FORWARD LOOKING STATEMENTS

This Draft Red Herring Prospectus contains certain statements which are not statements of historical fact and may be described as “*forward-looking statements*”. These forward-looking statements include statements which can generally be identified by words or phrases such as “aim”, “anticipate”, “are likely”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “may”, “likely”, “objective”, “plan”, “propose”, “will continue”, “seek to”, “will achieve”, “will likely”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, plans, revenue and profitability (including, without limitation, any financial or operating projections or forecasts) and other matters discussed in this Draft Red Herring Prospectus that are not historical facts. However, these are not the exclusive means of identifying forward-looking statements.

These forward-looking statements are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities, investments, or the industry in which we operate, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes, changes in competition in the industry in which we operate and incidents of any natural calamities and/or acts of violence. Certain important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

1. We derive a majority of portion of our revenue from few customers related to infrastructure, steel and mining industry and loss of such customers may have an adverse impact on our business, financial condition and results of operations.
2. Our revenues are significantly dependent on a single business segment i.e. the services of Engineering, Procurement and Construction (EPC). Consequently, any downturn in sales within this segment would significantly hamper our operations and profitability.
3. While we have a diversified geographical presence, our projects have historically been concentrated in the state of Gujarat, Maharashtra and Odisha and any changes affecting the policies, laws and regulations or the political and economic environment in the region may adversely impact our business, financial condition and results of operations.
4. We typically do not have long term agreement with our customers. If our customers choose not to source their requirements from us, there may be a material adverse effect on our business, financial condition, cash flows and results of operations:
5. A significant portion of our revenues are derived from the West and South Zone and any adverse developments in this market could adversely affect our business.

Forward-looking statements reflect the current views of our Company as of the date of this Draft Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs, assumptions, current plans, estimates and expectations, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Neither our Company, our Directors, our Promoters, the Book Running Lead Manager, the Syndicate Members nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with the SEBI ICDR Regulations, our Company will ensure that investors in India are informed of material developments pertaining to our Company and the Equity Share forming part of the Issue from the date of this Draft Red Herring Prospectus until the time of the grant of listing and trading permission by the Stock Exchange.

Internal Risk Factors

- 1. We derive a majority of portion of our revenue from few customers related to infrastructure, steel and mining industry and loss of such customers may have an adverse impact on our business, financial condition and results of operations.***

Our Company provides Earthwork and foundation preparation related solutions for Infrastructure related projects and transportation services which includes transportation of excavated materials like soils, hardrock, etc to dumping sites or any other site as directed by the customer. We also provide transportation of minerals like iron ore, coal, etc from one point to another point as per the work order with the respective customer. We are currently dependent on a limited number of customers for a significant portion of our revenues. We typically do not have firm commitment in the form of long-term agreements with most of our customers and instead rely on purchase orders. Since, we are dependent on some of our customers for a substantial portion of our business, the loss of any one of such key customers or a substantial reduction in demand from such key customers could have material adverse effect on the business, financial condition and result of operations

The table below sets forth the revenue derived from our top 1, top 3 and top 5 customers for the periods indicated

(₹ in lakhs)

2. ***Our revenues are significantly dependent on a single business segment i.e. the services of Engineering, Procurement and Construction (EPC). Consequently, any downturn in sales within this segment would significantly hamper our operations and profitability.***

Our business is highly concentrated on single business segment i.e the services of Engineering, Procurement and Construction. Our Revenue from operations from EPC Segment for the period ended June 30, 2024, Fiscal 2024 and Fiscal 2023 was 70.86%, 71.10% and 77.67% respectively.

The details of the segment wise revenue break-up is as follows:

Our major dependence on a single business segment for a substantial portion of our revenue attracts various risks such as potential declines in future demand, intensified competition, the invention of superior and cost-effective technologies, etc. Any incidence of such events has the potential to substantially diminish our revenues, consequently having a material adverse impact on our operational outcomes and financial standing.

3. ***While we have a diversified geographical presence, our projects have historically been concentrated in the state of Gujarat, Maharashtra and Odisha and any changes affecting the policies, laws and regulations or the political and economic environment in the region may adversely impact our business, financial condition and results of operations.***

We started our business operations primarily in the state of Odisha and expanded our operations in the states of Maharashtra, Gujarat, Odisha, Kerala and thereafter to states of Telangana, Andhra Pradesh Chhattisgarh, Delhi etc.

Following is the state-wise revenue from operations for the period ended June 30, 2024 and year ended Fiscal 2024, Fiscal 2023 and Fiscal 2022:

Table set forth below represents our Order Book state wise:

Name of State	Work Order Amount (Rs. In Lakhs)	% of Total Order book
Maharashtra	11,434.18	42.42%
West Bengal	4,704.00	17.45%

Odisha	3,696.00	13.71%
Chhattisgarh	2,940.00	10.91%
Total	26,955.04	100.00%

While we continuously endeavour to expand our geographical presence, the concentration of our business in above-mentioned states may subject us to various risks, including but not limited to; (i) vulnerability to change of policies, laws and regulations or the political and economic environment of respective states; (ii) interruptions on account of regional instability, adverse climatic condition or force majeure, etc.; (iii) perception by our potential clients that we are a regional construction company, may hamper us from competing or securing orders; (iv) regional slowdown in construction activities in those states. While we have and we further strive to diversify across states and reduce our concentration risk, there can be no assurance that the above associated factors will not have an adverse impact on our business. If we are unable to mitigate such concentration risk, we may not be able to develop our business effectively and our business operations, financial condition and results of operation could be adversely affected.

4. We typically do not have long term agreement with our customers. If our customers choose not to source their requirements from us, there may be a material adverse effect on our business, financial condition, cash flows and results of operations:

Our Company maintains long term relationships with our customers but we generally do not enter into long term or exclusive agreements with any of our customers and the success of our business is significantly dependent on us maintaining good relationships with our customers. Most of our transactions with our

customers are typically on a purchase order basis without any commitment for a fixed volume of business. In case of any cancellation or refusal from customers at any point of time may result in monetary loss.

Due to the absence of long-term agreements with our customers, the actual sales by our Company may differ from the estimates of our management. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

5. A significant portion of our revenues are derived from the West and South Zone and any adverse developments in this market could adversely affect our business.

Set forth below is certain information on our geography-wise domestic revenue from operations for the periods indicated:

Zone	For the period ended June 30, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022

We have a significant portion of our revenue has been generated from sales in the West and South zone. For the period ended June 2024, Fiscal 2024 and 2023 the revenues generated from sales in West and South zones cumulatively represented 92.33%, 78.90%, 100% respectively. For the Fiscal 2022, the entire revenue from operations was derived from East Zone. Consequently, any adverse social, political or economic development, natural calamities, civil disruptions, regulatory changes or shifts in the policies of the state or local government within this region could negatively affect our manufacturing and distribution operations, resulting in modification of our business strategy or require substantial significant capital expenditure, thereby materially affecting our business, financial health, operational outcomes, and cash flows. Further, our sales from this region may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our services, or the outbreak of an infectious disease such as COVID-19. The occurrence of above events or our inability to effectively manage, the competition, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

6. Our Company requires significant amount of working capital for continued growth. Our inability to meet our working requirements may have an adverse effect on our results of operations.

Our company's net working capital consisted of ₹ 2,936.89 lakhs, ₹ 1,560.80 lakhs, ₹ 73.52 lakhs and ₹ (7.94) lakhs for the period ended June 30, 2024, financial year ended 2024, 2023 and 2022 respectively.

Our business requires funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 75, of this Draft Red Herring Prospectus.

7. We are dependent on limited number of suppliers and contractors for supply of key raw materials, equipments, trucks and manpower. We have not made any long term supply arrangement with our suppliers. In an eventuality where our suppliers and contractors are unable to deliver us the required resources in a time-bound manner it may have a material adverse effect on our business operations and profitability

Our Company is dependent on external suppliers and contractors for supply of raw materials, equipments, trucks and manpower, however, we have not entered into any long term supply agreement for the same. For the three months period ended June 30, 2024 and financial year ended March 31, 2024, March 31, 2023 and March 31, 2022, our purchases from top One (1), five (5) and top ten (10) suppliers are as follows:

Particulars	Top Suppliers as a percentage (%) of total purchases			
	Period ended June 30, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022
Top 1	58.29%	24.77%	18.61%	100.00%
Top 5	88.09 %	64.82 %	68.53 %	100.00%
Top 10	95.96%	74.69 %	86.46 %	100.00%

There can be no assurance that strong demand, lack to required resources or other problems experienced by our supplier will not result in occasional shortages or delays in their supply of raw materials, equipments, trucks and manpower. While we have not experienced any significant disruption or delay in supply of required raw materials and manpower which resulted in delay in our business activities, we cannot assure you that no such delay would occur in future. If we experience a significant or prolonged shortage of resources from any of our supplier and we cannot arrangement the required resources from other sources, we would be unable to meet our construction schedules in a timely manner, which would adversely affect our revenue, margins and

clients relations. In the absence of such supply agreements, we cannot assure that a particular supplier will continue to supply raw materials and manpower to us in the future.

While we may find additional suppliers to supply these raw materials, any failure of our suppliers to deliver these raw materials in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose clients which could have a material adverse effect on our business, financial condition and results of operations. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

8. *Our Company had negative cash flows during certain fiscal years in relation to our operating, investing and financing activities. Sustained negative cash flows in the future would adversely affect our results of operations and financial condition.*

We have in the three preceding fiscal years and for the period ended June 30, 2024, and may in future, experience negative cash flows from Operating, investing and financing activities. The following table summarizes our cash flows data for the periods indicated

Particulars	June 30, 2024	Fiscal 2024	Fiscal 2023	Fiscal 2022
Cash flow from Operating Activities	(614.44)	(349.29)	(34.68)	56.41
Cash flow from Investing Activities	(0.94)	(45.67)	-	-
Cash flow from Financing Activities	933.92	431.87	34.66	(132.37)

We cannot assure you that our net cash flows will be positive in the future. Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, prospects, results of operations and financial condition may be materially and adversely affected. For further details, see “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 160 and 193, respectively

9. *We do not own the premises where our Registered Office, Corporate Office and branch Offices located.*

We do not own our registered office. The registered office is owned by the Promoter i.e Liladhar Mundhra and Company has been using the same. Additionally, we have also taken our corporate office and branch offices located at various locations on lease, and we cannot assure you that the lease arrangement for registered office, Corporate office and branch offices would not be terminated. Any such termination could result in vacation of such offices, and we might be forced to arrange for alternative arrangements at less favourable terms to us. If we are required to relocate our business operations, we may suffer a disruption in our operations.

Additionally, our Company also set-up site offices on temporary basis at project sites for project management, storage of raw materials, labour quarters and placement of equipment as required for the effective execution of work. We cannot assure that we would be able to set-up such temporary site offices without incurring substantial cost. For details in relation to our premises, see “Our Business -Properties” on page 103 of this Draft Red Herring Prospectus

10. *Our logo  is not registered with the trademark registration authority, and we may be unable to protect our logo from being infringed by others which may adversely affect our business value, financial condition, and results of operations.*

As on the date of this Draft Red Herring Prospectus, we have not yet obtained registration from the Trademark Registration Authority for our logo  and hence we do not enjoy the statutory protection accorded to a registered trademark. Although, we have made application for the registration of our logo which allow us to be used but not get registered till the date of this Draft Red Herring prospectus. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition, and results of operations.

11. *Our Logistics business is dependent on the road network and our ability to utilize the vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect and lead to a loss of reputation and /or profitability.*

Our logistics business includes transportation of soil, sands, minerals like iron ore, coal, etc. from one place to another place and are dependent on the road network. There are various factors which road transport such as political unrest, bad weather conditions, natural calamities, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers, accidents or mishaps and third-party negligence. Even though we undertake various measures, but any adverse impact or disruptions in these measures including interruptions in facilities, would negatively impact our profitability and could damage our reputation within logistics industry.

12. *Our business is subject to seasonal variation, and we may not able to accurately forecast our project schedule which could have an adverse effect on our cash flows, business, results of operations and financial condition.*

Our construction work is subject to seasonal variations. changes. For instance, we typically experience slower work progress in monsoon compared to the rest of the year. Additionally, during the festival season, there is usually a slowdown and a shortage of contract labourers. Due of these factors, comparison of our revenue and results from different periods may not always provide an accurate picture of our performance. We factor in these seasonal changes when planning our work and cash flow. However, we cannot guarantee that we will always be able to predict our project timelines perfectly. If our forecasts are significantly off, it could cause delays or stoppages in completing projects, which could negatively impact our business, financial results, and future prospects

13. *We require several approvals, licenses, registrations and permits for our business and are required to comply with certain rules, regulations and conditions to operate our business and failure to obtain, retain or renew such approvals and licences in a timely manner or to comply with the requisite rules, regulations and conditions may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of “Savy Infra and Logistics Limited” from “Savy Infra and Logistics Private Limited”. Also, we are yet to receive and renew several approvals and licenses. The Issuer Company is in the process of obtaining the same. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Some of

our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled “Government and Other Key Approvals” at page 210 of this Draft Red Herring Prospectus.

15. Our operations are subject to environmental and health and safety laws and other government regulations which could result in increased liabilities and increased capital expenditures.

Our operations are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. Our operations may generate significant amounts of pollutants and waste, some of which may be hazardous. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. Noncompliance with these laws and regulations, which among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations, could expose us to civil penalties, criminal sanctions and revocation of key business licenses. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations, financial condition, or cash flows. In addition, we could incur substantial costs, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. The amount and timing of costs under environmental laws are difficult to predict.

16. There have been some instances of incorrect filings with the Registrar of Companies and other non-compliances under the Companies Act in the past which may attract penalties

Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

Prior to the issue, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the issue. Listing and quotation do not guarantee that a market for the equity shares will develop. The issue price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

32. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

35. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Issue Period and withdraw their Bids until Bid/ Issue Closing Date. While our Company is required to complete Allotment pursuant to the Issue within six working days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political, or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

36. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence.

There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

37. Any future issuance of Equity Shares may dilute the shareholding of the Investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoter or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled "*Capital Structure*" beginning on page 60 of this Draft Red Herring Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

External Risk Factors

38. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our company is subject to various regulations and policies outlined in the section titled "*Key Industry Regulations and Policies in India*" starting on page 123 of this Draft Prospectus. Changes in these regulations and policies, including the introduction of new laws or amendments to existing ones, as well as shifts in their interpretation or enforcement, could significantly impact our business and prospects.

There is no guarantee that our company will successfully obtain all necessary regulatory approvals for our operations in the future, nor can we assure that compliance issues will not arise. Such challenges could potentially have a material adverse effect on our business, financial condition, and operational results.

39. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

40. A slowdown in economic growth in India could cause our business to suffer.

Our performance and the growth of our business are necessarily dependent on the health of the overall economy of India. Any slowdown or perceived slowdown in these economies or future volatility in global commodity prices could adversely affect our business. Additionally, an increase in trade deficit, a downgrading in the sovereign debt rating or a decline in the foreign exchange reserves of these countries could negatively affect interest rates and liquidity, which could adversely affect these economies and our business. Global situations such as outbreak of the COVID-19 pandemic, full scale military invasion of Ukraine by Russia have caused a global economic downturn including in India and these countries. Any downturn in the macroeconomic environment in India or any country(ies) where we have our business presence, could also adversely affect our business, financial condition, results of operations and prospects.

The economy of India and the countries where the Company has its business presence, could be adversely affected by a general rise in interest rates or inflation, civil unrest, adverse weather conditions affecting agriculture, commodity, and energy prices as well as various other factors. A slowdown in the economy of any of these countries could adversely affect the policy of their respective governments towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy.

The economy of India and various other countries where the Company has its business presence is also influenced by economic and market conditions in other countries, particularly emerging market conditions in Asia. A decline in the foreign exchange reserves and exchange rate fluctuations may also affect liquidity and interest rates in these economies, which could adversely impact our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect these economies, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Further, other factors which may adversely affect the global economy are scarcity of credit or other financing facilities, resulting in an adverse impact on economic conditions in India and the countries where the Company has its business presence, resulting in scarcity of financing of our Proposed Projects; volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in the tax, trade, fiscal or monetary policies of India or any other country where the Company has its business presence, like application of GST and/or VAT, as applicable; political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries; occurrence of natural or manmade disasters; infectious disease outbreaks or other serious public health concerns; prevailing regional or global economic conditions, and other significant regulatory or economic developments in or affecting the financial services sectors of India and/or any country where the Company has its business presence.

41. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe, and certain emerging economies in Asia. Financial turmoil in Asia, Europe and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. For example, the full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries has substantially affected the economic stability of the world and such volatility could impact our Company's growth. In addition, the market price of oil has risen sharply since the commencement of hostilities in

Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

In addition, the USA is one of India's major trading partners and any possible slowdown in the American economy could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had, and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

42. Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

43. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

44. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

45. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 280 of Draft Red Herring Prospectus.

46. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced

47. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of Equity Shares at a premium to the market price or would otherwise be beneficial to the shareholders. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

48. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The fund requirements, deployment of funds, and intended use of the Net Proceeds as described in this Draft Red Herring Prospectus are based on our current business plan, management estimates, market conditions, and other external commercial and technical factors. However, these fund requirements and deployment plans have not been appraised by any bank, financial institution, or independent agency. For further details, see “Risk Factors - Risk Factor 23- Our Company’s management will have flexibility in utilizing the net proceeds from the issue and the deployment of the net proceeds from the issue is not subject to any monitoring by any independent agency on page 27. We may need to revise our funding requirements and deployment due to various factors such as our financial and market conditions, business and growth strategies, ability to identify and implement inorganic growth initiatives (including investments and acquisitions), competitive landscape, general factors affecting our results of operations, financial condition, access to capital, and other external factors such as changes in the business environment, regulatory climate, and interest or exchange rate fluctuations. These factors, which may not be within our management’s control, might necessitate rescheduling the proposed utilization of the Net Proceeds and changing the allocation of funds from its planned allocation, subject to compliance with applicable laws.

Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue. To the extent our Company is unable to utilize any portion of the Net Proceeds towards the aforementioned objects, per the estimated scheduled of deployment specified above, our Company shall deploy the Net Proceeds in subsequent financial year towards the aforementioned Objects.

Moreover, if the actual utilization towards any of the Objects is lower than the proposed deployment such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the aggregate of the gross proceeds of the Issue, in accordance with Regulation 230(2) of the SEBI ICDR Regulations. In case of a shortfall in raising requisite capital from the Net Proceeds or an increase in the total estimated cost of the Objects, business considerations may require us to explore a range of options including utilizing our internal accruals and seeking debt lenders. In furtherance, that such alternate arrangements would be available to fund any such shortfalls.

Details of the Objects of the Issue

1. Funding Working Capital Requirements of the Company

We are an EPC company focused on earthwork and foundation preparation for infrastructure projects such as road construction, embankments, sub-grade preparation, granular sub-bases, and bituminous or concrete surfaces. Our services include hard rock and soil excavation, blasting, debris transportation, and managing the logistics of moving soil and sand from project sites to dumping grounds. We provide engineering solutions to clients across infrastructure, steel and mining sectors. We specialize in excavation, grading, utility work, and paving. We rent advanced machinery, including rock breakers, heavy excavators, and cutting-edge blasting technology for executing our projects.

Additionally, we provide solutions for transportation and distribution needs. We provide Full Truck Load (FTL) services for transporting large freight volumes efficiently and reliably. Our point-to-point delivery ensures goods are moved directly without stops, minimizing handling and reducing the risk of damage. This ensures timely and tailored transportation solutions.

We operate an asset light business model where we offer specialized services by renting trucks and

drivers on a need basis and managing the execution of transportation. This approach allows us to avoid the challenges of owning trucks, manpower issues, theft, accidents, and maintenance. By focusing on execution, we minimize costs related to interest, depreciation, and asset ownership, which helps improve our profit margins.

Our clients are some of India's renowned infrastructure, steel and mining companies. Once we secure an EPC project, it typically takes us around four months to complete the project. However, the project lifecycle presents unique challenges to our working capital requirements. We incur significant upfront investments in terms of mobilizing equipment and manpower. This, coupled with continuous cash outflows for material procurement, labour costs, and subcontractor payments, strains our working capital requirement, especially considering the time lag between incurring expenses and receiving payments from clients. As our order book for EPC projects expands, the need for these upfront investments increases proportionally, directly translating to a higher working capital requirement to sustain our operations and deliver projects efficiently. As of this Draft Red Herring Prospectus, we have confirmed order book amounting to ₹ 26,955 lakhs.

To support our growth plans and enhance our capabilities, we require an increase in working capital. This will allow us to strengthen ties with current clients and strategically expand within key industries. We will be well-positioned to capitalize on growth trends in our sectors.

Key justifications for holding levels

Particulars	Justification
Inventories	<p>The increase in inventory days from 6 days in FY 2022 to 23 days in FY 2023 was as a result of increase in business operations. Further increase to 27 days in FY 2024 aligns with our expansion into specialized services like excavation, civil, and EPC works for sectors such as infrastructure, steel and mining. These activities require the timely availability of materials such as equipment, construction supplies, and replacement parts, necessitating higher inventory levels to prevent project delays.</p> <p>The inventory days further increased to 32 days for the period ended June 30, 2024, because of increased scale of business operations. We estimate inventory levels of 32 days in FY 2026 and 36 days in FY 2027 and same are based on anticipated project volume growth.</p>
Trade Receivables	<p>The increase in trade receivables days from 72 days in FY 2022 to 125 days in FY 2023 was as a result of increase in business operations. The decrease in trade receivables days to 36 in FY 2024 is primarily due to expansion into specialized services like excavation, civil, and EPC works for sectors such as infrastructure, steel and mining. The holding levels for trade receivables reflect our company's diverse operations in EPC and Logistics particularly within the infrastructure, steel and mining sectors.</p>

Particulars	Justification
	The trade receivables days further increased to 39 days for the period ended June 30, 2024. The trade receivables days is estimated at levels of 41 days for FY 2026 and 44 days for FY 2027.
Trade Payables	The increase in trade payables days from 79 days in FY 2022 to 128 days in FY 2023 was as a result of increase in business operations. The reduction in trade payables days to 25 in Fiscal 2024 indicates improved efficiency in managing supplier relationships and cash flow. As the company specialize in services for the infrastructure, steel and mining sectors, timely payments to suppliers enhance operational reliability and facilitate project execution. The trade payables days increased to 33 days for the period ended June 30, 2024. We estimate trade payables days to be 37 days in 2026 and 2027. Maintaining a trade payable holding period of 37 days allows us to optimize working capital while ensuring adequate liquidity to meet ongoing operational demands and client commitments.

It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in the Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

Further, provisions of Minimum Alternate Tax ('MAT') under section 115JB of the IT Act shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed.

The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

GLOBAL OUTLOOK

Global growth broadly unchanged amid persistent services inflation:

Global growth is projected to be in line with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varied momentum in activity at the turn of the year has somewhat narrowed the output divergence across economies as cyclical factors wane and activity becomes better aligned with its potential. Services price inflation is holding up progress on disinflation, which is complicating monetary policy normalization. Upside risks to inflation have thus increased, raising the prospect of higher-for-even-longer interest rates, in the context of escalating trade tensions and increased policy uncertainty. To manage these risks and preserve growth, the policy mix should be sequenced carefully to achieve price stability and replenish diminished buffers.

Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. Relative to the April 2024 WEO, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and the United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year’s rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane and activity becomes better aligned with its potential.

Meanwhile, the momentum on global disinflation is slowing, signaling bumps along the path. This reflects different sectoral dynamics: the persistence of higher-than-average inflation in services prices, tempered to some extent by stronger disinflation in the prices of goods. Nominal wage growth remains brisk, above price inflation in some countries, partly reflecting the outcome of wage negotiations earlier this year and short-term inflation expectations that remain above target. The uptick in sequential inflation in the United States during the first quarter has delayed policy normalization. This has put other advanced economies, such as the euro area and Canada, where underlying inflation is cooling more in line with expectations, ahead of the United States in the easing cycle. At the same time, a number of central banks in emerging market economies remain cautious in regard to cutting rates owing to external

risks triggered by changes in interest rate differentials and associated depreciation of those economies' currencies against the dollar.

***For India, data and forecasts are presented on a fiscal year basis, with FY 2023/2024 (starting in April 2023) shown in the 2023 column. India's growth projections are 7.3 percent in 2024 and 6.5 percent in 2025 based on calendar year.*

Inflation Outlook: Global inflation will continue to decline:

In advanced economies, the revised forecast is for the pace of disinflation to slow in 2024 and 2025. That is because inflation in prices for services is now expected to be more persistent and commodity prices higher. However, the gradual cooling of labor markets, together with an expected decline in energy prices, should bring headline inflation back to target by the end of 2025. Inflation is expected to remain higher in emerging market and developing economies (and to drop more slowly) than in advanced economies. However, partly thanks to falling energy prices, inflation is already close to pre-pandemic levels for the median emerging market and developing economy.

Future-Proofing the Economy: -

As output gaps start to close and inflation recedes, policymakers face two tasks: persevering with restoring price stability and addressing the legacies of recent crises, including replenishing lost buffers and durably uplifting growth. In the near term, this will require careful calibration and sequencing of the policy mix. In countries where upside risks to inflation—including those arising through external channels—have materialized, central banks should refrain from easing too early and remain open to further tightening should it become necessary. Where inflation data encouragingly signal a durable return

to price stability, monetary policy easing should proceed gradually, which would simultaneously provide room for the required fiscal consolidation to take place. Fiscal slippages over the past year in some countries could require a stance significantly tighter than envisaged. As the space for fiscal maneuver narrows, commitments to achieving fiscal consolidation targets should be earnestly adhered to, aided by sound fiscal frameworks and resource mobilization

In emerging markets and developing economies, recent policy divergences highlight the need to manage the risks of currency and capital flow volatility. Given that economic fundamentals remain the main factor in dollar appreciation, the appropriate response is to allow the exchange rate to adjust, while using monetary policy to keep inflation close to target. Foreign reserves should be used prudently and preserved to deal with potentially worse outflows in the future, in line with the IMF's Integrated Policy Framework. To the extent possible, macroprudential policies should mitigate vulnerabilities from large exposures to foreign-currency-denominated debt.

INDIAN OUTLOOK

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023-24 is estimated to be Rs. 71.66 trillion (US\$ 861.2 billion), as against Rs. 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023-24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size:

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 8.2% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. India's current account deficit (CAD) narrowed to 0.7% of GDP in FY24. The CAD stood at US\$ 23.2 billion for the 2023-24 compared to US\$ 67.0 billion or 2.0% of GDP in the preceding year. This was largely due to decrease in merchandise trade deficit.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments:

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of July 5, 2024, India's foreign exchange reserves stood at US\$ 657.15 billion.
- Merchandise exports in June 2024 stood at US\$ 35.20 billion, with total merchandise exports of US\$ 109.96 billion during the period of April 2024 to June 2024.
- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested Rs. 261,856 crore (US\$ 31.5 billion) in India during April-December (2023-24).

Government Initiatives:

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- In order to enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.

- Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of the average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.
- National Bank for Financing Infrastructure and Development (NaBFID) is a bank that will provide non-recourse infrastructure financing and is expected to support projects from the first quarter of FY23; it is expected to raise Rs. 4 trillion (US\$ 53.58 billion) in the next three years.
- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead:

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record Rs.11.11 lakh crore (US\$ 133.5 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INFRASTRUCTURE SECTOR IN INDIA

Introduction

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government’s focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to the nation’s manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India’s overall development and enjoys intense focus from the Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India’s economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

Market Size

In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs. 11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP. As per the Interim Budget 2023-24, a capital outlay of Rs. 2.55 lakh crore (US\$ 30.72 billion) has been made for the Railways, an increase of 5.8% over the previous year.

Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.

India’s logistics market is estimated to be US\$ 317.26 billion in 2024 and is expected to reach US\$ 484.43 billion by 2029, growing at a CAGR of 8.8%.

India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years.

Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India’s planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Government Initiatives and Investments:

Some of the major recent developments are

- The Central government has increased its capital expenditure (capex) allocation to US\$ 133.9 billion (Rs. 11.11 trillion) for the fiscal year beginning April 1, 2024, with a focus on advancing India's infrastructure, as part of a strategic move to stimulate economic growth. An increase of

11.1% from the previous year, the FY25 interim budget allots US\$ 133.9 billion (Rs. 11.11 trillion) for capital expenditures, or 3.4% of GDP.

- India's ambitious plan calls for spending US\$ 1.723 trillion (approximately Rs. 143 trillion) on infrastructure between FY24 and FY30, with a particular emphasis on power, roads, and developing industries like renewable energy and electric vehicles.
- In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs.11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP.
- FDI in construction development (townships, housing, built-up infrastructure and construction development projects) and construction (infrastructure) activity sectors stood at US\$ 26.61 billion and US\$ 33.91 billion, respectively, between April 2000-March 2024.
- In January 2024, the overall index of eight core industries stood at 164.5* driven by the production of coal, refinery products, fertilizers, steel, electricity, and cement industries.

Road Ahead

- With a 37% increase in the current fiscal year, capital expenditures (capex) are on the rise, which bolsters ongoing infrastructure development and fits with 2027 goals for India's economic growth to become a US\$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.
- Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.
- The infrastructure sector has become the biggest focus area for the Government of India. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.
- India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

MINING SECTOR IN INDIA

India's overall coal production saw a quantum jump to 893 .08 MT in FY23 as compared to 728 .72 MT in FY19 with a growth of about 22.6%. In May 2024, India's coal production reached 83.91 million tonnes (MT) (Provisional), exhibiting a growth rate of 10.15% compared to the corresponding period of the previous year, which stood at 76.18 MT.

As of FY22, the number of reporting mines in India were estimated at 1,319, of which reporting mines for metallic minerals were estimated at 545 and non-metallic minerals at 774.

As per data from the Ministry of Statistics and Programme Implementation (MOSPI), India's mining GDP increased from Rs. 76,877 crore (US\$ 9.25 billion) in the third quarter of FY23 to Rs. 82,680 crore (US\$ 9.95 billion) in the third quarter of FY24.

There is a significant scope for new mining capacities in iron ore, bauxite and coal and considerable opportunities for future discoveries of sub-surface deposits. Infrastructure projects continue to provide lucrative business opportunities for steel, zinc, and aluminium producers. Iron and steel make up a core component for the real estate sector. Demand for these metals is set to continue given strong growth expectations for the residential and commercial building industry.

The Government of India has also helped in the development of the metals and mining sector in India by launching key policy initiatives. The National Mineral Policy, which was approved by the government in February 2019, has ensured improved regulation and enforcement, more transparency, balanced social and economic growth, and sustainable mining techniques. The policy grants industry status to the mining activities and boost private sector funding.

Additionally, it aims to facilitate the merger and acquisition of mining companies, entice private sector involvement in exploration, and permit the transfer of mineral corridors created specifically for metals and mining leases.

In the future, both increased domestic demand and exports are projected to play significant roles in driving the industry's expansion and its contribution to GDP growth in a post-covid environment.

OUR SERVICES

Our Services are broadly classified in 2 categories:

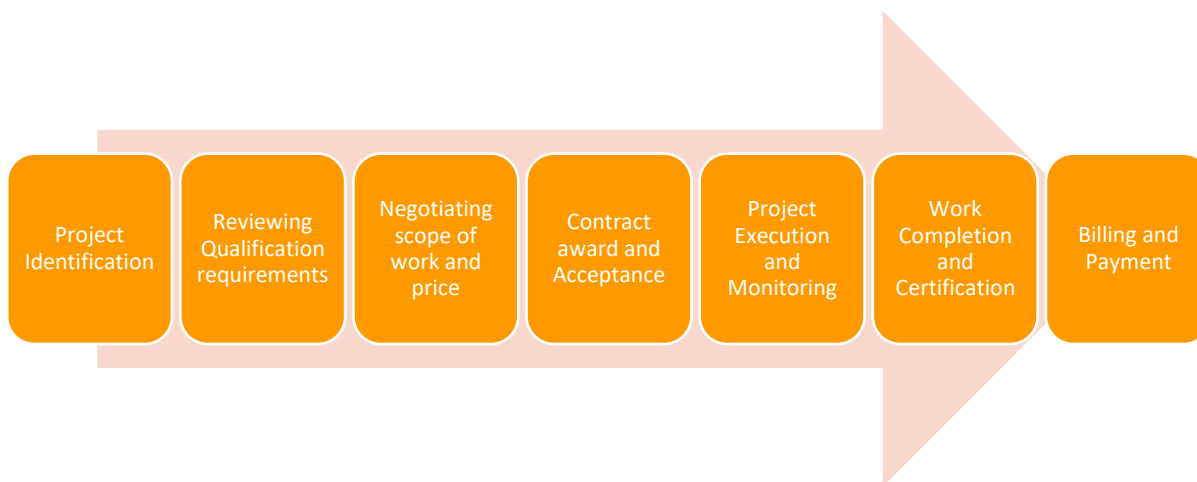

EPC (Engineering, Procurement and Construction)

We offer a wide range of construction and infrastructure services designed to meet diverse project needs. Our earthwork services involve moving and shaping large volumes of soil and other materials, creating a strong and reliable base for buildings, roads, or other infrastructure. Additionally, our services also cover demolition, where we safely and efficiently dismantle existing structures to clear space for new projects.

We handle repair work, restoring damaged areas to their original or improved condition, and manage debris removal to maintain clean and safe worksites. In the field of road construction, we build and maintain various road components, such as culverts and cross drains, which help manage water flow beneath roadways. We construct road embankments to elevate roads above surrounding terrain, prepare subgrade tops to form the foundation for road layers, and install granular sub-bases. Finally, we complete the site preparation and foundation work using durable materials, ensuring a solid, long-lasting base for the construction of safe and reliable infrastructure

Our company has demonstrated its capabilities through the successful completion of 34 construction projects in the last few years. These projects, which included embankment construction, subgrade preparation, shoulder filling, extensive earthworks, and excavation, totalled Rs. 22,018 lakhs. We have worked on infrastructure development at various scales, focusing on precision and efficiency and showcasing our continued commitment to delivering high-quality construction solutions.

Detailed process of operations regarding EPC and Excavation projects:

We look for opportunities in areas like infrastructure and construction, focusing on companies that fit our objectives. First, we do a survey to check if the project is feasible, considering technical and logistical details. This initial review helps us see how our skills and resources can be best used. At this point, we also talk with potential clients to gather key information needed for the next steps in project planning.

Reviewing Qualification Requirements

Clients share detailed qualification requirements, which may include technical standards, compliance obligations, and resource expectations. We analyze these in collaboration with their project management teams to accurately identify the manpower, specialized equipment, and technical skills necessary to meet the project's demands. This assessment ensures that we can deliver quality work and minimizes potential risks or resource gaps during project execution.

Negotiating Scope of Work and Pricing

With a clear understanding of the project's needs and our fulfilment of the qualification criteria, we prepare a comprehensive offer. This proposal outlines our pricing, commercial terms, and a detailed plan for the EPC-related tasks. We then engage in negotiations with the client to finalize the scope of work, agree on timelines for deliverables, and finalize the financial aspects. These discussions are aimed at aligning our services with the client's expectations while establishing mutually beneficial terms.

Contract Award and Acceptance

Once negotiations are successfully concluded, a formal work order or contract is awarded by the client. This agreement specifies the exact scope of services, the delivery schedule, and the pricing structure. We review and accept these terms, ensuring all aspects are clear and documented. Our team then mobilizes resources to commence work, with a focus on delivering the project as per the agreed standards and timeline.

Project Execution and Monitoring

We mobilize the required manpower and procure necessary equipment as outlined in our project plan, ensuring we are fully prepared for smooth execution. We create a thorough project plan that focuses on efficiency and staying on schedule. While carrying out the project, we closely monitor progress, watch

for any issues, and make changes as needed to stay on track. Our hands-on approach ensures quality results and minimizes disruptions

Work Completion and Certification

Upon completing the project, a detailed review is conducted to confirm that all work has met the specified requirements. We then coordinate with the client to secure a work completion certificate from their authorized representative. This certificate serves as formal acknowledgment of satisfactory project delivery and is essential for closing the project. Additionally, we review the project to gather insights for future improvements.

Billing and Payment

Once we receive the work completion certificate, we prepare and send an invoice for any remaining payments. We make sure all charges match the agreed terms. We stay in touch with the client to support timely payment. Payments are collected according to the contract, marking the project's financial completion.

Logistics

As part of our logistics segment, we offer Full Truck Load (FTL) services to clients in the mining, construction, and infrastructure sectors. Our FTL services involve the efficient and reliable movement of large volumes of freight from one location to another, tailored to meet the unique needs of each client. We ensure point-to-point delivery, meaning that the freight is transported directly from the client's designated starting location to the final destination without intermediate stops or transfers. This minimizes handling, reduces the risk of damage, and ensures timely delivery.

Our business operates on an asset-light model, meaning we do not own the trucks used for transportation. Instead, we partner with a network of small-scale truck owners, each typically managing a fleet of 2-5 trucks. By renting these trucks on need basis, we maintain a high level of operational flexibility. This approach allows us to quickly scale our capacity up or down depending on the demands of different projects, making our services adaptable and responsive. Additionally, the asset-light model helps us manage costs efficiently, as we avoid the substantial investment required to purchase and maintain a fleet of trucks. By avoiding the high costs of purchasing and maintaining a fleet, we can keep our operations efficient and cost-effective. Finally, we coordinate with our truck suppliers to make sure the vehicles are ready and properly maintained, and we monitor each transport closely to ensure timely and secure delivery. We manage a fleet of diesel trucks which are deployed at mines and excavation sites to support our clients' operations.

Key Business Process

Project Identification

We identify opportunities to support mining companies with their transportation needs. Our process begins with an initial survey to understand the scope of their mining operations. We then assess whether taking on the project is practical and a good fit for our capabilities, ensuring we can deliver efficient and reliable service.

Negotiating Price and other terms

Once we determine that the project is a good fit for our capabilities, we engage with the client to understand their specific requirements. We discuss details such as the volume of freight to be transported on a monthly or annual basis and negotiate pricing. If their needs align well with our criteria and resources, we move forward with planning and finalizing the agreement.

Contract Award and Acceptance

Once negotiations are successfully completed, the client issues a formal work order or contract. This agreement outlines the scope of transportation services, the delivery timeline, and the pricing terms. We carefully review and accept these conditions, making sure everything is clearly documented. Our team then mobilizes the necessary resources to get started, ensuring we meet the agreed standards and schedule.

Planning and Scheduling

We then develop a detailed plan for transporting the goods. This includes choosing the best routes, scheduling pick-ups and drop-offs, and organizing the logistics to ensure efficient and timely delivery. We also consider factors like traffic, weather conditions, and any unique requirements or restrictions.

Assigning Resources

Next, we allocate the necessary resources, such as vehicles, drivers, equipment, and staff, to complete the transportation efficiently. We aim to use resources in a way that maximizes efficiency while keeping costs low.

Executing Routes

Once routes are planned and resources are assigned, we execute the transportation. This step involves loading goods onto vehicles, following the designated routes, and delivering goods to their destinations as scheduled.

Loading and Unloading

Loading and unloading are crucial stages. We handle the goods carefully to make sure they are safely loaded onto vehicles and unloaded at the destination. This includes securing the goods to avoid shrinkage during transport and working efficiently to minimize delays.

Billing and Invoicing

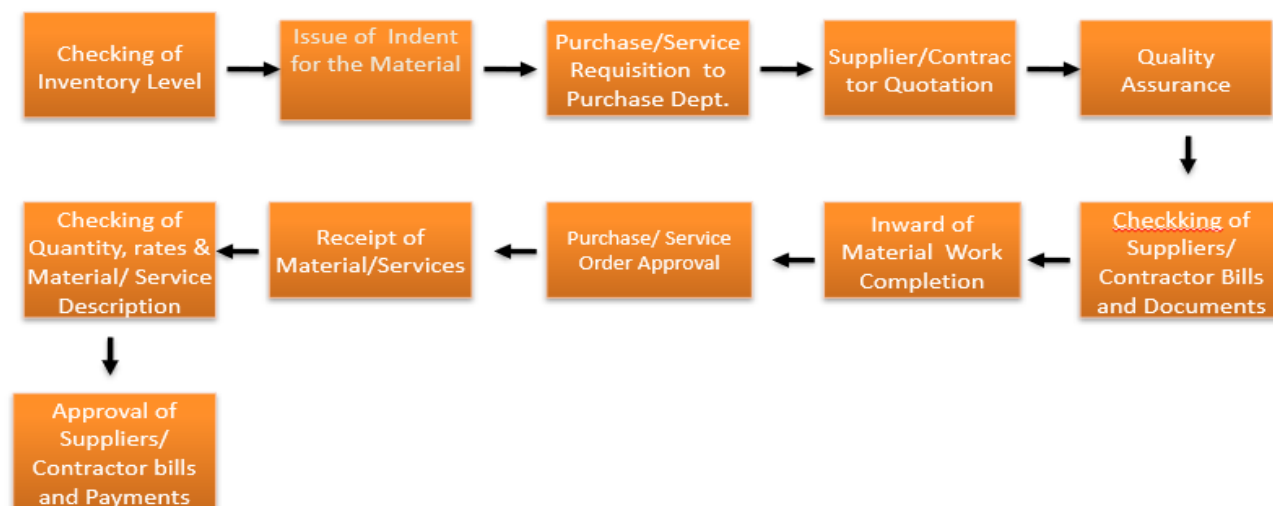

Finally, we handle billing and invoicing to ensure we get paid accurately and on time. This step involves preparing invoices based on the agreed rates, documenting the services provided, and resolving any issues that may come up.

OUR COMPETITIVE STRENGTHS

We believe that the following competitive strengths have contributed to our business growth and will continue to drive our success.

1. Asset Light Business Model

We strategically outsource our trucking, machinery and equipment needs to third party contractors, ensuring our focus on execution of projects and not having our significant capital blocked in assets which ensures operational flexibility to adapt to different needs of variety of customers. We also leverage this arrangement to reduce risks attached to breakdown, theft to affect our operational efficiency and focus on timely execution of our projects.

EPC: Our strategy focuses reducing operational costs by not owning heavy machinery. This asset-light approach gives us the flexibility to execute projects in different locations without the high costs of moving or storing equipment. By relying on rented machinery, we can easily scale up or adjust

depending on project requirements. If any machinery breaks down, we can quickly replace it by renting, ensuring that our projects stay on track and avoid delays. This approach allows us to manage risks effectively while maintaining high efficiency in project execution.

Logistics: In logistics, we do not own trucks but instead rent trucks from a network of small fleet owners who typically operate 2 to 5 trucks. This network provides us with flexibility and reliability, as we can rely on wide range of local transporters to meet our needs. By building strong relationships with these small-scale operators, we ensure smooth operations and reduce the risk of delays caused by vehicle breakdowns. If any truck encounters any issues, we quickly arrange for a replacement from other truck operators, minimizing disruptions and ensuring continuity of our services. This enables us to maintain operational efficiency.

2. Integrated Business Operations

Our company provides comprehensive earthwork and logistics solutions as part of our integrated EPC services. We manage the entire process, starting with ground excavation and the removal of soils, fines, and hard rocks. Depending on project requirements and client directions, suitable excavated material is utilized for foundation preparation, ensuring adherence to quality standards. If the material does not meet specifications, we handle its transportation to streamlines operations, combining earthwork and material logistics into a single, efficient process that supports smooth project execution and compliance with necessary standards.

3. Strong Financial Performance

BUSINESS OVERVIEW

We are an Engineering, Procurement and Construction (EPC) company focused on earthwork and foundation preparation for infrastructure projects such as road construction, embankments, sub-grade preparation, granular sub-bases, and bituminous or concrete surfaces. Over the years, we have gradually expanded from supplying quartzite for infrastructure projects to providing a range of services, including excavation, grading, utility work, and paving. Initially focused on earthwork and foundation activities, we have also extended our expertise to managing the logistics of excavated materials, ensuring their efficient transportation and disposal. Our approach has evolved to offer integrated solutions across the infrastructure, steel and mining sectors, maintaining a focus on providing reliable and efficient civil engineering services that meet the needs of our clients.

Our Company "Savy Infra and Logistics Limited "(SIAL)" was originally incorporated as "Shubhangi Metals Private Limited" on January 16, 2006 as a Private Limited company under the provision of Companies Act 1956 pursuant to certificate of Incorporation issued by Registrar of Companies, Ahmedabad. The name of our company changed to "Savy Infra and Logistics Private Limited", via fresh certificate of incorporation dated December 21, 2023. Later on, our company get converted into public limited company "Savy Infra and Logistics Limited" and a Fresh Certificate of Incorporation dated September 03, 2024, was issued by the Registrar of Companies. The corporate identification number of our Company is U52290GJ2006PLC047516 The Initial subscribers to memorandum of association were Mr. Rakesh Kothari and Ramkanyaben Giriraj Kothari. Our EPC projects include earthwork services which involves moving and shaping large volumes of soil and other materials, creating a strong and reliable base for buildings, roads, or other infrastructure. Additionally, our services also cover demolition, where we safely and efficiently dismantle existing structures to clear space for new projects. We rent advanced machinery, including rock breakers, heavy excavators, and cutting-edge blasting technology. We utilize

mechanical excavators for efficient excavation and manage all related processes, such as shoring, strutting, side protection to prevent collapses, and slush removal. We also handle the carting away and disposal of excavated materials.

As part of our logistics segment, we offer Full Truck Load (FTL) services to clients in the infrastructure, steel and mining sectors. Our FTL services involve the efficient and reliable movement of large volumes of freight from one location to another, tailored to meet the unique needs of each client. We ensure point-to-point delivery, meaning that the freight is transported directly from the client's designated starting location to the final destination without intermediate stops or transfers. This minimizes handling, reduces the risk of damage, and ensures timely delivery.

Phased implementation of UPI for Bids by RIBs as per the UPI Circulars

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, *inter alia*, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019, and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. 456

Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: Pursuant to SEBI circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, Phase III has been notified, and accordingly the revised timeline of T+3 days has been made applicable in two phases i.e., (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular, once Phase III becomes applicable, subject to any circulars,

clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated April 20, 2022 (the “UPI Streamlining Circulars”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 NPCI vide circular reference no. NPCI/UPI/OC No. 127/ 2021-22 dated December 09, 2021, inter alia, has enhanced the per transaction limit in UPI from more than ₹0.20 million to ₹0.50 million for UPI based ASBA in initial public offerings.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 has prescribed the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT (formerly Department of Industrial Policy & Promotion) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the "FDI Circular"), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.
