Internal Risk Factors

- 1. We are highly dependent on Government Bodies for our Infrastructure Consultation Projects. Any failure to secure new tenders from this government bodies could adversely affect our business and revenue from operations.***

We are primarily engaged in providing infrastructure consultancy services to various government bodies. Currently, all our revenue is derived from government clients, thereby, implying our heavy reliance on infrastructure consultancy services business as a major revenue stream from government bodies. Further, our majority revenue is generated from our top five customers for the fiscal year 2022 2023 and 2024, are 84.01%, 93.52% and 92.09%, respectively. Most of our transactions with our customers are typically on a work order basis. There can also be no assurance that we will be awarded with the projects in future, since in our industry projects are awarded by customer (which are Government entities) on tender-basis. Consequently, any failure to consistently secure government-awarded projects may have adverse implications on our financial performance. Several factors may influence our ability to secure future contracts from government bodies, including changes in government and its policies, reductions in infrastructure-related expenditures, as well as increased competition from both new and established market participants.

Despite the abovementioned constraints, our track record of work experience and consistently providing quality work has enabled us to secure projects from government clients on regular basis. We are

confident in our capacity to compete with new and existing market players when it comes to securing new projects from government bodies. We can leverage our track record, extensive experience, and competitive advantages within the infrastructure consultancy industry. Nevertheless, there can be no absolute certainty that we will continue to secure government projects in future.

2. Our revenue and earnings are dependent on the award of new contracts which we do not directly control.

A substantial portion of our revenue is generated from award of projects, generally obtained through a bidding process. The timing of when project awards will be made is unpredictable and outside of our control. We operate in highly competitive markets where it is difficult to predict whether and when we will receive awards since these awards and projects often involve complex and lengthy negotiations and bidding processes. These processes can be impacted by a wide variety of factors including work order conditions, financing contingencies, environmental conditions and overall market and economic conditions. Because a significant portion of our revenue is generated from award of projects, our results of operations can fluctuate from quarter to quarter and year to year depending on whether and when project awards occur and the commencement and progress of work under such awarded contracts. As a result, we are subject to the risk of losing new awards to competitors or the risk that revenue may not be derived from awarded projects as quickly as anticipated.

3. We may not be able to realize the amounts reflected in our order book, timely completion and performance standards of a project which may materially and adversely affect our financial condition and results of operation.

As on May 31, 2024, our Company's order book size was approx. ₹ 7,890.87 Lakhs. Future revenue related to the performance of projects in the order book may not be realized and although the projects in the order book represent business that is considered firm, cancellations or scope or schedule adjustments may occur. We may also encounter problems executing the project as ordered or executing it on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone a project or cause its cancellation, including delays or failure to obtain necessary permits, authorizations, permissions, right-of-way, COVID-19 related difficulties and other types of difficulties or obstructions. Due to the possibility of cancellations or changes in scope and schedule of projects, resulting from our clients' discretion or problems we encounter in project execution or reasons outside our control or the control of our clients, we cannot predict with certainty when, if or to what extent a project forming part of our order book will be performed. Delays in the completion of a project can lead to clients delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such project. Even relatively short delays or surmountable difficulties in the execution of a project could result in our failure to receive, on a timely basis or at all, the payments due to us from under a work contract. Any delay, reduction in scope, cancellation, execution difficulty, payment postponement or payment default in regard to our order book projects or disputes with clients in respect of any of the foregoing, could adversely affect our cash flow position, revenues and earnings.

We may also be responsible for the performance standards of project. We may also assume a project's technical risk, which means that we may have to satisfy certain technical requirements of the project despite the fact that at the time of project award, we may not have previously developed or applied the system or technology in question. If we subsequently fail to complete the project as scheduled, or if the project subsequently fails to meet the requisite performance standards, we may be held responsible for cost impacts to the client resulting from any delay or the cost to cause the project to achieve the performance standards, generally in the form of contractually agreed upon loss of revenue.

4. We maintain our workforce in alignment with current workloads and future projects. In the event that we do not secure future contract awards or experience delays in receiving them, it could result in incurring additional employee costs.

Our projection of future performance depends on several factors, with a primary focus on the timing and acquisition of new contract awards, as well as the efficient utilization of our workforce. The rate at

which we deploy our workforce is influenced by a multitude of variables, including our ability to manage attrition, accurately forecast our service requirements to maintain an appropriately sized workforce, our ability to transition employees from completed projects to new projects or between internal business groups, and our need to devote resources to non-chargeable activities such as training. While our estimates are based upon our good faith judgment, these estimates are not relied upon and may frequently change based on uncontrollable/unforeseeable circumstances.

Although our estimates are grounded in our sincere judgment, they can be subject to unreliability and frequent adjustments as new information becomes available. Inefficient resource utilization on our part has the potential to only additional employee cost and no other impact.

5. The contracts in our order book may be adjusted, cancelled or suspended by our clients and, therefore, our order book is not necessarily indicative of our future revenues or earnings.

As of May 31, 2024, our order book for our consultancy services business was approximately ₹ 7,890.87 Lakhs. There can be no assurance that our order book will actually be realized as revenues or, if realized, will result in profits. As on date of this Prospectus, in past there were contracts which were extended by the authorities but there are no cancellation, termination or suspension of any contracts but there may be chances of cancellation, termination or suspension at the discretion of the client at any stage of the contract. Our order book includes expected revenues for awarded contracts that are based on estimates that same will be completed on time. The risk of contracts in order book being cancelled or suspended generally increases during periods of widespread economic slowdowns. Any delay or cancellation could adversely affect our cash flow position, revenues and/or profitability.

6. We have entered into joint venture arrangements or agreements or Memorandum of Understanding or Power of attorney with third parties to complete infrastructure consultancy services.

As part of our business model, we enter into joint venture (JV) arrangements or agreements / Memorandum of Understanding (MoU) or Power of attorney (POA) with Associate Partner to complete Detailed Project Report, Supervision Quality Control and Operation & Maintenance falling under various categories of Infrastructure consultancy services. Since inception of our Company (erstwhile known as Manglam Associates), we have entered into joint ventures arrangements / agreements or Memorandum of understanding or POA with third parties. However, in some of the agreements financial terms and conditions are not mentioned in which terms are decided verbally.

We may continue to enter joint venture or similar arrangements with third parties. We need the cooperation and consent of our joint partners or associate partners in connection with the operations of our joint venture, which may not always be forthcoming, and we may not always be successful at managing our relationships with such partners. There are certain risks associated in operating with joint partners, including the risk that our joint partners may have economic or business interests or goals that are inconsistent with our interests and goals; exercise veto rights in relation to our proposals in respect of joint venture operations and future financing requirements; be unable or unwilling to fulfil their obligations and have disputes with us or terminate such agreements; take actions contrary to our instructions or requests or contrary to a joint venture agreement; take actions that are not acceptable to regulatory authorities; or experience financial or other difficulties. Further, disputes that may arise between us may cause delay in completion, suspension or complete abandonment of a project, which may adversely affect our business, financial condition and results of operations.

7. A significant portion of our revenues are derived from a few geographical regions and any adverse developments affecting such regions could have an adverse effect on our business, cash flows, results of operation and financial condition.

A significant portion of our revenue from operations are derived from our services offered to clients concentrated in Madhya Pradesh. For the Fiscals 2024, 2023 and 2022, our revenue generated from operations in Madhya Pradesh was ₹ 1,685.04 Lakhs, ₹ 1,344.77 Lakhs, ₹ 762.83 Lakhs, respectively,

which represented 41.87%, 39.07% and 29.55% of our revenue from operations for such periods. Any decrease in revenue from operations, including due to increased competition or supply, or reduction in demand, or our inability to extend or renew subsisting contracts at commercially viable terms, may have an adverse effect on our business, cash flows, results of operation and financial condition. Further, any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting these geographical regions may adversely affect our business. Additionally, changes in the policies of the state or local governments of these regions may require us to change our business strategy. We cannot assure you that we will be able to address our reliance on these few geographical regions, in the future.

Our client base reflects concentration in north, east and west region of India and majority of our revenue is generated from the clientele within Madhya Pradesh, Nagaland, Bihar and Maharashtra. This limits our scope of expertise and experience at national level and our competitors who have a pan-India presence will have exposure to wider spectrum of clientele and experience. This might give them edge over our services in terms of proficiency and ability to cater to wider range of customers.

Expanding business in southern region of India will involve change in compliances due to difference in governing local and municipal laws, language differences, recruitment of human resources and their training etc. These activities add financial obligation on an enterprise and the success is largely dependent on market acceptance in a particular region. Our inability to effectively manage expanded operations or pursue growth strategy may lead to operational and financial inefficiencies, which could have a material adverse effect on our business prospects, financial condition and results of operations.

8. Our Restated Financial Statements are Prepared and Signed by the Peer Review Auditors who is not Statutory Auditors of our Company as required under the provisions of ICDR:

Our Restated Financial Statements are prepared and signed by M/s. Pawan Shubham & Co., the Peer Review Auditor who is not the Statutory Auditor of the company. The Company will appoint the Chartered Accountant holding Peer Review Certificate as Statutory Auditor in the Annual General Meeting of the Company.

9. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

Our company's net working capital consisted of ₹ 125.95 lakhs, ₹ 462.08 lakhs and ₹ 1,222.73 lakhs for the financial year ended 2022, 2023 and 2024 respectively. The net working capital requirement for the financial year 2025 and 2026 are projected to be ₹ 2,352.50 lakhs and ₹ 2,600.12 lakhs. A significant portion of our working capital is utilized towards trade payables and trade receivables. Summary of our working capital position is given below:

* Reason for increase in Short Term Loans & Advances in FY 2025 and FY 2026 as compared to FY 2022, 2023 and 2024 is on account on company's strategy to bid for larger projects going forward and all Independent as Lead Partner, as against company's current strategy to bid for smaller projects through Joint Venture. In the coming years, the Company plans to aggressively bid for more larger contracts on an independent basis. Typically, a contract is for on an average 36 - 48 months. In every contract, the Company has to initially work for 3 - 5 months with nominal / no fees during the period of mobilization. However, company has to keep paying salaries to employees, fees to professionals, rent and vehicle hiring & office running cost etc. After the first 3 - 5 months, the Company starts getting some fees (equivalent to monthly expenses) from clients on a regular basis.

Our business requires funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 64 of this Prospectus.

10. Our ability to attract, train and retain executives and other qualified employees is critical to our business, results of operations and future growth.

Our business and future growth is substantially dependent on the continued services and performance of our key executives, senior management and skilled personnel, especially personnel with experience in our industry. In particular, our Managing Director, Ajay Verma & Chairman and Executive Director, Yogendra Kumar Singh and our senior management are critical to the overall management of our Company. Their inputs and experience are also valuable for our business, our work culture and the strategic direction taken by our Company. Further, our consultancy business depends upon our employees for its successful execution. Our skilled professional team has been with us for more than 7 years; however, any of them may choose to terminate their employment with us at any time. We cannot assure you that we will be able to retain these employees or find equally qualified and experienced replacements in a timely manner, or at all.

The specialized skills we require for our consultancy services, can be difficult and time-consuming to acquire and/or develop and, as a result, such skilled personnel are often in short supply. Further, we depend on the management skills, guidance and industry contacts of our Key Managerial Personnel for our current operations, development of business strategy and for monitoring its successful implementation and meeting future challenges. We may require a long period of time to hire and train replaced personnel when skilled personnel terminate their employment with our Company. Our ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees. We may be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we do not succeed in attracting well-qualified employees or retaining or motivating existing employees, our business and prospects for growth could be adversely affected.

11. Our Company has provided corporate guarantee of one of the property of our company to one of our promoter group entity.

One of the entities within our promoter group, namely Presvels Private Limited (PPL), had availed Cash Credit Hypothecation (CCH), Term loan, and non-fund based (NFB)/Inland Letter of Credit (ILC) limits from a bank as of March 15, 2023. At the time of providing this guarantee, our company operated as a partnership firm. Subsequently, following the conversion process from a partnership firm to a public limited company, our company applied for the release of a guarantee on October 30, 2023. Over the years, our Company has been providing infrastructure consultancy services to various government bodies. Such projects involve implementation risks including delays by the Government agencies. In addition, even where a project proceeds as scheduled, it is possible that Government agencies may default and fail to pay amounts owed on the receivables due. If any or all these risks materialise, we may suffer significant cost overruns, or even losses in these projects due to unanticipated increase in costs as a result of which our business, profits, results of operations and financial condition may be materially and adversely affected. However, we have not faced such kind of a situation, till date.

Upon receipt of the bid and completion of work as stipulated in the agreements, these JV agreements are dissolved. These unincorporated joint ventures are not separate legal entities and liabilities incurred by such unincorporated joint ventures would be shared jointly and severally by the members of such joint venture entities. While cross indemnification is usually available between the joint venture members, we could be exposed to liabilities arising out of defaults by our joint venture member. These liabilities may include various financial impacts and other obligations.

24. Our funds requirements are based on internal management estimates, wherever possible, and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

25. The coronavirus pandemic (“Covid-19”) has had an adverse effect on our business and operations, and the extent to which it may continue to do so in the future cannot be predicted.

As a result of Government-imposed lockdowns in India, operations at our business was temporarily shut down for approximately four to six weeks in 2020-21. During the second wave of the Covid-19 pandemic in India in April 2021 until June 2021, restrictions on operations was imposed again, though with less stringent restrictions, with the imposition of a night curfew with effect from April 12, 2021, leading to a complete lockdown from May 03, 2021.

Similar pandemics and resultant government actions that may occur in the future may similarly affect our business, results of operations and financial condition, including as a result of: (i) complete or partial closure of our operations due to lockdowns; (ii) disruptions or restrictions on our ability to conduct our business, pursue partnerships and other business opportunities; (iii) inability to access debt and equity capital on acceptable terms, or at all; and (viii) potential non-compliance with financial covenants in credit facilities and other financing agreements which could result in events of default and the acceleration of indebtedness. The occurrence of any of these events could hamper our ability to ensure business continuity.

26. Our Company has unsecured loans with a total outstanding amount of ₹ 174.94 lakhs as of March 31, 2024, that may be recalled by the lenders at any time.

Our Company has currently availed certain unsecured loans. The total outstanding amount of the unsecured loan as of March 31, 2024, was ₹ 174.94 lakhs. These loans may be recalled by the lenders at any time. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details of these unsecured loans, please refer to Chapter titled "*Restated Financial Statements*" beginning on page 147 of this Prospectus.

27. Our success depends heavily upon our management team, Key managerial personnel and skilled manpower. Our inability to attract and retain key personnel or loss of services of our key personnel may have an adverse effect on our business prospects.

Our management team, key managerial personnel and skilled manpower have significantly contributed to the growth of our business, and our future success is dependent on their continued services. An inability to retain any key personnel may have an adverse effect on our business operations. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow our operations. In the future, we may also not be able to compete with other companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects. For further details, please refer chapter titled "*Our Promoters and Promoter Group*" and "*Our Management*" beginning on page 181 & 163 of this Prospectus.

28. If we fail to obtain, maintain or renew the statutory and regulatory licenses, permits and approvals required for our business and operations, our business, results of operations, financial condition and cash flows may be adversely affected.

We are required to obtain and maintain certain statutory and regulatory permission and approvals under central, state and local government rules in India, generally for carrying out our business. Further, we require registration under the Shops and Commercial Establishments Act, 1958 for our branch office which is situated at Gurgaon. Our Company has applied for Shops & Establishment License of branch Office. For details of applicable regulations and approvals relating to our business and operations, see "*Key Industry Regulations and Policies*" and "*Government and Other Key Approvals*" on pages 144 and 231, respectively. Some of these approvals are granted for a limited duration and require renewal. The approvals required by us are subject to certain conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business, results of operations, financial condition and cash flows.

If we fail to obtain such approvals, licenses, registrations and permissions, in a timely manner or at all, our business, results of operations, financial condition and cash flows may be adversely affected. There can be no assurance that the relevant authorities will issue such approvals, licenses, registrations and permissions in the timeframe anticipated by us or at all.

29. We presently do not own the trademark or logo under which we currently operate and if third parties infringe the trademark, logo and intellectual property that we use, our business and reputation would be adversely affected.

“Manglam Infra & Engineering” and “” under Class 35, 36, 37 and 42 in accordance with the Trademarks Act, 1999. Each class has made two applications, one for the wordmark and another for the logo. Currently, out of all our trademark applications, three wordmark applications have been registered. Other applications for registering our wordmark and logo under the company's name are still pending with the trademark authority. Among these pending applications, four for the logo are under examination, and one for the wordmark has been objected. Hence as on date of Prospectus, we do not enjoy the statutory protections accorded to registered logo and wordmark. For further details, please see “*Government and Other Key Approvals*” beginning on page 231 of this Prospectus.

With respect to our trademark that have been under objection, we cannot assure you that we will be successful in removing the objections or contend the opposition. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted. We cannot guarantee that any of our registered or unregistered intellectual property rights or our know-how, or claims thereto, will now or in the future successfully protect what we consider to be the intellectual property underlying our products and business, or that our rights will not be opposed or otherwise challenged.

While we endeavour to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

32. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at several instances, delayed in filing our TDS and Income Tax returns, GST returns. Additionally, there have been instances of non-compliance in filing of EPF & ESIC returns and making corresponding payments up to present date. Consequently, we have incurred late filing fees and interest charges due to the delayed deposit of taxes and statutory dues. If we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

The management of our company will have discretion to use the net proceeds from the issue, and investors will be relying on the judgment of our Company’s management regarding the application of the net proceeds from the issue. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our promoters or controlling shareholders will be required to provide an exit opportunity to the shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the issue will need to rely upon our management’s judgment with respect to the use of net proceeds. If we are unable to enter into arrangements for utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the issue and our business and financial results may suffer.

We cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

35. *We have certain amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As on March 31, 2024, our long-term borrowings were ₹ 138.94 lakhs & short-term borrowings were ₹308.37 lakhs and as per our business requirements, we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- limiting our ability to borrow additional amounts in the future.
- increasing our finance costs.
- increasing our vulnerability to general adverse economic, industry and competitive conditions; and
- affecting our capital adequacy requirements.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. We maintain insurance coverage for key risks relating to our business. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption.

37. We have not independently verified certain data in this Prospectus

We have not independently verified data from the industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to India, its economy or the industry in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

38. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock

Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

39. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

40. The Equity Shares have never been publicly traded, and, after the issue, the equity shares may experience price and volume fluctuations, and an active trading market for the equity shares may not develop. Further, the price of the equity shares may be volatile, and you may be unable to resell the equity shares at or above the issue price, or at all.

Prior to the issue, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the issue. Listing and quotation does not guarantee that a market for the equity shares will develop. The issue price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The trading volume and market price of the equity shares may be volatile following the issue.

The market price of the equity shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties / governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

41. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

42. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within three working days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

43. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in this Issue and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately second Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within three Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will

commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

44. Any future issuance of Equity Shares may dilute the shareholding of the Investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoter or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “*Capital Structure*” beginning on page 64 of this Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

External Risk Factors

45. Our revenue of operation is from India, we are subject to economic, political and market conditions in India, many of which are beyond our control.

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We are incorporated in India, and all of our business and our personnel are located in India. Consequently, our business, results of operations, financial condition and cash flows will be affected by a number of macroeconomic and demographic factors in India which are beyond our control. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters (such as hurricanes, typhoons, floods, earthquakes, tsunamis and fires) which may cause us to suspend our operations;
- civil unrest, acts of violence, terrorist attacks, regional conflicts or situations or war may adversely affect the Indian markets as well as result in a loss of business confidence in Indian companies;
- epidemics, pandemics or any other public health concerns in India or in countries in the region or globally, including in India’s various neighboring countries;

In particular, our total income and profitability are correlated to consumer discretionary spending in India, which is influenced by general economic conditions, salaries, employment levels and consumer confidence. Recessionary economic cycles, a protracted economic slowdown, a worsening economy, increased unemployment, rising interest rates or other industry-wide cost pressures could also affect consumer behavior and spending for consumer products and lead to a decline in our total income and profitability. While our results may not necessarily track India’s economic growth figures, the Indian

economy performance affects the environment in which we operate. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, financial condition, cash flows and the price of the Equity Shares.

46. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Europe and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. For example, the full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries has substantially affected the economic stability of the world and such volatility could impact our Company's growth. In addition, the market price of oil has risen sharply since the commencement of hostilities in Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

In addition, the USA is one of India's major trading partners and any possible slowdown in the American economy could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

47. Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

48. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition.

Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. It is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

49. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely impact the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

50. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

The Articles of Association, the composition of our Board and other aspects of our corporate affairs, including the validity of corporate procedures, directors' fiduciary duties and liabilities and shareholders' rights, are governed by Indian laws and may differ from companies in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

51. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of Equity Shares at a premium to the market price or would otherwise be beneficial to the shareholders. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

52. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020, and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

53. QIBs and NIBs are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/Offer Closing date.

Pursuant to the SEBI ICDR Regulations, QIBs and NIBs are required to pay the Bid amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. RIBs can revise or withdraw their Bids at any time during the Bid/Issue Period and until the Bid/Issue Closing Date, but not thereafter. While our Company is required to complete all necessary formalities for listing and commencement of trading of our Equity Shares on all Stock Exchange where such Equity Shares are proposed to be listed, including Allotment pursuant to the Issue, within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, financial condition and results of operations may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of our Equity Shares even if such events occur, and such events limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or cause the trading price of our Equity Shares to decline on listing. QIBs and NIBs will therefore not be able to withdraw or lower their bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise, between the dates of submission of their Bids and Allotment.

Details of the Objects of the Issue

1. To meet the working capital requirements

We are engaged in the business of Detailed Project Report, Supervision Quality Control and Operation & Maintenance falling under various categories of Infrastructure Sectors. At present, we fund a majority of our working capital requirements in the ordinary course of business from borrowing and internal accruals.

Basis of estimation of working capital requirement

Rationale for FY 2021-22: During FY2022, out of total revenue of ₹ 2581.16 lakhs, revenue from consultancy services project for preparation of DPR was ₹ 664.5 lakhs i.e. an increase of over 200% from FY2021. This increase in revenue was largely on account of revenue generated from one consultancy service project for preparation of DPR of road under UPRRDA wherein an amount of ₹ 136.36 lakhs were received and another consultancy service project for preparation of DPR of roads in Chhatisgarh under CGRDA wherein an amount of over ₹ 144.06 lakhs were invoiced and received. In addition, there was revenue from consultancy service project for construction of double-lane highway in Arunachal Pradesh; DPR project of roadways in Uttar Pradesh under UPRRDA; and Border Road Organisation(BRO), Jammu. Further, post-covid and resumption of business activities in the country, the pending projects awarded to the Company were resumed and consequently clearance of respective pending invoices, which increases the inflow in the Company. Consequently, liabilities were also paid off i.e. majorly trade creditors and statutory liabilities got reduced, which is also reflected in trade creditors days, which reduced from 80 days in FY 2021 to 60 days in FY2022. This resulted in positive working capital in FY 2022 as compared to negative working capital in FY 2021.

Rationale for FY 2022-23: There was significant growth in revenue of more than 33% during FY23 i.e. revenue increased from ₹ 2581.16 lakhs to ₹ 3441.88 lakhs wherein all verticals of business contributed. The revenue from preparation of DPR in the roads/highway sector increased by more than 92%. Further, revenue from consultancy services for Project Management, Supervision and Quality Control of Bridges on Rural Roads in the State of Bihar also added in the revenue. In addition, there was revenue from O&M contracts to the extent of ₹ 317.56 lakhs. Therefore, with the increase in revenue/cashflow, liabilities / trade payables were paid off which translate into reduction of trade

payable days from 60 days to 39 days. This has resulted into increase in working capital requirement in FY 2023.

** Reason for increase in Short Term Loans & Advances in FY 2025 and FY 2026 as compared to FY 2022, 2023 and 2024 is on account on company's strategy to bid for larger projects going forward and all Independent as Lead Partner, as against company's current strategy to bid for smaller projects through Joint Venture. In the coming years, the Company plans to aggressively bid for more larger contracts on an independent basis. Typically, a contract is for average 36 - 48 months. In every contract, the Company has to initially work for 3 - 5 months with nominal / no fees during the period of mobilization. However, company has to keep paying salaries to employees, fees to professionals, rent and vehicle hiring & office running cost etc. After the first 3 - 5 months, the Company starts getting some fees (equivalent to monthly

expenses) from clients on a regular basis. For Detailed Project Report (DPR) projects, in the initial stages of such projects, we have to make maximum expenses, but as per the payment schedule as mentioned in the agreements, we receive payment at a later stage or at the nearest stage of completion.

Justifications

Particulars	Justification
Trade receivables	Over the past three financial years, we have observed variations in our trade receivables days. In FY 2021-22, our trade receivables days were 44 days, which increased to 101 days in FY 2022-23 and then further increased to 152 days in FY 2023-24. We expect our trade receivables days to be 135 days and 125 days for FY 2024-25 and FY 2025-26, respectively. This trend is primarily driven by the characteristics of our customer base, predominantly comprising various state government organizations. Customers in these sectors typically follow a payment practice where payments are made post-project completion and the general payment terms extend to around 90 to 100 days. Also, the completion timings for projects in the infrastructure sector can be variable. As a result, our trade receivable days are in alignment with industry norms and the necessity to accommodate the payment practices prevalent in our customer base.
Trade payables	Our trade payables days observed a reduction, decreasing from 60 days in FY 2021-22 to 39 days in FY 2022-23, and then increased slightly to 46 days in FY 2023-24. We expect our trade payables days to be 42 days and 40 days for FY 2024-25 and FY 2025-26, respectively, on account of our strategic decision to maintain better cash flows. The projected decrease in trade payables days is a strategic decision driven by our objectives to secure the best pricing and foster strong relationships with our suppliers. By reducing the time it takes to settle our payables, we aim to negotiate more favorable terms and conditions with our suppliers, enabling us to access competitive pricing for the goods and services we procure.

GLOBAL OUTLOOK

Global recovery remains slow, with growing regional divergences and little margin for policy error:

The baseline forecast is for the world economy to continue growing at 3.2 percent during 2024 and 2025, at the same pace as in 2023. A slight acceleration for advanced economies where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025 will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now at 3.1 percent is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually.

Economic activity was surprisingly resilient through the global disinflation of 2022–23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. Growth in employment and incomes held steady, reflecting supportive demand developments including greater-than-expected government spending and household consumption and a supply-side expansion amid, notably, an unanticipated boost to labor force participation. The unexpected economic resilience, despite significant central bank interest rate hikes aimed at restoring price stability, also reflects the ability of households in major advanced economies to draw on substantial savings accumulated during the pandemic.

As the global economy approaches a soft landing, the near-term priority for central banks is to ensure that inflation touches down smoothly, by neither easing policies prematurely nor delaying too long and causing target undershoots. At the same time, as central banks take a less restrictive stance, a renewed focus on implementing medium-term fiscal consolidation to rebuild room for budgetary manoeuvre and priority investments, and to ensure debt sustainability, is in order. Cross-country differences call for tailored policy responses.

***For India, data and forecasts are presented on a fiscal year basis, with FY 2023/2024 (starting in April 2023) shown in the 2023 column. India's growth projections are 6.9 percent in 2024 and 6.5 percent in 2025 based on calendar year.*

Inflation Outlook: Declining at Different Speeds

Global headline inflation is expected to fall from an annual average of 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025. A more front-loaded decline is expected for advanced economies, with inflation falling by 2.0 percentage points in 2024, while it declines in 2025 only in emerging market and developing economies. Advanced economies are also expected to return sooner to rates near their pre pandemic (2017–19) average, with inflation averaging 2.0 percent in 2025, about a year before emerging market and developing economies are expected to return to their pre pandemic average near 5.0 percent. At the same time, a great deal of differentiation is expected among emerging market and developing economies, with the inflation forecast ranging among the five regions from only 2.4 percent for emerging and developing Asia, reflecting subdued inflation in China as well as in Thailand, to 18.8 percent for emerging and developing Europe, reflecting elevated inflation in Türkiye. The global inflation forecast is revised upward by 0.1 percentage point in 2024 from the January 2024 projections. This reflects unchanged projections for advanced economies with decreases in the euro area, Japan, and the United Kingdom compensated by an increase in the United States and an upside revision of 0.2 percentage point in emerging market and developing economies, mainly on account of increases in Iran and a few other low-income countries.

The fall in global inflation in 2024 reflects a broad-based decline in global core inflation. This dynamic differs from that in 2023, when global core inflation fell a little on an annual average basis and headline inflation declined mainly on account of lower fuel and food price inflation. In 2024, core inflation is expected to fall by 1.2 percentage points after contracting by just 0.2 percentage point in 2023. As is the case for headline inflation, the fall in core inflation is faster for advanced economies. The drivers of declining core inflation differ by country but include the effects of still-tight monetary policies, a related

softening in labor markets, and fading pass-through effects from earlier declines in relative prices, notably in that of energy. Among economies with an inflation target, headline inflation is projected to be 0.5 percentage point above target (or the midpoint of the target range) for the median economy by the third quarter of 2024 on a quarter-over-quarter basis. For advanced economies, however, the median gap between actual and target is expected to be just 0.3 percentage point by the third quarter of 2024, implying a faster return to target levels than in emerging market and developing economies. Most economies are expected to reach levels within a quarter of a percentage point of their targets (or the midpoints of their target ranges) by the second quarter of 2025.

Growth Forecast for Emerging Market and Developing Economies:-

In emerging market and developing economies, growth is expected to be stable at 4.2 percent in 2024 and 2025, with a moderation in emerging and developing Asia offset mainly by rising growth for economies in the Middle East and Central Asia and for sub-Saharan Africa. Low-income developing countries are expected to experience gradually increasing growth, from 4.0 percent in 2023 to 4.7 percent in 2024 and 5.2 percent in 2025, as some constraints on near-term growth ease. Growth in emerging and developing Asia is expected to fall from an estimated 5.6 percent in 2023 to 5.2 percent in 2024 and 4.9 percent in 2025, a slight upward revision compared with the January 2024 WEO Update. Growth in China is projected to slow from 5.2 percent in 2023 to 4.6 percent in 2024 and 4.1 percent in 2025 as the positive effects of one-off factors including the post pandemic boost to consumption and fiscal stimulus ease and weakness in the property sector persists. Growth in India is projected to remain strong at 6.8 percent in 2024 and 6.5 percent in 2025, with the robustness reflecting continuing strength in domestic demand and a rising working-age population.

G20 Emerging Markets in the Global Economy:

G20 EMs have also expanded their participation in GVCs both downstream and upstream as a result of their demand for manufacturing products (output linkages) and their supply of inputs to other economies (input linkages). The median country doubled its inputs from G20 EMs between 2000 and 2021, while demand from G20 EMs for outputs more than doubled. Increased trade and GVC integration among G20 EMs results from unbundling related to declining transportation, information, and communication costs, technological progress, and lower barriers to trade and capital flows, which have allowed emerging markets to become more vertically integrated in global supply chains. Two sectors—manufacturing and mining—dominate the top 5 percent of linkages, alongside China, whose manufacturing production is the largest globally and still highly dependent on external demand. Other countries—such as India and Russia—also have a significant presence, reflecting fast growth in manufacturing production (India) and strong linkages through the supply of energy commodities (Russia).

INDIAN OUTLOOK

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the “Invest in India” narrative.

Market Size:

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, ‘Panchamrit’. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India’s current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India’s trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Increased government expenditure is expected to attract private investments, with a production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded, and measured policy support is anticipated to boost the Indian economy.
- In February 2022, Minister for Finance and Corporate Affairs Ms. Nirmala Sitharaman said that productivity linked incentive (PLI) schemes would be extended to 14 sectors to achieve the mission of AtmaNirbhar Bharat and create 60 lakh jobs with an additional production capacity of Rs. 30 trillion (US\$ 401.49 billion) in the next five years.
- In the Union Budget of 2022-23, the government announced funding for the production-linked incentive (PLI) scheme for domestic solar cells and module manufacturing of Rs. 24,000 crore (US\$ 3.21 billion).
- In the Union Budget of 2022, Minister for Finance & Corporate Affairs Ms. Nirmala Sitharaman announced that a scheme for design-led manufacturing in 5G would be launched as part of the PLI scheme.

- In September 2021, Union Cabinet approved major reforms in the telecom sector, which are expected to boost employment, growth, competition, and consumer interests. Key reforms include rationalization of adjusted gross revenue, rationalization of bank guarantees (BGs), and encouragement of spectrum sharing.
- Minister for Finance & Corporate Affairs Ms. Nirmala Sitharaman announced in the Union Budget of 2022-23 that the Reserve Bank of India (RBI) would issue Digital Rupee using blockchain and other technologies.
- In the Union Budget of 2022-23, Railway got an investment of Rs. 2.38 trillion (US\$ 31.88 billion) and over 400 new high-speed trains were announced. The concept of "One Station, One Product" was also introduced.
- Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of the average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.
- National Bank for Financing Infrastructure and Development (NaBFID) is a bank that will provide non-recourse infrastructure financing and is expected to support projects from the first quarter of FY23; it is expected to raise Rs. 4 trillion (US\$ 53.58 billion) in the next three years.
- By November 1, 2021, India, and the United Kingdom hope to begin negotiations on a free trade agreement. The proposed FTA between these two countries is likely to unlock business opportunities and generate jobs. Both sides have renewed their commitment to boost trade in a manner that benefits all.
- India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.

Road Ahead

In the second quarter of FY23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Infrastructure Industry in India:

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to the nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of the infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water, and irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Road Ahead

With a 37% increase in the current fiscal year, capital expenditures (capex) are on the rise, which bolsters ongoing infrastructure development and fits with 2027 goals for India's economic growth to become a US\$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.

India, it is estimated, needs to invest US\$ 840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as

sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports, and airports.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure. India, it is estimated, needs to invest \$840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports and airports.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom because of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

Industry Research Report on Roads and Highways Sector in India

Road Transport

Road Transport is considered to be one of the most cost effective and preferred mode of transport, both for freight and passengers, keeping in view its level of penetration into populated areas. Thus, it is vital for economic development and social integration of the country. Road Transport has emerged as the dominant segment in India's transportation sector with a share of 4.5% in India's GDP in 2005-06. The Road Transport Sector accounts for about 87% of passenger traffic and 60% of freight traffic movement in the country. Easy availability, adaptability to individual needs and the cost savings are some of the factors which go in favour of road transport. Road transport also acts as a feeder service to railway, shipping and air traffic.

Road Transport Wing of the Ministry is concerned with the formulation of broad policies relating to regulation of road transport in the country, besides making arrangements for movement of vehicular traffic with the neighbouring countries. Improving the road safety scenario in the country is one of the most important and challenging activities of the Road Transport Wing.

This Ministry formulates policies for road safety so as to minimise road accidents. The important schemes formulated and managed by the Road Safety Division / Section include publicity programmes, National Highways Accident Relief Service Scheme (NHARSS), refresher training to heavy vehicle drivers in unorganized sector, providing road safety equipments to States/UTs etc. The Ministry formed five separate working groups on four E's of Road Safety viz. (i) Education (ii) Enforcement (iii) Engineering (roads as well as vehicles) and (iv) Emergency care to deliberate in detail and submit their recommendations on short-term and long term measures for immediate implementation so as to curb road accidents in the country.

Business Verticals

The detailed write up about our business verticals are as follows:

a) Detailed Project Report (DPR)-

Under DPR, the objective of the company is to establish technical, economical, and financial viability of the project and to prepare detailed project reports for construction of roads, highways, bridges etc. The viability of projects is established by considering the requirements related to rehabilitation, upgrading, and improvement based on highway and pavement design, the provision of service roads as needed, intersection types, rehabilitation or widening of existing and/or construction bridges and structures, as well as integration of road safety measures.

The detailed project report inter-alia includes detailed design, detailed working drawings, detailed cost estimates, economic and financial viability analysis, environmental and social impact assessment. Moreover, the report comprises several essential elements, such as an inception report, information study and conceptual planning. It also incorporates site reconnaissance and surveys, traffic surveys, and alignment finalization. Subsurface investigations, geotechnical reports, evaluations of utility services and other physical features, environmental studies, assessments of seismicity, and site evaluations are also integral parts of this detailed project report.

The independent engineer is required to prepare the detailed project preparation. This entails the creation and submission of several reports at different stages, including an inception report, alignment option study report, feasibility report, draft DPR, final DPR including cost estimates and land acquisition plans.

b) Supervision and quality control (SQC)-

In development phase, an independent engineer/ authority engineer undertakes a thorough review of the drawings along with supporting data including geo-technical and hydrological investigations, characteristics of materials from borrow areas, topographical surveys and traffic surveys and approves the construction drawings for implementation.

During the construction phase, a review is conducted to assess the progress, quality, and safety of the construction activities. Additionally, the independent engineer oversees inspections to identify and address any defects or deficiencies in the construction work.

c) Operation and Maintenance (O&M) Phase-

The independent engineer/ authority engineer is tasked with a range of responsibilities including reviewing drawings and related documents, inspecting and monitoring maintenance works, conducting tests upon completion of maintenance and issuing completion/provisional certificates, overseeing O&M activities, monitoring divestment requirements, determining the duration or extensions for fulfilling any duties or obligations, assisting authorities in reviewing and inspecting financial records, providing all necessary data on a monthly basis in the monthly progress report within the required timeframe for project updates, and carrying out regular maintenance requirements.

Details for in depth assessments

In infrastructure consultancy industry, the independent engineer is mandatorily required to be adhered to the pre-defined methods, approach, solutions, and their respective steps for execution of assigned project by the clients which includes assembling a designated team for bidding, business development, skilled engineers to monitor the project. To evaluate the project and to develop the roadmap, the independent engineer/ authority engineer carries out following measures:

Site appreciation: Prior to bidding, the prospective consultant physically visits the site to apprise himself of the challenges, environment, and complexities of the project. This enables the consultant to gain an understanding project's objectives. Subsequently, the consultant evaluates the approach to services and methodologies required to achieve the desired outcomes. Additionally, the client provides details on the existing site conditions, physiography, topography, and climate within the Request for Proposal (RFP) document to inform all prospective consultants.

In preparation for project assessment and roadmap development, the independent engineer/ authority engineer receives various documents from the client, including the Request for Proposal (RFP) and requisite form, that outline proposed approach and methodology for project execution. The requisite form specifically defines the methodology for services, surveying, data collection, and analysis. The client's approach in preparing such documents is aimed towards producing deliverables and providing services, leveraging available technology and software tailored to local conditions. This methodology is structured into a series of tasks and sub-tasks aimed at achieving the study/project objectives. The sequential execution of these tasks, including the preliminary feasibility study and conceptual design phases, serves to ascertain the project's feasibility.

STATE LAW

URBAN DEVELOPMENT LAWS

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages. For instance, in certain states such as Haryana, for developing a residential colony, a license is required from the relevant local authority. Where projects are undertaken on lands which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved by the concerned municipal or developmental authority. Building plans are required to be approved for each building within the project area. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project.

AGRICULTURAL DEVELOPMENT LAWS

The acquisition of land is regulated by state land reform laws which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land which results in the aggregate land holdings of the acquirer in the state exceeding this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the state government free of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate from the appropriate authority with respect to a change in the use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc., such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/ external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities. The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

Phased implementation of UPI for Bids by RIBs as per the UPI Circulars

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, *inter alia*, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019, and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. 456

Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days has been made applicable in two phases i.e., (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. The Issue was undertaken pursuant to the processes and procedures as notified in the T+3 Circular, once Phase III becomes applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification

or notification which may be issued by SEBI.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated April 20, 2022 (the “UPI Streamlining Circulars”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹0.20 million to ₹0.50 million for UPI based ASBA in initial public offerings.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company appointed two SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders using the UPI.

- The RTA uploads the drawal numbers in their system and generates the final list of allottees as per process mentioned below:

Process for generating list of allottees: -

- Instruction is given by RTA in their Software System to reverse category wise all the application numbers in the ascending order and generate the bucket/batch as per the allotment ratio. For example, if the application number is 78654321 then system reverses it to 12345687 and if the ratio of allottees to applicants in a category is 2:7 then the system will create lots of 7. If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th Application in each of the lot of the category and these applications will be allotted the shares in that category.
- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the over subscription times.
- In categories where there is undersubscription, the Registrar will do full allotment for all valid applications.
- On the basis of the above, the RTA will work out the allottees, partial allottees and non-allottees, prepare the fund transfer letters and advice the SCSBs to debit or unblock the respective accounts.

Allotment will be made in consultation with the Stock Exchange. In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

- a) The total number of Shares to be allocated to each category as a whole shall be arrived at on proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).
- b) The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e., Total number of Shares applied for into the inverse of the over subscription ratio).

For applications where the proportionate allotment works out to less than 2,000 Equity shares the allotment will be made as follows:

- i. Each successful applicant shall be allotted 2,000 Equity shares; and

- ii. the successful applicants out of the total applicants for that category shall be determined by the draw of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- c) If the proportionate allotment to an applicant works out to a number that is not a multiple of 2,000 Equity shares, the applicant would be allotted Shares by rounding off to the nearest multiple of 2,000 Equity shares subject to a minimum allotment of 2,000 Equity shares.
- d) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 2,000 Equity shares, results in the actual allotment being higher than the shares issued, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the Issue specified under the Capital Structure mentioned in this Prospectus.
- e) The above proportionate allotment of shares in an Issue that is oversubscribed shall be subject to the reservation for small individual applicants as described below:
- As the retail individual investor category is entitled to more than fifty percent on proportionate basis, the retail individual investors shall be allocated that higher percentage.
 - The balance net Issue of shares to the public shall be made available for allotment to Individual applicants other than retail individual investors and other investors, including Corporate Bodies/ Institutions irrespective of number of shares applied for.
 - The unsubscribed portion of the net Issue to any one of the categories specified in a) or b) shall/may be made available for allocation to applicants in the other category, if so required.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.
