Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

- *Some events may have material impact qualitatively & quantitatively;*
- *Some events may not be material individually but may be found material collectively; and*
- *Some events may not be material at present but may be having material impact in future.*

Internal Risk Factors

1. We rely on third parties for manufacturing products of our Company.

We are a pharmaceutical company, engaged in the business of marketing of healthcare products in domestic market through own distribution network. We get our approved formulations manufacture through various contract manufacturers. We rely on certain third parties for manufacturing our products. At present, for contract manufacturing, we are associated with 19 pharmaceutical companies / entities who manufactures our products as per our order. Moreover, as per terms of agreement such companies are having lead time of average 45 to 60 days to complete our manufacturing order, from the date of receipt of our purchase order. Our company has to schedule manufacturing plan, as we cannot enforce such manufacturing companies to manufacture as per our schedule.

Any decline in the quality of medicines manufactured or delay in delivery of products by such parties or rise in job work charges may adversely affect our operations. Further there can be no assurance that such parties shall continuously provide their services or would not cater to demand of competitors. Any withdrawal of services from such manufacturers or supply of services to competitors at better rates may adversely affect our result of operations and future prospects. Further we are also exposed indirectly to the risks these manufacturers face. For further details, please see “*Our Business*” on page 103 of this prospectus.

2. In past, we have undertaken and may continue to undertake strategic investments, acquisitions and mergers in the future, which may be difficult to integrate and manage. Our future success depends on our ability to achieve and manage growth, whether through internal growth or strategic acquisitions

In past, we have pursued and may continue to pursue acquisitions, mergers and strategic investments in businesses that operate in the distribution of pharmaceutical products industry and whose resources, capabilities and strategies are complementary to and likely to enhance our business operations. For example, we have recently acquired proprietorship firm of our promoter Panilam Lakhatariya M/s DLS Exports pursuant to business transfer agreement dated December 15, 2022, and acquired 99% ownership of partnership firms M/s Ahmedabad Medical Corporation and M/s Supal Distributors LLP from the promoters of our company Panilam Lakhatariya and Supal Lakhatariya on January 10, 2023. For further details, please see “*Our Business*” and “*History and Certain Corporate Matters*” on page 103 and 125 of this prospectus. There can be no assurance that we will be able to achieve the strategic purpose of these acquisitions and generate the expected benefits. It is possible that we may not be able to identify suitable investment opportunities in future, or if we do identify suitable opportunities, we may not be able to complete those transactions on terms commercially acceptable to us or at all. The inability to identify suitable investments or the inability to complete such transactions may adversely affect our competitiveness or our growth prospects. Even if we find such suitable opportunities, we may not be able to effectively integrate these into our existing businesses, or we may incur higher than anticipated costs, or incur unknown liabilities that could have a material adverse effect on our financial condition and results of operations.

3. We are involved in high volume - low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.

Ours is a high-volume low margin business. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. We are in the business of distribution of pharmaceutical and healthcare products and due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of timely sales / order execution and continuous cost control of non-core activities.

For the period ended October 16, 2022 and March 31, 2023 and for the financial years ended March 31, 2022 and March 31, 2021, our revenue from operations were and ₹ 2,538.94 lakhs, ₹ 3308.70 lakhs, and ₹ 3,698.30 lakhs, ₹ 2,826.61 lakhs, respectively. Our profit before tax margin and profit after tax margin was lower than or around 2.87% and 2.11% for each period respectively.

The table below gives details of our revenue from operations vis-à-vis our profit margins based on restated financial information:

As part of our growth strategy, we aim to improve our functional efficiency and expand our business operations. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands.

For further details regarding the discussions and explanations for our past results, please see “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” on page 179 of this prospectus.

4. *Our top ten customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top ten customers for the period ended March 31, 2023, have contributed to 72.07% of our revenue from operations. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business, we obtain from them is reduced for any reason. Further, we also cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long-term relationships with our customers, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

5. *Our business largely depends on the performance of our distributors. Any non-performance by these distributors may adversely affect our business operations, profitability and cash flows.*

We mainly sell our products directly to distributors / stockiest / super stockiest who in turn take forward the supply chain. Our business hence largely depends on the performance of our distributors, who may be responsible for selling our products to end users at domestic. Currently, we have distributors/stockiest/super stockiest for our Domestic market. Further these distributors generally operate for a specific region. We can give no assurance that the performance of such distributors will meet our required specifications or performance parameters. Such distributors are independent third parties over which we do not have control. Additionally, we do not have any non-compete agreement with such distributors and in the event that such distributors enter into agreements with competitors, we may not be able to take any course of action.

Similarly, we are restricted from directly involving ourselves in marketing services in certain regions where these distributors are located. As a result, our growth, results of operations and the integrity of our brand name in these areas is dependent on the performance of these distributors. Moreover, there can be no assurance that our distributors will be able to generate adequate revenue consistently, and we may be exposed to credit risks associated with non-payment or untimely payments from our distributors.

6. *We typically do not enter into long-term agreements with our customers, and an inability to continue to engage with them would have a material adverse effect on our business, results of operations and financial condition.*

Though we have had repeat orders from customers and have developed long-term relationships with certain customers, we typically do not enter into long-term contracts with our customers. In the absence of long-term contracts, there can be no assurance that our existing customers will continue to purchase our products and any loss of our customers will have a material adverse effect on our business, results of operations and financial condition. Customers with whom we do not have long-term agreements may choose to cease sourcing our products. In the event a customer ceases to use us as its preferred supplier for their products, we cannot assure you that we will be successful in marketing those products to another customer. Further, in the event of any disputes with our customers including in relation to payments for the products supplied, in the absence of formal, long-term agreements, we may have limited recourse to seek contractual remedies against our customers. Our relationship with our customers are therefore dependent to a large extent on our ability to regularly meet customer requirements, including price competitiveness, efficient and timely product deliveries and consistent product quality. In the event we are unable to meet such requirements in the future, it may result in decrease in orders or cessation of business from affected customers.

7. *We are involved in certain legal proceedings, which, if determined adversely, may affect our business and financial condition.*

As on the date of filing this Prospectus, there are outstanding legal proceedings initiated by or against our Company, Promoters, Directors, and Group Companies that are incidental to our business and operation. A summary of outstanding litigation proceedings involving our Company, our promoters, our directors, and our group companies as on the date of this Prospectus is provided below:

We cannot assure you that we will be able to renew our leases on commercially acceptable terms or at all. We also cannot assure you that we will be permitted to use our leased property on a continuous basis. If we are required to vacate the aforementioned premises, we would be required to make new arrangements for our registered office and we cannot assure that the new arrangements will be on commercially acceptable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations and/or have to pay increased charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

9. Our Company has availed unsecured loans with a total outstanding amount of ₹ 1,584.45 lakhs as of March 31, 2023, that may be recalled by the lenders at any time.

Our Company has currently availed certain unsecured loans. The total outstanding amount of the unsecured loan as of March 31, 2023, was ₹ 1,584.45 lakhs. These loans may be recalled by the lenders at any time. In the event that the lender seeks a repayment of any such loan, our company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. If we are unable to procure such financing, we may not have adequate working capital to operate our business. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details of these unsecured loans, please refer to Chapter titled "Restated Financial Statements" beginning on page 151 of this Prospectus

10. We have entered into and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms.

We have entered into certain transactions with related parties may continue to do so in future. While our Company believes that all such transactions have been conducted on arms-length basis and is in compliance with the Companies Act, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our company will enter into related party transactions also in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “Annexure 23 – Related Party Transactions” under section titled “Financial Information” on page 151 of this Prospectus.

11. If we cannot respond adequately to the increased competition we expect to face, we will lose market share and our profits will decline, which will adversely affect our business, results of operations and financial condition.

Our products face competition from products commercialized or under development by competitors in all of our product portfolios. We compete with local companies, multi-national corporations and companies from the rest of world. If our competitors gain significant market share at our expense, our business, results of operations and financial condition could be adversely affected.

Many of our competitors may have greater financial, manufacturing, research and development, marketing and other resources, more experience in obtaining regulatory approvals, greater geographic reach, broader product ranges and stronger sales forces. Our competitors may succeed in developing products that are more effective, more popular or cheaper than any we may develop, which may render our products obsolete or uncompetitive and adversely affect our business and financial results. Also, we face pressure on our margins due to pricing competition from several small and unorganized local players. Presence of more players in the unorganized sector compared to organized ones has resulted in increasingly competitive environment characterized by stiff price competition.

We also operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

12. Our marketing & distribution activities are exposed to fluctuations in the prices of materials.

Our Company is dependent on third party contract manufacturers for procuring the pharmaceutical products. We are exposed to fluctuations in the prices of these products as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our manufacturers for all our products. We may be unable to control the factors affecting the price at which we procure the products. We also face the risks associated with compensating for or passing on such increase in our cost on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of our products may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from our manufacturers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays, which may result in the loss of our customers and revenues.

13. Our Promoters and Directors have interests in certain entities, which are in businesses similar to ours and this may result in potential conflict of interest with us.

There are, and may be, certain transactions between our company and our promoters or Promoter group entities, in the ordinary course of business and at arms’ length price. However, a potential conflict of interest may occur between our promoters, directors, Subsidiary entities and Promoter group entities as they may have interest in companies in the similar line of business as our company. For example, our Promoter group companies, Supal Distributors LLP, Supal Medical & Wholesale LLP, Ahmedabad Medical Corporation, Supal Pharma, R B agencies, Panilam Shivilal Lakhatariya HUF and Supal Trading L.L.C are engaged in similar business as ours. For further details, please see “Our Management” and “Our Promoter and Promoter Group” on pages, 132 and 144, respectively of this

prospectus. Our promoters and directors, their related entities and our Group Companies may compete with us and have no obligation to direct any opportunities to us. We cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

14. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.

Our company's net working capital consisted of ₹ 826.54 lakhs, ₹ 683.48 lakhs, ₹ 2,145.91 lakhs and ₹ 2,059.52 lakhs for the financial year ended 2021, 2022, for the period ended December 31, 2022 and financial year ended 2023, respectively. The net working capital requirement for the financial year 2024 is projected to be ₹ 3,150.35 lakhs. A significant portion of our working capital is utilized towards inventories, trade receivables and trade payables. Summary of our working capital position is given below:

We operate in a working capital-intensive industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 74 of this Prospectus.

15. The geographical concentration of our Company may restrict our operations and adversely affect our business, results of operations, and financial conditions.

We presently operate our entire business through our registered office and warehouses located at Ahmedabad, Gujarat. Our company faces potential vulnerabilities as it becomes highly dependent on the economic conditions, regulatory environment, and market dynamics specific to Ahmedabad. Adverse developments such as economic downturns, regulatory changes, or shifts in consumer preferences in Ahmedabad can significantly impact our company's business operations and financial performance. Geopolitical risks, such as political instability or natural disasters, also pose threats to our business. Further, we generate our sales through our customers situated in Ahmedabad. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations. For further details, please see "Our Business" on page 103 of the Prospectus.

16. Our Company's management will have flexibility in utilizing the net proceeds from the issue and the deployment of the net proceeds from the issue is not subject to any monitoring by any independent agency.

Our Company intends to primarily use the net proceeds towards working capital requirement and for general corporate purposes as mentioned in "Objects of the Issue" on page 74 of this Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the issue size is not in excess of ₹ 10,000 lakhs. The management of our company will have discretion to use the net proceeds from the issue, and investors will be relying on the judgment of our Company's management regarding the application of the net proceeds from the issue. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our promoters or controlling shareholders will be required to provide an exit opportunity to the shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the issue will need to rely upon our management's judgment with respect to the use of net proceeds. If we are unable to enter into arrangements for utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the issue and our business and financial results may suffer.

17. Our Promoter, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred, remuneration or other benefits received.

Our Promoter, Directors and Key Managerial Personnel may be deemed to be interested to the extent of the Equity Shares held by them and benefits deriving from their shareholding in our Company. Our Promoters are interested in the transactions entered into between our company and themselves as well as between our company and our group entities. For further details, please refer to the chapters titled "Our Business" and "Our Promoter and Promoter Group", beginning on page 103 and 144 respectively and the chapter titled "Annexure 23 - Related Party Transactions" under chapter titled "Restated Consolidated Financial Statements" beginning on page 151 of this Prospectus.

18. The availability of counterfeit drugs, such as drugs passed off by others as our products, could adversely affect our goodwill and results of operations.

Entities in India could pass off their own products as ours, including counterfeit or pirated products. For example, certain entities could imitate our brand name, packaging materials or attempt to create look-alike products. As a result, our market share could be reduced due to replacement of demand for our products and adversely affect our goodwill. The proliferation of counterfeit and pirated products, and the time and attention lost to defending claims and complaints about counterfeit products could have an adverse effect on our goodwill and our business, prospects, results of operations and financial condition could suffer.

19. Our insurance coverage may not adequately protect us against potential risk, and this may have a material adverse effect on our business.

We maintain insurance coverage for key risks relating to our business. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

20. We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of deficiency in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Any deficiency in the pharmaceutical products marketed and distributed by us, could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. We cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including any mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

21. Our success is dependent on our management team, key managerial personnel and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our key personnel may have an adverse effect on our business prospects.

Our management team, key managerial personnel and skilled manpower have significantly contributed to the growth of our business, and our future success is dependent on their continued services. An inability to retain any key personnel may have an adverse effect on our business operations. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects. For further details, please refer chapter titled “*Our Promoter and Promoter Group*” and “*Our Management*” beginning on page 144 & 132 of this Prospectus

22. Our business requires us to obtain and renew certain registrations, licenses, approvals, NoCs and permits in the ordinary course of our business. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results of operations.

We are required to obtain and maintain a number of statutory and regulatory licences, registrations, permits and approvals, generally for carrying out our business. In addition, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek new approvals, licenses, registrations and permits from time to time, as and when required in the ordinary course of our business. Obtaining licences, registrations, permits and approvals or their renewals are time consuming

processes and are subject to frequent delays. We have obtained licenses, registrations, permits and approvals from the relevant authorities and are renewing such statutory approvals periodically for our business.

Further, pursuant to our recent acquisitions and conversion after complying with the relevant and the applicable provisions and procedures of Companies Act, 2013, the name of our company was changed. Many of the Licenses and approvals are in the old name, the same are required to be updated / changed with various government / semi government authorities and various organizations. We are in the process of taking necessary steps for transferring the approvals in the new name of our Company. There can be no assurance that the relevant authorities will renew or issue any of such permits or approvals in the timeframe anticipated by us or at all. Any failure to apply for and obtain the required approvals, licenses, registrations or permits in a timely manner, or any suspension or revocation of any of the approvals, licenses, registrations and permits would result in a delay in our business operations which could otherwise adversely affect our financial condition, results of operations and future prospects of the Company. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition to the same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business and results of operations. For further details regarding the material approvals, licenses, registrations and permits, please see “*Government and other Key approvals*” on page 194 of this Prospectus

23. We have not independently verified certain data in this Prospectus

We have not independently verified data from the industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to India, its economy or the industry in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

24. Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this issue, our Promoters and Promoter Group will collectively own 81.03% of our equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over our Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing, or deterring a change in control of our Company.

25. Our Company does not own any trademarks including that of the logo “” used for representing the Company and its business. We use logo registered in the name of one of our promoters, Panilam Lakhatariya. Thus, we may be exposed to the risk that their trademark may be affected by events beyond our control and that our promoter may not prevent us from using it in the future.

Our company currently utilizes a logo registered under the name of one of our promoters, Panilam Lakhatariya. This usage has been authorized through an agreement dated April 06, 2023, which extends

to all entities within our promoter group. However, it is possible that the consent may be revoked at some point, and unforeseen events beyond our control could also negatively impact our promoter's trademark in the future. In the event of any damage to our brand that is not immediately and effectively addressed, our business, financial condition, and operational results could be adversely affected.

In case of revoke of approval or the same being registered and challenged by another party, we would be required to change our logo, which may prevent us from using it in the future and could require us to establish new branding and name recognition in the market, which could result in a material adverse effect on our reputation, business, financial condition and results of operations.

26. Our Company's trademarks are not registered as on date of this RHP. However, applications for registration our trademarks have been filed with the trademark authority. We may be unable to adequately protect our intellectual property and/ or be subject to claims alleging breach of third-party intellectual property rights

As on date of this Prospectus, we have 8 applications pending under the Trademarks Act, 1999 to register our brands in the name of our Company with the trademark authority and all are under formality check process and hence, we do not enjoy the statutory protections accorded to registered trademark. These applications are at different stages of approval. We cannot assure you that our applications for registration of our trademarks will be granted by the relevant authorities in a timely manner or at all. Our trademarks are significant to our business and operations. The use of our trademarks by third parties could adversely affect our reputation which could, in turn, adversely affect our business and results of operations. In the event our application is rejected by trademarks registry, our business, financial condition results of operation and cash flows would be adversely affected. Obtaining, protecting and defending intellectual property rights can be time consuming and expensive and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel.

27. If we inadvertently infringe on the patents of others, our business may be adversely affected.

We operate in an industry characterized by extensive patent litigation, including frivolous litigation by competitors to delay grant of patent. Patent litigation can result in significant damages being awarded and injunctions that could prevent the sale of certain products or require us to pay significant royalties in order to continue to sell such products. While it is not possible to predict the outcome of patent litigation, we believe any adverse result of such litigation could include an injunction preventing us from selling our products or payment of significant damages or royalty, which would affect our ability to sell current or future products or prohibit us from enforcing our rights against others. The occurrence of any of these risks could adversely affect our business, financial condition and results of operations.

28. We have certain amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire

As on March 31, 2023, our long-term borrowings were ₹ 1,532.46 lakhs & short-term borrowings were ₹ 2,460.24 lakhs and as per our business requirements, we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- limiting our ability to borrow additional amounts in the future;
- increasing our finance costs;
- increasing our vulnerability to general adverse economic, industry and competitive conditions; and
- affecting our capital adequacy requirements.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the

lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Indebtedness" on page 186 of this Prospectus.

29. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

30. We have not identified any alternate source of financing the 'Objects of the Issue'. If we fail to mobilize resources as per our plans, our growth plans may be affected.

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of Issue and schedule of implementation please refer to the chapter titled "Objects of the Issue" on page 74 of this Prospectus.

31. We have issued equity shares during the last one year at a price that may be below the issue Price. Furthermore, the average cost of acquisition of equity shares by our promoters could be lower than the issue price.

During the last one year we have issued equity shares at a price that may be lower than the issue price:

Date of Allotment	Number of Equity Shares	Face Value per Equity Share (₹)	Issue Price per Equity Share (₹)	Nature of allotment
Upon Incorporation (October 17, 2023)	1,00,000	10	10	Subscription to MOA pursuant conversion of Partnership Firm
January 27, 2023	43,13,650	10	10	Shares issued against the Partners Current Capital
January 30, 2023	50,81,699	10	12	Preferential issue (Conversion other than cash upon takeover of running business of M/s DLS Export (Proprietorship firm of Panilam Lakhatariya)
March 15, 2023	23,45,695	10	10	Rights Issue
Total	1,23,68,564			

Furthermore, our promoter's average cost of acquisition of equity shares in our company may be lower than the issue price as decided by the Company, in consultation with the book running lead manager. For further details, please refer to the chapters "Capital Structure" beginning on page 61 of this Prospectus

32. Our Promoters have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoters have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactorily to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of

capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

33. Our inability to manage inventory in an effective manner could adversely affect our business.

Our business model requires us to maintain a certain level of inventory of pharmaceutical products, to meet the present and future orders. If we underestimate the orders that we may receive, we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

34. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, contract manufacturers may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

35. There have been some instances of delayed filing in the past with the Registrar of Companies which may attract penalties:

There have been some instances of delayed filing in the past with the Registrar of Companies including Form MGT-14, Form PAS-3 and Form DIR-12 with additional fees which may attract penalties.

Although, no regulatory action or penalty has been taken/ levied on the Company for such delays/ defaults, however, it cannot be assured that no such regulatory action or penalty will be taken/ levied in the future. Further, we cannot assure you that such non-compliances will not occur in the future. Therefore, if the concerned authorities impose monetary penalties on us or take certain punitive actions against our Company or its directors / officers in relation to the same, our business and financial condition could be adversely affected.

36. Any future issuance of Equity Shares may dilute the shareholding of the investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire post-issue paid-up share capital, held by our Promoter or other shareholders will be locked-in as per SEBI ICDR Regulations from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchange. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “*Capital Structure*” beginning on page 61 of this Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

37. Our company is being promoted by a first-generation entrepreneur.

Our Promoters are a first-generation entrepreneur. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience. The limited

knowledge and experience of our first-generation entrepreneurs as promoters poses a risk to the management and growth of our company, and there is no assurance that this will not negatively impact the future success of our business. For further details, please refer chapter titled “*Our promoter and promoter group*” beginning on Page 144 of this Prospectus.

38. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the Equity Listing Agreements with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management’s attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

39. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

40. Reliance has been placed on declarations furnished by Directors for the details of their profiles included in this RHP:

Our directors have been unable to trace copies of certain documents pertaining to their Experiences. While we have taken the requisite steps to obtain the relevant supporting documentation, we may not be able to procure all the relevant supporting documentation. Accordingly, our Company and the BRLM have placed reliance on the declarations furnished by Directors, to disclose such details in this RHP and neither we, nor the BRLM have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to the experience in the future, at all. Therefore, we cannot assure you that all or any of the information relating to their experiences included in “*Our Management*” on the beginning page 132 is accurate.

41. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop. The Issue Price of the Equity Shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

42. The trading volume and market price of the Equity Shares may be volatile following the Issue.

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations.
- results of operations that vary from the expectations of securities analysts and investors.
- results of operations that vary from those of our competitors.
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors.
- a change in research analysts' recommendations.
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments.
- announcements by third parties / governmental entities of significant claims/ proceedings against us.
- new laws and governmental regulations applicable to our industry.
- additions or departures of key management personnel.
- changes in exchange rates.
- changes in the price of oil or gas.
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

43. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

External Risk Factors

44. Financial instability in other countries, particularly countries with emerging markets, could disrupt Indian markets and our business and cause the trading price of the Equity Shares to decrease.

The Indian financial markets and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and in the Indian economy. Any worldwide financial instability could also have a negative effect on the Indian economy. Accordingly, any significant financial disruption could have an adverse effect on our business, financial condition, and results of operations.

45. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition, and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business is subject to a significant number of state tax regimes and changes in legislations governing them, implementing them or the regulator enforcing them in any one of those jurisdictions could adversely affect our results of operations. The applicable categories of taxes and tax rates also vary significantly from state to state, which may be amended from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government or State Governments that affect our industry include GST, income tax and other taxes, duties or surcharges introduced from time to time and any adverse changes in any of the taxes levied by the Government or State Governments could adversely affect our competitive position and profitability. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

46. Civil unrest, acts of violence including terrorism or war involving India or other countries could materially and adversely affect the financial markets and our business.

Any major hostilities involving India or other countries or other acts of violence, including civil unrest including acts of terrorism or similar events that are beyond our control, could have a material adverse effect on the Indian and/or global economies and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally. Such events could also potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition, and cash flows, and more generally, any of these events could lower confidence in India's economy.

India has witnessed civil disturbance in recent years, and it is possible that future civil unrest as well as other social, economic and political events in India could have a negative impact on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

47. Political instability and significant changes in Government policy could adversely affect economic conditions in India generally and our business in particular.

Changes in exchange rates and controls, interest rates, Government policies, taxation, social and ethnic instability and other political and economic developments in and affecting India may have an adverse effect on our results of operations.

India has a mixed economy with a large public sector and an extensively regulated private sector. The role of the Government and that of the state governments in the Indian economy and their effect on producers, consumers, service providers and regulators has remained significant over the years. Both state and central governments have, in the past, among other things, imposed controls on the prices of a broad range of goods and services, restricted the ability of businesses to expand existing capacity and reduce the number of their employees and determined the allocation to businesses of raw materials and foreign exchange. Since 1991, successive Governments have pursued policies of economic liberalization, including significantly relaxing restrictions in the private sector. Nevertheless, the role of the Government and state governments in the Indian economy as producers, consumers and regulators has remained significant. There can be no assurance that the Government's past liberalization policies or political stability will continue in the future. Elimination or substantial change of such policies or the introduction of policies that negatively affect the security service industry could have an adverse effect on our business. Any significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and our business in particular.

48. Any downgrading of India's debt rating by an international rating agency could adversely affect our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

49. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, up to an amount of ₹ 1 lakh, if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

50. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions specified by the RBI, then the prior approval of RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For

further details, please refer to section titled “*Restrictions on Foreign Ownership of Indian Securities*” beginning on page 260 of this Prospectus.

51. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

52. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Bid/ Issue Closing Date, events affecting the Bidders’ decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

53. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

GLOBAL OUTLOOK

Global real GDP is forecasted to grow by 2.3 percent in 2023, down from 3.3 percent in 2022. Most of the weakness will be concentrated in Europe, Latin America, and the US. Asian economies are expected to drive most of global growth in 2023, as they benefit from ongoing reopening dynamics and less intense inflationary pressures compared to other regions.

Despite rapid monetary tightening, inflation is proving persistent in many key economies, particularly on the back of strength in job markets amid severe labor shortages. Therefore, monetary policy is likely to remain restrictive throughout most of 2023. This will act as a break on economic activity and will likely lead to increases in unemployment rates in various economies, particularly in Europe and the US.

Global real GDP growth should pick up steam in 2024 to 2.5 percent and be more evenly distributed among regions. Tailwinds to growth in 2024 will largely come from fading shocks related to the pandemic, elevated inflation, and monetary policy tightening. However, growth rates in 2024 and beyond are likely to be below the pre-pandemic trend, given ongoing supply-side weakness (e.g., ageing demographics worldwide and slow productivity growth). Inflation, while lower than experienced currently, may remain relatively elevated for several reasons, including expected persistence in labor shortages.

The 10-year economic outlook signals a prolonged period of disruptions and uncertainties for businesses, but there are also opportunities. Global growth will return to its slowing trajectory once the 2022-2023 regional recessions end, with mature markets making smaller contributions to global GDP over the next decade. Nonetheless, there are still opportunities for firms to invest in both mature markets—given their wealth and need for innovation to compensate for shrinking labor forces—and emerging markets—given their need for both physical and digital infrastructure to support their sizable and young labor forces. Keys to ensuring growth over the longer term include developing new lines of business; strengthening corporate culture; embracing digital transformation and automation; recruiting for talent with new skills not currently represented in the company; and maximizing the hybrid work model where it makes sense.

Inflation Peaking amid Low Growth

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022. World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The

rise in central bank rates to fight inflation and Russia's war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks to the global outlook remains tilted to the downside, with scope for lower growth and higher inflation, but adverse risks have moderated since the October 2022 World Economic Outlook. For most economies, the priority remains achieving a sustained reduction in inflation toward target levels. Raising real policy rates and keeping them above their neutral levels until underlying inflation is clearly declining would ward off risks of inflation expectations deanchoring. Clear central bank communication and appropriate reactions to shifts in the data will help keep inflation expectations anchored and lessen wage and price pressures. Central banks' balance sheets will need to be unwound carefully, amid market liquidity risks. Gradual and steady fiscal tightening would contribute to cooling demand and limit the burden on monetary policy in the fight against inflation. In countries where output remains below potential and inflation is in check, maintaining monetary and fiscal accommodation may be appropriate.

INDIAN ECONOMY

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030. According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise

exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Hospitals are expected to remain the major beneficiaries of the rising healthcare spends in the country as they account for about 75% of the healthcare spending. Growth opportunity remains robust due to under penetration combined with strong demand for quality healthcare given rising affordability and burgeoning lifestyle diseases and improving medical insurance penetration. Past few years, healthcare sector has exhibited strong growth momentum which is expected to continue as the industry undertakes aggressive capacity expansion post Covid-19, supported by sustained average revenue per bed and improving case mix. Some of the developing trends within hospital & pharmacies include Strong growth dynamics for hospitals due to severe under penetration, especially in Tier 1/ Tier 2 cities.

Medical tourism is a strong opportunity for hospitals as market expected to rise +65% CAGR during FY21-25.

Strong expansion plans across hospitals primarily into brownfield projects; bed capacities to expand by ~30-70% over next 4-5 years, with part of the new capacity likely to be commissioned from end FY24.

GLOBAL PHARMACEUTICAL INDUSTRY

The global pharmaceutical market is estimated at an astronomical USD 1 trillion. The key driving factors behind these will be research and development and innovative treatments for patients. The COVID-19 pandemic has seen several sectors change how they function and develop. Most markedly, the pharma sector has undergone a metamorphosis that has been truly remarkable. In the past few years, the pharma sector has shifted focus from volumes to providing far-reaching value to customers across geographies. The importance of research and development in combating and containing the COVID-19 pandemic has also begun to trickle down to other treatment procedures. In 2022, the same processes and approaches were being used to combat other diseases, such as anaemia and forms of cancer. With these paradigm changes in the sector, 2023 is likely to be another milestone year for the pharma industry in not only the Indian, but also the global market.

INDIAN PHARMA INDUSTRY IN 2023:

The year 2023 holds a positive outlook for India's pharmaceutical industry, with a deeper focus on quality manufacturing, affordability of drugs and adoption of innovation and technology, experts have said.

According to a recent EY FICCI report, as there has been a growing consensus over providing new innovative therapies to patients, Indian pharmaceutical market is estimated to touch \$130 billion in value by the end of 2030. Meanwhile, the global market size of pharmaceutical products is estimated to cross over the \$1 trillion mark in 2023.

The sector this year was marked by a greater degree of collaboration between the government and industry, with both playing a pivotal role in helping the sector further strengthen its position in the global market. Owing to the COVID-19 pandemic, the entire landscape of the pharmaceutical industry has had a paradigm shift, with the collaboration between the government and the industry being increasingly seen in a positive light.

While leading pharmaceutical contract manufacturers in India are focusing on ensuring innovative products. To meet sustainability objectives, several manufacturers are also implementing innovative and environmental-friendly packaging.

Biggest Challenges Facing the Pharmaceutical Industry in 2023

The pharmaceutical industry has a bright future in 2023, with a stronger emphasis on high-quality production, affordable medication, and the use of innovation and technology. However, some businesses (including major names) are still suffering the effects of the global pandemic as the current Covid-19 issue in China continues to make mainstream news and increasingly threatens to disrupt supply chains. While companies are looking to ensure that 2023 is a positive step forward post-pandemic, let's take a look at some of the major challenges that the Pharma industry will face in 2023:

- **Demand for a skilled workforce**

The pharmaceutical industry requires a workforce that has significant knowledge, experience, and skills. Training the workforce helps to acquire the necessary skills to ensure, enhance and improve their participation in their daily tasks. This will also help to fill in any skills gaps that may be observed in the workforce.

- **Supply chain disruption**

Supply chains have witnessed unprecedented disruption all around the world, and this represents one of the major challenges facing the pharmaceutical industry. Many pharma companies are looking to supply chain innovations and circular supply chain models to tackle these challenges and build business resilience.

- **Clinical trials playing catch up**

For pharmaceutical companies running clinical trials for anything other than COVID-19 vaccines, the pandemic caused huge interruptions. And although the primary effects of the pandemic are receding, we're still feeling the impact as we move into 2023. Companies in the pharmaceutical industry are now looking to technologies such as AI and virtual platforms to either restart or recreate trials with less face-to-face interaction. However, this new technology comes at a cost — significantly lowering or even erasing profit margins.

- **Data breaches and cybersecurity threats**

As consumer data is becoming more valuable, the number of cyberattacks is also increasing, and pharmaceutical companies are especially vulnerable to cybersecurity threats. As cyberattacks become a more serious threat to the industry, investment in cybersecurity will need to increase. Companies will also need to implement better cybersecurity policies in the office and for remote workers or run the risk of a costly data breach.

- **Pharmaceutical fraud**

Pharmaceutical fraud remains a major challenge for the industry — and it was possibly even worse during COVID-19. For manufacturers, taking steps to prevent fraud and encouraging internal discussions about potentially fraudulent behavior will help prevent issues with healthcare fraud.

Conclusion:

While most industries have returned to business-as-usual post-pandemic, the pharmaceutical industry will face significant risks through the end of the year. Fragile global supply chains, increased incidences of fraud, and the rising number of cyberattacks will all pose challenges for the Pharma industry going forward. The companies that address these issues proactively will be the ones to have the competitive edge going forward.

ROAD AHEAD

The pharmaceutical industry in India is a significant part of the nation's foreign trade and offers lucrative potential for investors. Millions of people around the world receive affordable and inexpensive generic medications from India, which also runs a sizable number of plants that adhere to Good Manufacturing Practices (GMP) standards set by the World Health Organization (WHO) and the United States Food and Drug Administration (USFDA). Among nations that produce pharmaceuticals, India has long held the top spot. Medicine spending in India is projected to grow 9-12% over the next five years, leading India to become one of the top 10 countries in terms of medicine spending. Going forward, better growth in domestic sales would also depend on the ability of companies to align their product portfolio towards chronic therapies for diseases such as cardiovascular, anti-diabetes, anti-depressants and anti-cancers, which are on the rise. The Indian Government has taken many steps to reduce costs and bring down healthcare expenses. The National Health Protection Scheme, which aims to offer universal healthcare, the ageing population, the rise in chronic diseases, and other government programmes, including the opening of pharmacies that offer inexpensive generic medications, should all contribute to boost the Indian pharmaceutical industry. Speedy introduction of generic drugs into the market has remained in focus and is expected to benefit the Indian pharmaceutical companies. In addition, the thrust on rural health programmes, lifesaving drugs and preventive vaccines also augurs well for the pharmaceutical companies.

- **Distributor of Pharmaceutical Products**

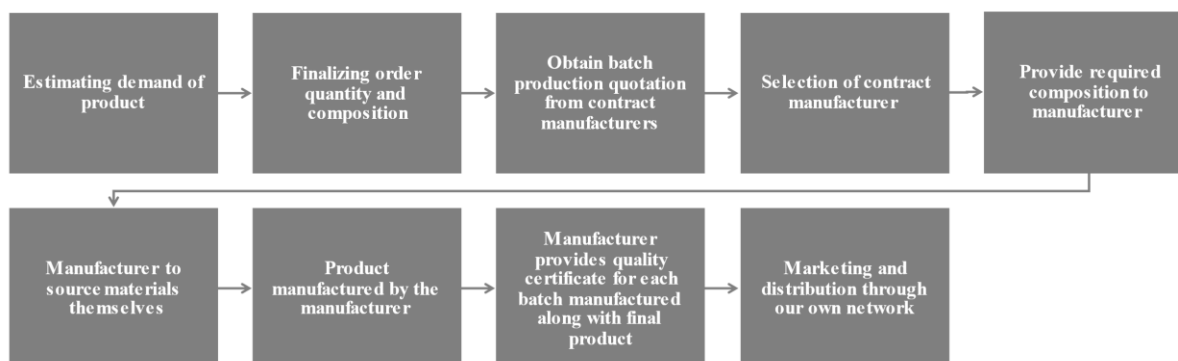

The pharmaceutical industry requires a complex and efficient distribution model to ensure that patients have access to the medications they need. Pharmaceutical distribution is the process of delivering medications from the manufacturer to the healthcare provider or patient. The pharma distribution model involves several key players, including manufacturers, wholesalers, distributors, pharmacies, hospitals, and other healthcare providers. Each player in the distribution chain has a specific role to play in ensuring that medications are delivered safely and efficiently. Distributors are responsible for supplying the medications from the wholesalers to the pharmacy or healthcare provider. They also handle the storage and handling of the medications to ensure that they remain safe and effective.

We primarily cater to the western region of India, particularly in the cities of Gujarat. We operate under the direct sales channel for pharma manufacturers and act as a supply chain consolidator between pharmaceutical manufacturers and the retail pharmacy stores, medical practitioners, and other healthcare facilities. Our key deliverables include logistics, inventory management, credit and delivery at cost-effective prices to the customers. These are critical services that help pharmaceutical

manufacturers to efficiently reach their target customers and improve their sales. As a stockist, our company maintains a certain level of inventory of various pharmaceutical companies in our warehouses. This enables our company to respond quickly to the customer demand. Our company caters to B2B. In the B2B segment, our customers are the retail pharmacy stores, wholesalers and medical practitioners who purchase pharmaceutical products from us in bulk quantities for their own use or for resale.

Key business process

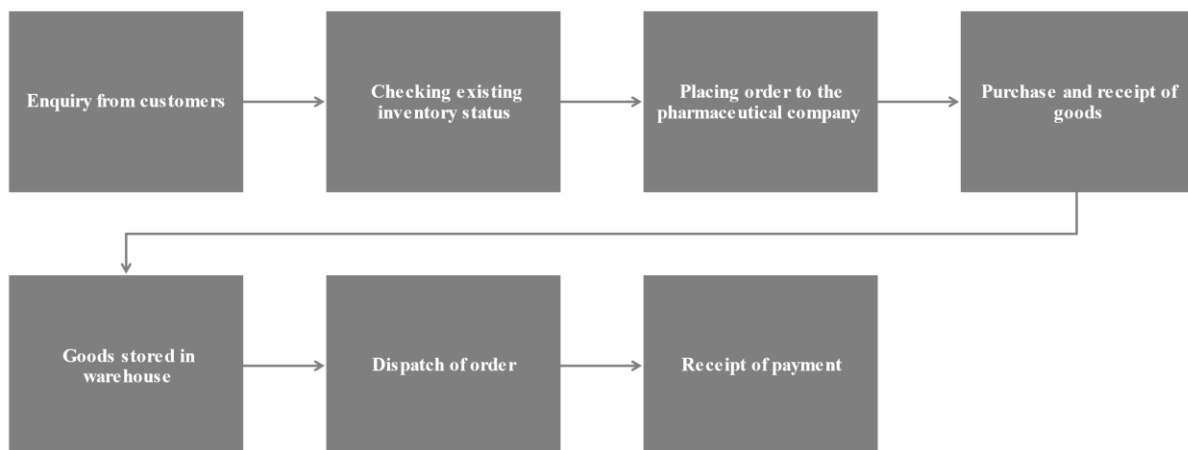

Marketing of Pharmaceutical Products

- ***Estimating demand of product*** - We forecast our demand estimation by analysing our historical data including inventory along with predicting future demand of a particular product as per Intercontinental Medical Statistics (IMS) Data and market survey.
- ***Finalizing order quantity and composition*** - Before starting the process of manufacturing, we finalize order quantity and composition of a particular product. While finalizing the order quantity, we have to keep in mind minimum order quantities (MOQ) for the composition. For tablets and capsules, MOQ is usually between 500 – 1000 Boxes, i.e., 50,000 – 100,000 tablets. While finalizing we also have to check if the manufacturer has required approvals for that composition
- ***Obtain batch production quotation from contract manufacturers*** - It is an essential step in ensuring that our products can be manufactured at a reasonable cost while meeting our quality standards. A batch production quotation is a document that outlines the cost of producing a specified quantity of our product along with other information such as product dimensions, materials, packaging, and any specific quality standards that must be met.
- ***Selection of contract manufacturer*** - Upon receiving batch production quotations from multiple contract manufacturers, we take into account various factors to choose the most suitable one, including the competitiveness of their quotation, our previous working relationship with them, their ability to meet our required delivery timeline, and confirmation that they possess the necessary approvals to manufacture our product.
- ***Provide required composition to manufacturer*** - After the selection of the manufacturer, we release purchase order for the product's manufacturing, which highlights the ingredients and processes involved. Ensuring the maintenance of quality is vital to the success of the production process.
- ***Manufacturer to source materials themselves*** - When it comes to manufacturing of the products, the responsibility of sourcing raw materials often lies with the manufacturer. As a quality assurance measure for the end product, we rely on the manufacturer to provide a quality certificate, which is only possible if they have sourced the necessary raw materials themselves.

- **Product manufactured by the manufacturer** - After the contract manufacturer has sourced the required materials and received the necessary specifications from us for manufacturing the product, they begin the manufacturing process based on the schedule and timeline provided by us. As the production unit of these contract manufacturers holds a Good Manufacturing Practices (GMP) certification, they adhere to specific guidelines set by WHO, GMP & ISO during the manufacturing process to ensure that the final product is manufactured to meet high-quality standards.
- **Manufacturer provides quality certificate for each batch manufactured along with the final product** - The contract manufacturer is responsible for the entire production process, including raw material sourcing, manufacturing, and packaging, for products manufactured. After the completion of each batch, the contract manufacturer provides a quality certificate as an assurance of the quality of the product.
- **Marketing & distribution through our own network** - once the contract manufacturing is done, we market & distribute the products through our established distribution network in accordance with the demand and orders in hand.

Distributor of Pharmaceutical Companies

- **Enquiry from customers** – We receive various enquiries from our customers i.e., retail pharmacy stores, medical practitioners, and other healthcare facilities in various forms such as emails, phone calls, in person visits, through our distribution team, etc.
- **Checking existing inventory status** - Upon receiving an enquiry, we check our existing inventory status. This involves verifying whether the requested product is currently in stock in our warehouse or not. If the product is available in our inventory, we can proceed with the order processing and delivery. However, if the requested product is not available in our inventory, then we have to order from the pharmaceutical company.
- **Placing order to the pharmaceutical company** - Based on the inventory status and existing and future demand of the product, we place the order with the pharmaceutical companies.
- **Purchase and receipt of goods** - Based on the order placed with the pharmaceutical company, purchase order is given, and products are received.
- **Goods stored in warehouse** – Products received from the pharmaceutical company by us are then stored in our warehouse. We follow strict guidelines for storage and handling. This

involves maintaining proper temperature, humidity, and light conditions, as well as ensuring adequate ventilation and protection from pests and contaminants.

- ***Dispatch of order*** - Products are then dispatched from our warehouse to the customers i.e., retail pharmacy stores, medical practitioners, and other healthcare facilities, etc. according to the order received.
- ***Receipt of payment*** - Upon receipt of the products / confirmation of the dispatch, the customer issues the final payment over a pre-decided period of time depending on the credit period extended to such customer.

Business Strategies

The Copyright Act, 1957 (the “Copyright Act”) governs copyright protection in India. GENERAL LAWS

Indian Contract Act

The Indian Contract Act codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract.

Sale of Goods Act, 1930 (the “Sale of Goods Act”)

The Sale of Goods Act governs contracts relating to sale of goods in India. The contracts for sale of goods are subject to the general principles of the law relating to contracts. A contract of sale may be an absolute one or based on certain conditions. The Sale of Goods Act contains provisions in relation to the essential aspects of such contracts, including the transfer of ownership of the goods, delivery of goods, rights and duties of the buyer and seller, remedies for breach of contract and the conditions and warranties implied under a contract for sale of goods.

The Companies Act, 2013

The Act deals with laws relating to companies and certain other associations. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between the set of competing factors, namely, management autonomy and investor protection.

The Specific Relief Act, 1963

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. "Specific performance" means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Information Technology Act, 2000 (the "IT Act") and the rules made thereunder

The IT Act seeks to: (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The IT Act provides for extraterritorial jurisdiction over any offence or contravention under the IT Act committed outside India by any person, irrespective of their nationality, if the act or conduct constituting the offence or contravention involves a computer, computer system or computer network located in India. Additionally, the IT Act empowers the Government of India to direct any of its agencies to intercept, monitor or decrypt any information in the interest of sovereignty, integrity, defence and security of India, among other things. The Information Technology (Procedure and Safeguards for Blocking for Access of Information by Public) Rules, 2009 specifically permit the Government of India to block access of any information generated, transmitted, received, stored or hosted in any computer resource by the public, the reasons for which are required to be recorded by it in writing.

The IT Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third-party information liability and creates liability for failure to protect sensitive personal data. The IT Act also prescribes civil and criminal liability including fines and imprisonment for computer related offences including those relating to unauthorized access to computer systems, tampering with or unauthorised manipulation of any computer, computer system or computer network and damaging computer systems, and creates liability for negligence in dealing with or handling any sensitive personal data or information in a computer resource and in maintaining reasonable security practices and procedures in relation thereto, among others.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 (“FDI Policy 2020”), which with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy from time to time and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular. The RBI issues Master Directions on Foreign Investment in India and updates the same from time to time. Presently, FDI in India is being governed by Master Directions on Foreign Investment No. RBI/FED/2017-18/60 FED Master Direction No. 11/2017-18 dated January 4, 2018, as updated from time to time by RBI. In terms of the Master Directions, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Directions.

OCBs may invest in this Issue provided it obtains a prior approval from the RBI. On submission of such approval along with the Application Form, the OCB shall be eligible to be considered for share allocation.
