time by RBI.
