Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

- Some events may have material impact qualitatively & quantitatively;
- Some events may not be material individually but may be found material collectively; and
- Some events may not be material at present but may be having material impact in future.

Internal Risk Factors

- 1. Any interruptions at our flagship diagnostic centres may affect our ability to process diagnostic tests, which in turn may adversely affect our business, results of operations and financial condition.*

Our flagship centre in Jankipuram, Lucknow, serves as the primary hub for our operations, conducting the majority of tests offered by our diagnostic network. In addition to walk-in patients, our flagship centre also receives test requests and related specimens from certain other diagnostic centres in our network.

The Lucknow Bench of the Allahabad High Court ordered the referral of a dispute concerning a 7,576 square feet land lease, originally from January 16, 2007, to January 15, 2022, to arbitration. The parties to the arbitration award were our company as the applicant, the licensee (the “**Applicant**”) and Biotech Park, Lucknow, (the “**Respondent**”) the Grantor. The conflict arose over a renewal lease agreement (“**Lease**

Agreement”) after the contract expired, particularly due to a significant increase in the new circle rate and a legal termination notice from the grantor, despite no breach of the original lease deed.

Vide an award dated May 30, 2024 and the corrected arbitration award dated July 20, 2024 (the “**Arbitration award**”) pertaining to registered office over the conflict that arose for renewal of the lease agreement after the contract expired, particularly due to a significant increase in the new circle rate and a legal termination notice from the grantor, despite no breach of the original lease deed, the arbitrator directed the appointment of a valuer to assess the permanent structure within three months, with payment to be made within six months, and stipulated a nominal rent of ₹ 5 per square feet for the tenant, for one year and permitted the Company to continue with the possession of the permanent infrastructure to carry on the Business subject to improvised payment of rent. Furthermore, the sole arbitrator in the said matter had extended the period of the license for a minimum period of 5 years. After passing of this order neither party have filed a case against each other, so the matter stands to be disposed off. The conclusion highlights the importance of mutual agreement on valuation to secure a beneficial long-term lease, while noting the risks involved in potential relocation. Pursuant to the Arbitration Award, an application has been filed by the Respondent under section 34 of the Arbitration and Conciliation Act, 1996 read with section 10 (3) of the Commercial Courts Act, 2015 before the Commercial Court at Lucknow dated November 20, 2024 (“**Application**”), along with an application under section 34 (3) for of the Arbitration and Conciliation Act, 1996 for condonation of delay in filing of the Application. In the said Application, the Respondent prayed for setting-aside the impugned Arbitration Award and the corrected arbitration award inter alia, on the grounds that the award passed by the Sole Arbitrator is patently illegal, arbitrary, legally unsustainable, in violation of public policy of India and the said impugned Arbitration Award deals with a dispute not contemplated and not falling within the terms of claim submitted to Arbitration and the same contains decision of matters beyond the scope of claim submitted to the arbitration. Further an application for interim relief was also filed by the Applicant along with the Application to stay the operation, implementation and enforcement of the impugned Arbitration Award and the corrected arbitration award. However, a miscellaneous application bearing case number 169/2024 has been filed by the Applicant on January 30, 2025 before the Commercial Court-1, Lucknow (“**Court**”) with respect to the objection against the Application stating that the Respondent has filed a time barred application and, therefore, the same shall not be admitted by the Court. Presently, the matter is currently pending for hearing.

Any disruptions at this flagship centre- whether due to events like fires, natural disasters, or regulatory issues could severely impact our ability to deliver services, potentially leading to service suspensions. Although we have nearby centres to mitigate continuity risks, certain specialized tests are exclusively performed at our flagship location. The occurrence of such events could result in patient loss and significant cost increases for test processing, transport, and logistics, which may not be recoverable through patient fees. Any failure, malfunction, or destruction of our flagship centre could therefore have profound adverse effects on our business, operational outcomes, and financial stability.

We operate through 39 diagnostic centres, for conducting pathology specimen collection, basic radiology tests, and certain advanced radiology tests. Any disruptions or failures in operating these facilities, whether partial or complete, could significantly impact our business, operational outcomes, and financial health. Such incidents might lead to revenue loss, reduced customer satisfaction, and potential regulatory issues, emphasizing the critical importance of maintaining continuous and reliable service delivery across all our diagnostic centres.

2. Our business and prospects may be adversely affected if we are unable to maintain and grow our brand name and brand image.

Since we derive a large portion of our revenues from the B2C segment (i.e. individual patients, who either walk into our diagnostics laboratories or our collection centres or use our home collection services), recognition of our brand and our reputation are critical for the success of our business and operations. Set out below are details of our revenue from operations generated from the B2C segment for the years indicated:

Segment	For period ended December 31, 2024				Fiscal 2023				Fiscal 2022			
	Revenue from operations (₹ in Lakhs)	% of total revenue from operations	Revenue from operations (₹ in Lakhs)	% of total revenue from operations	Revenue from operations (₹ in Lakhs)	% of total revenue from operations	Revenue from operations (₹ in Lakhs)	% of total revenue from operations	Revenue from operations (₹ in Lakhs)	% of total revenue from operations	Revenue from operations (₹ in Lakhs)	% of total revenue from operations
B2C	6,312.15	37.69%	6,027.02	34.13%	4,339.87	31.70%	6,675.21	55.83%				

As 37.69% of our revenues for the period ended December 31, 2024 are primarily derived from walk-in customers, our brand and reputation play a crucial role in the success of our business operations. The maintenance and enhancement of our brand name and image hinge on several factors: the quality, accuracy, and efficiency of our diagnostic tests; the turnaround time and satisfaction levels of our patients; the performance of our service network; as well as the successful introduction of new tests and services. Moreover, as we expand into new geographic markets within India and face increasing competition, the task of preserving and elevating our brand may prove to be both challenging and costly.

Our services are designed to detect early symptoms of diseases and support disease prevention by monitoring various health indicators. While we have not encountered significant errors in the past, users of our services are especially sensitive to any potential mistakes, unlike users of non-diagnostic products or services.

We train our medical personnel to deliver accurate and timely test results. However, delays or inaccuracies in our results, whether due to technology limitations, equipment issues, or misinterpretation by medical professionals, could lead to incorrect treatments, potentially harming patients and causing negative publicity that could damage our brand and reputation. Furthermore, errors in handling patient specimens, incorrect labelling, improper use of complex medical equipment, or inadequate specimen extraction causing harm to patients could compromise the accuracy of our test results. In such cases, we may be held liable under healthcare laws for actions or oversights by our employees, further impacting our brand and reputation. In the past three years, there have been no instances of such negligence, however we cannot assure that this will remain the case in future.

3. We are dependent on B2C and few other customers for a major part of our revenues. Further we do not enter long-term arrangements with our customers and any failure to continue our existing arrangements could adversely affect our business and results of operations.

We offer a comprehensive diagnostic network, that is in the business of selling of consumables like X-ray films, reagents for laboratory testing and other consumables necessary for healthcare operations and providing both pathology and radiology testing services. We sell the products mainly through our Subsidiary i.e. Chandan Pharmacy Limited, for more details relating to the sale of products, please refer “Our Business-Table set forth below is service wise bifurcation of our revenue” on page 166. Our revenue of operations is concentrated to B2C and few other customers for the period ended December 31, 2024 and in Fiscal 2024, 2023, and 2022 is set out below:

(₹ in lakhs, unless stated in %)

Category	For the period ended December 31, 2024		For fiscal year 2024		For fiscal year 2023		For fiscal year 2022	
	Amount	(%)	Amount	(%)	Amount	(%)	Amount	(%)
Customer 1	4,867.74	29.07%	5,946.82	33.67%	4,939.04	36.08%	3,594.30	30.06%
Walk-in Customers (B2C)	6,312.15	37.69%	6,027.02	34.13%	4,339.87	31.70%	6,675.21	55.83%
Total	11,179.89	66.76%	11,973.84	67.80%	9,278.91	67.78%	10,269.51	85.89%

We typically do not enter into long-term agreements with our customers, which significantly limits our ability to predict future revenues. The majority of our customer agreements are short-term, and there is no guarantee that our existing customers, whether corporate or walk-in, will continue to engage our services. Any substantial decline in the number of corporate clients or walk-in customers, non-renewal of contracts, or termination of existing customer relationships could materially and adversely affect our business, financial condition, and results of operations. In the past three years, there has not been any instance for such a decline in customers, however we cannot assure that the same shall continue in future. Additionally, in a competitive market, if our competitors offer more attractive incentives or terms, there is no assurance that our customers will remain associated with us. This uncertainty in maintaining our customer base, coupled with the lack of long-term contractual commitments, could pose a significant risk to our business stability and future revenue generation.

4. Any non-renewal or cancellation of our arrangements with our institutional customers, including hospitals, and government agencies may adversely affect our business, results of operations and financial condition.

We enter into long-term arrangements with certain hospitals and diagnostic centres agreements as well as with the government agencies, pursuant to which we conduct diagnostic 1,496 tests and/or develop and operate diagnostics centres to conduct on-site testing.

Some of our collection centers are situated in Uttarakhand under the National Health Mission (NHM) vide renewal letter dated December 28, 2024 between our company and Office of the Mission Director, National Health Mission, Uttarakhand (Uttarakhand Health & Family Welfare Society, Health & Family Welfare Department, Government Of Uttarakhand).

In addition, we enter into agreements with other institutions such as corporate employers and to provide diagnostic services to their employees and their dependent family members. Set out below are details of revenue generated from our business-to-business (“B2B”) segment for the years indicated:

Category	For the period ended December 31, 2024		For fiscal year 2024		For fiscal year 2023		For fiscal year 2022	
	Amount	(%)	Amount	(%)	Amount	(%)	Amount	(%)
B2B	10,435.33	62.31%	11,631.99	65.87%	9,349.07	68.30%	5,281.14	44.17%
Total	10,435.33	62.31%	11,631.99	65.87%	9,349.07	68.30%	5,281.14	44.17%

Our B2B customers are typically entitled to terminate or cancel such agreements voluntarily or with prior written notice (typically 30 days). Our B2B customers may decide not to renew our arrangements in the future. Certain of such agreements also require us to comply with strict data protection and data privacy laws and any future non-compliance of such terms may subject us to indemnity provisions and other damages, which could lead to a material adverse impact on our financial condition.

While we have not faced any instances of cancellation of our arrangements with B2B customers which led to a material adverse effect on our business and operations for the period ended December 31, 2024 and in Fiscals 2024, 2023 and 2022 and have not been blacklisted by any company/entity in the past three years, there can be no assurance that such events may not occur in the future. Any occurrence of such events in the future may adversely affect our business, results of operations and financial condition, including our ability to obtain other government tenders in the future.

5. Our operations are only focused on Uttar Pradesh and Uttarakhand, and any loss of business in such region could have an adverse effect on our business, results of operations and financial condition.

We offer a comprehensive diagnostic network, providing both pathology and radiology testing services. As of December 31, 2024, we operate in more than 23 cities and towns across Uttar Pradesh and more than 19 cities and towns in Uttarakhand. However, a substantial portion of our operations is concentrated in Uttar Pradesh.

Below are the details of our revenue from operations in Uttar Pradesh and Uttarakhand for the specified years:

State	For the period ended				Fiscal			
	December 31, 2024		2024		2023		2022

A regional economic slowdown in northern India, along with potential issues such as political or civil unrest, disruptions, disturbances, or prolonged economic downturns affecting demand for our services in Uttar Pradesh or Uttarakhand, could adversely impact our business, operational results, cash flows, and financial condition. Additionally, changes in state or local government policies might also have adverse effects. While we did not experience any significant negative impact from such events for the period ended December 31, 2024 and in Fiscal Years 2024, 2023, and 2022, we cannot foresee the potential impact of similar future occurrences on our service demand in Uttar Pradesh and Uttarakhand, or their subsequent effect on our business and operations.

6. Our primary source of revenue is from our pathology and radiology services and our business may be adversely affected if these categories do not perform as well as expected.

We provide services of pathology and radiology. Out of this, the revenue contribution from these services accounted for a significant portion of our total revenue for the period ended December 31, 2024 and in the last three Financial Years i.e. 52.99%, 55.21% in FY 2024, 55.12% in FY 2023 and 51.43% in F.Y. 2022. In case of increased competition, pricing pressures within our top two categories or other factors, our revenue from these services may decline in the future. Any adverse developments with respect to the sale of services within our top two categories could adversely affect our revenue which in turn may have an adverse effect on our business, results of operations and financial condition. In the past three years and stub period, there has not been any instance for such a decline in revenue from these segments, however we cannot assure that the same shall continue in future. For further details, please refer to the chapter titled “Our Business” on page 164 of this Prospectus.

7. We are dependent on our Group Company for a significant part of our revenues. Further we have not entered into any long-term arrangements with our group company i.e. Chandan Hospital Limited and any failure to deliver the commitment could adversely affect our business and results of operations.

The company’s revenue is significantly reliant on a group company i.e. Chandan Hospital Limited, which accounts for 29.07%, 33.68%, 36.08% and 30.06% of our revenue from operations for the period ended December 31, 2024, Fiscal Year 2024, 2023 and 2022, as per restated consolidated financial statements. This significant dependence exposes the company to risks that if the group company reduces their transactions with us or changing payment terms or there is any downsizing of the scale of our group company’s business or any deterioration of its financial conditions or prospects may result in a reduction in their expenditure on the goods/ services we provide. Further, there are a number of factors outside of our control that might result in the loss of the business, including changes in strategic priorities resulting in them exiting certain business segments and markets, regulatory pressures. Any negative changes in the group company’s financial stability, business strategies, or operational shifts- such as mergers, acquisitions, or restructuring—could have a

substantial impact on the company's revenue and overall financial performance. While we have not faced any instances of termination of relationship by our group company for the period ended December 31, 2024 during the Fiscal Years 2024, 2023 and 2022, any failure to retain the business from our group company can adversely affect our business, results of operations and financial condition.

8. We rely on domestic suppliers for the supply of medical consumables particularly suppliers from Uttar Pradesh and any delay, interruption or reduction in such supply could adversely affect our business, results of operations, financial condition and cash flows.

We rely heavily on domestic third-party suppliers for the majority of our medical consumables, with a significant portion sourced from Uttar Pradesh. For the period ended December 31, 2024 and in Fiscal Years 2024, 2023, and 2022, we procured 92.29%, 92.79%, 94.15%, and 93.73% of our total purchases, respectively, from this state. The state-wise bifurcation of our medical consumable procurement is as follows:

Our success depends on the uninterrupted supply of medical consumables required for our diagnostic centres. We do not have long-term contractual arrangements with our suppliers and procure medical consumables through purchase orders entered into with our suppliers. Relying on a single state for medical consumables procurement exposes our company to regional risks that can significantly disrupt operations. Natural disasters, such as floods, earthquakes, or droughts can lead to supply chain interruptions. Additionally, political instability or changes in government policies, including taxes, labor laws, or trade restrictions, may cause unexpected delays or increased costs. The lack of diversification in sourcing exposes the company to these uncontrollable factors, leaving it vulnerable to disruptions without alternative supply options. Over the past three fiscal years, there have been no instances of such supply disruptions, however there can be no assurance that the same might continue in future.

9. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

The following table and notes set forth the principal components of our contingent liabilities as per Accounting Standard (AS) 29 - Provisions, Contingent Liabilities and Contingent Assets for the period ended December 31, 2024 and as at March 31, 2024, 2023 and 2022.

Chandan Healthcare Limited (“CHCL”) has provided the said corporate guarantee to Chandan Hospital Limited (“CHL”) which also has same promoters as of CHCL. CHL is also one of the major customer of CHCL and the common aim is to enhance the financial performance of both the entities.

CHCL holds a 53.56% of equity shares in its subsidiary, Chandan Pharmacy Limited (“CPL”). To support the subsidiary’s growth in both revenue and profitability, a corporate guarantee has been extended to CPL. As the subsidiary grows, it will strengthen the overall financial position of the group, benefiting the company on a consolidated basis and enhancing the overall financial strength of the group as a whole.

For more information, regarding our contingent liabilities, please refer “Note 36” in chapter titled “Financial Information” beginning on page 233 of this Prospectus.

10. We depend on third parties to provide us our reagents and films, and any failure to continue to do so or recall of existing testing equipment and reagents could adversely affect our business, results of operations and financial condition.

We rely on third-party vendors and suppliers for our testing equipment, test kits, and reagents. For the period ended December 31, 2024 and in Fiscal 2024, 2023 and 2022 our top 10 suppliers accounted for 36.01%, 30.04%, 29.32% and 33.41%, respectively, of our procurement for reagents, and film. The loss of any of

these key suppliers- whether due to bankruptcy, financial difficulties, reduced sales, labour strikes, or other production disruptions- could significantly impact our business.

Additionally, we do not have any agreements with our vendors for supply of equipments, instruments, reagents and films. Some of these agreements mandate that we purchase a minimum quantity or value of supplies. We cannot guarantee that we will always be able to secure adequate supplies of equipment, reagents, and test kits promptly and without defects. Any disruptions to our business could lead to difficulties in fulfilling these minimum purchase requirements, potentially resulting in defaults and interruptions to our supply of essential equipment and reagents.

While we have not faced disruptions in our supply of equipment or reagents which have affected our ability to provide our services in a timely manner in the preceding three financial years, we cannot assure you that we will not suffer any such disruptions in the future. Any such reductions or interruptions in the supply of equipment or reagents, defects in reagent and test kits and any inability on our part to find alternate sources for the procurement of such items, may have an adverse effect on our ability to provide our services in a timely or cost-effective manner.

11. We rely on our information technology systems and third-party platform for providing our diagnostic services and managing our operations, and any disruption to such systems or networks could adversely affect our business operations, reputation and financial performance.

We have information technology systems that support our business processes, including for conducting tests, transmission of test results, billing services, quality control, tracking logistics, human resources, finance and other patient service functions, we use Laboratory Information Management System (“LIMS”), Radiology Information Systems (“RIS”) and Picture Archive and Communication Systems (“PACS”). As a result, our business depends on the capacity, reliability and security of our technology systems, as well as the systems of third-party information technology vendors we engage. These systems may be susceptible to outages due to events beyond our control, including fire, floods, power loss, telecommunications failures, natural disasters, break-ins and similar events. In addition, our radiology diagnostic centres have remote review and reporting capabilities, as they are connected to our tele-radiology hub through special image transfer software. While to date we have not experienced any significant disruption of our operations or services provided to patients, there can be no assurance that we will not encounter such disruptions in the future as a result of any such event. If we experience system interruptions, errors or downtime (which could result from various causes, including changes in client use patterns, technological failure, changes to systems, linkages with third-party systems and power failures) or if we are unable to access necessary technology to effectively serve our patients and manage our operations, our business prospects and financial performance could be materially and adversely affected. Our hardware and software may be susceptible to damage, human error, natural disasters, power loss, sabotage, computer viruses, and other events beyond our control such as interruption in internet services. Managing an effective response to such disruptions may require significant effort on part of our employees and third-party vendors in order to protect our information technology systems. Sustained system failures or interruption of our systems (including systems of third-party information technology vendors) in one or more of our diagnostic centre operations could disrupt our ability to process requisitions, perform testing, provide test results in a timely manner and complete other business administration functions. The occurrence of any such events could adversely affect our business, interrupt our operations, subject us to increased operating costs and expose us to litigation. While we have not faced any interruption in our operations due to system failures in the past three years, however there can be no assurance that the same shall continue in future.

12. Delays in the establishment of diagnostic centres could lead to termination of the agreements or cost overruns, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

We are required to deploy our diagnostic centres, including those to be financed through IPO Proceeds, within healthcare facilities as per the schedule specified in the agreement, we enter into with a healthcare provider. Subject to certain customary exceptions such as (i) occurrence and continuance of force majeure events that

are not within our control, or (ii) delays that are caused due to reasons solely attributable to the healthcare provider, failure to adhere to contractually agreed timelines or extended timelines could require us to pay liquidated damages as stipulated in the agreements or lead to encashment and appropriation of the bank guarantee or performance security. The counterparty may also be entitled to terminate the agreement in the event of delay in completion of the establishment of the diagnostic centre if the delay is not on account of any of the agreed exceptions. In the event of termination of any of our contracts for such reasons, we may only receive partial payments under such agreements and such payments may be less than our estimated cash flows from such contracts. Further, we may not be able to obtain extensions for the contracts on which we face delays or time overruns or able to achieve entire term of operation as originally envisaged under these agreements, which could adversely affect our ability to maximise gains from such centres.

Setting-up of diagnostic centres requires that we receive the site from the public health agency or private healthcare provider and any delays in handover of the site to establish the diagnostic centre could also result in delays and cost overruns. The scheduled completion targets for establishment of our diagnostic centres are estimates and are subject to delays as a result of unforeseen problems including force majeure events, issues arising out of availability of equipment, unavailability of financing, unanticipated cost increases or changes in scope and inability in obtaining government approvals. While we have not faced any delays in setting up diagnostic centres in last three years, there can be no assurance that the same shall continue in future. There can be no assurance that there will not be delays in the future and any such delays could have adverse effects on our cash flows, business, results of operations and financial condition.

13. Delays or inadequacies in the collection and transportation of samples to our laboratories could compromise their integrity, potentially leading to negative impacts on our business, results of operations and financial conditions.

The process of collecting samples relies heavily on the expertise and performance of our employees. Any errors or losses during the sample collection, preparation, labelling and storage process could hinder our ability to deliver effective services and adversely impact our business and reputation. Ensuring the timely pickup, transportation, and delivery of samples from various sources- such as patient's homes and collection centres is crucial to our operations. Maintaining sample integrity and turnaround time is particularly challenging when laboratories are located far from collection points or are otherwise difficult to access. Delays and disruptions in transportation can arise from inadequate infrastructure, weather issues, natural disasters, strikes, terrorism, or other uncontrollable events, potentially affecting our ability to receive samples and produce test results promptly. Additionally, the sample collection process is highly dispersed, fragmented, and labour-intensive, relying on the skill and attention of healthcare professionals like phlebotomists. Errors such as sample mix-ups or mislabeling can lead to incorrect or invalid test results, which could harm our company's business and reputation.

Further, while we service parts of our network through our in-house logistics team, we are reliant on the services of third-party logistics providers. We do not have long-term contractual arrangements with such third- party logistics providers, and their operations are not within our control. If we are unable to deliver or receive samples at our laboratories in a timely manner, their integrity as well as the outcome of results may be compromised, or the reporting of results of tests to customers may be delayed. In the event samples are lost, destroyed, damaged or contaminated or from delays in the generation of critical test results, and damage to our reputation and business, we may incur additional costs, such as the cost of re-administering tests or potential or threatened litigation, which may in turn lead to loss of customer confidence. The occurrence of any such event could adversely affect our business, results of operations and financial condition. While we have not faced any instances of inadequacies or delays in sample collection which have led to any material adverse effect on our business and operations for the period ended December 31, 2024 and in Fiscals 2024, 2023 and 2022, there is no assurance that we will not face such instances in the future.

14. We may face a range of operational, reputational, medical, and legal claims, regulatory actions or other liabilities arising from the provision of healthcare services. This includes potential liabilities from malpractice and medical negligence claims, which could negatively impact our business, operational outcomes, and financial health.

We face increased risks of legal claims, criminal actions, regulatory scrutiny, and reputational damage due to the services we offer and any allegations of failing to comply with relevant laws and regulations. This includes potential liabilities from claims of medical negligence involving healthcare professionals associated with us- such as consulting doctors, technicians, and paramedical staff at our diagnostic and sample collection centres. These risks may materialize if our medical professionals, technicians, and staff are inadequately trained, make errors in handling or labelling patient samples, improperly use complex medical equipment, or fail to extract samples correctly, potentially causing harm or compromising test accuracy. Additionally, we might encounter complaints or disputes from customers concerning false positive or negative results, misdiagnosis, inaccurate reports or other instances of medical negligence, which are particular to the healthcare sector. Such issues can stem from various factors, including personnel negligence, equipment failures, test inaccuracies, individual patient conditions, and complications.

We offer advanced radiology services, including MRI, CT scans, etc. During these procedures, we might perform invasive or anesthetic actions based on doctors' prescriptions. This presents a risk of patient injury, adverse reactions, or complications, which could lead to claims from patients or regulatory bodies, regardless of whether medical negligence by our staff or doctors is involved. Additionally, medical consumables used in our services might be at risk of contamination, mislabelling, tampering, or other forms of damage, such as errors in dispensing and packaging, potentially resulting in injury or death. We could also face professional liability claims related to improper use or malfunction of our diagnostic equipment or accidental exposure to radiation. Although we have not experienced incidents of contamination or injury from hazardous materials that significantly impacted our business for the period ended December 31, 2024 and in Fiscal Years 2024, 2023, or 2022, we cannot guarantee that such events will not occur in the future. For more details, refer to "*Outstanding Litigation and Material Developments*" on page 303.

Claims against our Company that are not entirely covered by insurance could be expensive to defend, potentially lead to significant damage awards, and shift our management's focus away from our core operations. This diversion could negatively impact our business, operational results, and financial health.

15. Failure to introduce new tests, services and technologies or acquire advanced or enhanced equipment could negatively affect our business, results of operations and financial condition.

The diagnostic healthcare services sector in India is subject to constant advancements and improvements in tests, services, processes, and technologies. To remain competitive, we must continuously anticipate and address patient's needs by investing in new technologies and equipment to develop and enhance our test offerings. For more details on our test portfolio, refer to "*Our Business*" on page 164. Further, competition among manufacturers for a greater share of the diagnostic healthcare equipment market may accelerate the development of new technologies and, consequently, result in the obsolescence of our equipment, and we may not have the financial ability to acquire new or improved equipment and may not be able to maintain a competitive equipment base. Failure to stay ahead of industry trends or to introduce new tests, services, and technologies in a timely and cost-effective manner could hinder our ability to deliver efficient and effective diagnostic services. While we have not experienced any significant negative impacts from failing to anticipate market trends for the period ended December 31, 2024 and in Fiscal Year 2024, 2023 and 2022, future failures to adapt or innovate ahead of competitors could adversely affect our business, operational results, and financial stability.

Additionally, technological advancements may lead to the development of more cost-effective or non-invasive diagnostic tests that are more convenient or affordable than the ones we currently offer. If such technologies are adopted by our existing and prospective patients, it could reduce the demand for our services. Innovations might include tests that are less expensive and can be conducted outside of commercial clinical laboratories, such as in-hospital labs, point-of-care tests administered by doctors, or home tests managed by patients or non-medical professionals, like pregnancy and diabetes tests. Furthermore, manufacturers of laboratory equipment and test kits might increase their sales by promoting point-of-care devices to physicians and offering home-use test kits to both doctors and patients. This shift towards more accessible testing options could impact our market share and negatively affect our business, operational results, and financial stability.

16. Failure or malfunction of our equipment could adversely affect our ability to conduct our operations.

Our operations involve inherent liability risks associated with using complex medical equipment, which may malfunction or cause injury due to defects, inadequate maintenance or repair, improper use, or lack of timely servicing. We cannot guarantee that our current equipment and technologies are completely free from errors or malfunctions. Significant equipment failures could lead to substantial repair and maintenance costs and disrupt our operations. Furthermore, if our medical equipment in diagnostic centres causes injury due to defects, poor maintenance, or improper use, we may face liability claims. Regardless of the validity or outcome of these claims, they could result in considerable legal defence costs, damage our reputation, and adversely impact our business, financial condition, and operational results. Although we have not encountered such issues for the period ended December 31, 2024 and in fiscal years 2024, 2023, and 2022, future extended downtime of our equipment or significant quality issues with our suppliers' products could negatively impact customer experience, leading to revenue loss, customer dissatisfaction, and reputational damage. We cannot ensure that we would be able to address such issues promptly and cost-effectively, which could hinder our ability to deliver services and affect our business and reputation.

17. We require certain approvals, licenses, registrations and permits for conducting our business and our inability to obtain, retain or renew them in a timely manner, or at all, may adversely affect our business, results of operations and financial condition.

Our operations are subject to extensive government regulations, and we are required to obtain and maintain several statutory and regulatory registrations, permits and approvals under central, state and local government rules in India, generally for carrying out our business and for each of our facilities. The regulatory licenses that we require are typically granted for a limited term and are subject to renewal at the end of such terms. We cannot assure that we will be able to obtain or renew all necessary licenses and registrations as and when required, within a reasonable time, or at all. Our diagnostic centres are located on properties leased by us, and it is the responsibility of the lessors to procure occupancy certificates. An absence of such certificates on accord of the lessors could also adversely affect our business and operations. Our licenses and approvals are subject to various conditions, including periodic renewal and maintenance of standards that are subject to inspection and may require us to incur substantial expenditure. Any actual or alleged failure on our part to comply with the terms and conditions of such regulatory licenses and registrations could expose us to significant compliance costs or liabilities or could affect our ability to continue our operations. Further, in the event certain accreditations, are made compulsory, either by law or as a condition for empanelment, our business and operations may be adversely affected until such time we receive such accreditations.

If we fail to obtain or renew any applicable approvals, licenses, registrations or consents in a timely manner, we may not be able to undertake certain operations of our business, or at all, which may affect our business, results of operations and financial condition. We cannot assure you that the approvals, licenses, registrations or permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. In addition, any suspension, revocation or termination of one or more of our operational licenses may also lead to consequences under the terms of our other licenses. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licenses, registrations or consents, or any suspension or revocation of any of the approvals, licenses, registrations or consents that have been or may be issued to us, may adversely affect our business, results of operations and financial condition.

18. We may be unable to retain or recruit trained professionals, which may adversely impact the reputation of our brand and materially and adversely affect our results of operations and cash flows.

Our operations are labour intensive, making us susceptible to strikes, work stoppages, or increased wage demands from our employees. These disruptions could affect our ability to maintain regular operations and could lead to higher labour costs. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain qualified, experienced, talented and skilled professionals. Without a sufficient number of qualified employees, our operations and delivery of services could suffer.

Competition for qualified technicians and pathologists is intense, both in retaining our existing employees and when replacing or finding additional suitable employees. Competition among diagnostic companies for qualified employees, particularly qualified radiologists, is intense and the ability to retain and attract qualified individuals is critical to our success. As of December 31, 2024, we had 1,142 permanent employees. The loss of the services of our personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on our financial results and business prospects. Further, if we cannot hire additional qualified personnel or retain them, our ability to expand our business may be impacted. As we intend to continue to expand our operations and develop new products, we will need to continue to attract and retain experienced management, pathologists and radiologists. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting suitable employees.

19. We intend to utilize a portion of the Net Proceeds from this Offer to fund the capital expenditure requirements of our Company, which includes the purchase of certain pre-owned equipment. However, we have not yet placed orders for these pieces of equipment.

Our Company has obtained third-party quotations for pre-owned equipment such as MRI and CT Scan. For further details, please refer to the chapter titled “*Objects of the Offer*” on page 122 of this Prospectus. We plan to acquire pre-owned equipment worth ₹ 1,064 lakhs for our Ashiyana and Ayodhya diagnostic centres. However, if the current owner decides not to sell or chooses to sell to other vendors offering more competitive prices at the time of purchase, this could disrupt our budgeted costs. Such circumstances could have a significant impact on our business, financial condition, and prospects.

Furthermore, the cost estimates for the pre-owned equipment are based on quotations received from current owner, which are subject to change due to various factors, such as changes in management’s assessment of the project, potential cost overruns, and market conditions. Since our Company has not yet placed orders for the pre-owned equipment, we cannot assure that we will be able to procure the equipment in a timely manner or at the prices reflected in the received quotations. Any delay in procurement may result in time and cost overruns or compel our Company to purchase the equipment at higher prices, leading to variations in our budgeted costs. Consequently, our business, financial condition, results of operations, and prospects could be materially and adversely affected.

20. We have not yet placed orders in relation to the capital expenditure to be incurred for the purchase of equipment / machinery. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machinery or other materials in a timely manner, or at all, may result in time and cost overruns and our business, prospects and results of operations may be adversely affected.

We intend to utilize portions of the Net Proceeds for funding capital expenditure requirements towards establishing a new Flagship diagnostic centre in Jankipuram, Lucknow and new Central Reference laboratories at Ayodhya and Ashiyana. While we have procured quotations from vendors in relation to the capital expenditure to be incurred, we have not placed any firm orders for any of them. For details in respect of the foregoing, please see “*Objects of the Offer*” on page 122 of this Prospectus. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations.

Further, the actual amount and timing of our future capital requirements may differ from our estimates because of, among other things, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, engineering design changes and technological changes. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure the requisite materials from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternate vendors to provide us with the materials which satisfy our requirements at acceptable prices. Our inability to procure the machinery and equipment at

acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule of implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

21. Our Current and proposed business operations are being conducted on premises owned by and leased from third parties. Our inability to continue operating from such premises, or to seek renewal or extension of such leases may adversely affect our business and results of operations.

Our current and proposed business operations are primarily conducted on premises that are owned by and leased from third parties, and we may continue to enter into similar transactions in the future. For example, our current diagnostic centres located at Dehradun, Almora, and Nainital, we have secured leases for 10 years, 3 years, and 1 year, respectively. As our current leases may expire in the ordinary course of business, we cannot assure you that we will be able to continue operating from our existing premises or renew our leases on favorable terms, or at all.

Given that our operations rely heavily on leased premises, any encumbrance, adverse impact, or deficiency in the title, ownership rights, or development rights of the property owners from whom we lease could have a detrimental effect on our business. Additionally, any breach of contractual terms or inability to renew lease agreements on acceptable terms could disrupt our business and adversely affect our results of operations. In the event that we are required to relocate, we may face the challenge of obtaining fresh regulatory licenses and approvals. Furthermore, we cannot assure you that suitable alternative locations will be readily available. Any delay in securing a new location could lead to operational disruptions, negatively impacting our business and financial performance.

22. Any major outbreak of a health epidemic may impact our workforce which in turn might affect our business, our financial condition, and the results of our operations.

Our operations involve patients visiting our facilities for sample delivery, radiology tests, and medical consultations, which exposes our staff to various infectious and communicable diseases. Additionally, our employees regularly visit patients' homes for sample collection. In the event of a major outbreak, epidemic, or pandemic, our employees and doctors could be at risk of contracting serious communicable diseases due to their constant exposure. This could lead to a significant reduction in workforce at our facilities, adversely affecting our revenue. Furthermore, individuals who visit our facilities or interact with our staff may also contract these diseases, potentially leading to substantial claims for damages and harming our reputation due to negative media coverage. For instance, diseases such as tuberculosis and COVID-19 present notable risks.

Moreover, our operations at our diagnostic centres and collection centres might be disrupted due to the lockdown or restrictions resulting from a major outbreak, epidemic or pandemic. Future events of this nature could lead to a loss of customers, including a reduction in walk-in patients who might postpone non-urgent diagnostic tests. This situation could also increase costs related to logistics, chemicals, and reagents, and may lead to shortages of equipment, testing supplies, and key personnel. Additionally, there could be delays in renewing or obtaining necessary registrations, approvals, licenses, and permits from regulatory authorities. While we have not experienced any significant adverse effects on our business and operations for the period ended December 31, 2024 and in fiscal years 2024, 2023, and 2022, we cannot predict the impact of a future outbreak of a highly infectious or contagious disease, which could significantly affect our reputation, business performance, and financial health.

23. There have been instances in the past where we have not made certain regulatory filings with the RoC and there were certain instances of discrepancies in relation to certain statutory filings and corporate records of our Company.

We have obtained the search report on RoC filing from the PCS firm M/s Akshat Garg & Associates vide their report dated September 27, 2024. According to that report, there have been certain discrepancies in relation to statutory filings required to be made by the company with the RoC under applicable laws, as well as certain other non-compliances incurred by us under the Companies Act details of which are provided

hereunder which have been intimated to the RoC by way of filing e-form GNL-2 form through letter dated September 26, 2024 and Company has sent an intimation to the ROC informing about discrepancies/ errors, and no action has been taken by ROC against us for such inaccurate filings. The details of such discrepancies/errors are provided below:

- a) Our Company did not find the Form 32 for appointment of Amar Singh as Managing Director in the year 2004 and re-appointment form of Amar Singh as Managing Director for the year 2004 and 2009. Our company has informed the RoC and has been informed to ROC via GNL-2 dated September 26, 2024.
- b) Our Company had wrongly mentioned in Form DPT-3 for March 31, 2023 as year ending July 14, 2023. Our company had wrongly attached EGM resolution in Form PAS-3 for allotment of shares in 2014 instead of Board Resolution. Our company has voluntarily refiled Form DPT-3 and Form PAS-3 before the RoC and has been informed to ROC via GNL-2 dated September 26, 2024.

However, Board of Directors of our Company has taken the note of the said discrepancies found in the statutory forms vide resolution dated September 28, 2024. Our company has appointed designated employees responsible for monitoring statutory requirements and ensuring timely compliance of the same. A compliance calendar has been established to track deadlines for filings, approvals, and submissions to ROC. These clerical errors were not substantial in nature and the concerned ROC has not issued any show-cause notice in respect to the above has been received by our Company till date and except as stated in this Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same.

Although, no regulatory action, fine or penalty has been taken/ levied on our Company for the abovementioned purported default / non-compliance, however, it cannot be assured that no such regulatory action, fine or penalty will be taken/ levied in the future. Further, we cannot assure you that such non-compliances will not occur in the future. Therefore, if the concerned authorities impose monetary penalties on us or take certain punitive actions against our Company or its directors/ officers in relation to the same, our business and financial condition could be adversely affected.

24. Our ability to attract individual patients is largely dependent on the disposable income and increasing general health awareness of India's general population, which could decline due to a variety of factors.

Our key source of income is from individual patients. The growth of these types of customers is dependent on brand recognition, wider acceptance of our business in the communities in which we operate and our ability to compete effectively within our industry, all of which may be negatively affected by a wide variety of reasons. For example, individual decisions regarding when to access healthcare services may also be impaired by the absence of a developed health insurance sector or the lack of appropriate government programs to cover the costs of healthcare. Any of the above reasons may affect our ability to maintain or increase growth in individual patients, which may adversely affect our business, financial condition, results of operations and cash flows.

25. The diagnostics industry is highly competitive and our inability to compete effectively may adversely affect our business, results of operations and financial condition.

The diagnostics industry is highly competitive with several entities present in the market, and therefore it is challenging to improve market share and profitability. Our competitors include diagnostic healthcare service providers, hospital-based diagnostic centres, independent clinical laboratories, other smaller-scale providers of diagnostic services (with more established local and regional presence in certain geographies) such as pathology, radiology laboratories and preventive care providers as well as international service providers which may establish and expand their operations in future. We compete on the breadth of our test offerings, the geographical reach of our network, our ability to accurately undertake scans or process specimens and report data in a timely manner and our patient relationships. Some of our competitors may have greater

financial, research and development, marketing and other resources, broader service offerings, more experience in obtaining regulatory approvals or greater geographic reach.

Also, the pricing-related competition may intensify in the near future which may have an adverse impact on the results of our operations, including our profit margins. Increase in the number of comparable diagnostic healthcare facilities may exert additional pricing pressure on some or all of our services. In addition, we may price our services differently in different regions of India, which may lead to patient dissatisfaction. Our competitors may also succeed in providing services that are more effective, popular or cheaper than ours, which may render our services uncompetitive. Our larger competitors may modify their business model to benefit from increased cost efficiencies and provide services similar to ours at a significant discount to our prices. If we are unable to compete effectively, our business could decline or contract and our business, results of operations and financial condition could be adversely affected.

26. We are involved in certain legal proceedings, which, if determined adversely, may affect our business and financial condition.

As on the date of filing this Prospectus, there are outstanding legal proceedings initiated by or against our Company, Promoters, Directors, and Group Company that are incidental to our business and operation. 27. There have been some instances of delays in filing of statutory and regulatory dues in the past with the various government authorities.

In the past, there have been some instances of delays in filing statutory forms with government authorities such as returns, EPF, ESIC and GST returns. Accordingly, we have been subjected to penalty and charged with interest for delayed deposit of tax on those instances as well. Such delays were mainly on account of technical glitches in the regulatory website, delays on account of COVID-19 and delays on the company's

part in preparation of information required for filing such returns. While our Company has already regularized the aforesaid delays, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed, or penalty imposed by regulators on us may adversely affect our business and the results of operations.

28. Our Promoters and Directors have interests in entities, which are in businesses similar to ours and this may result in potential conflict of interest with us.

There are, and may be, certain transactions between our company and our promoters or promoter group members/ entities, in the ordinary course of business and at arms' length price. However, a potential conflict of interest may occur between our promoters, directors due to having similar line of business. 29. We handle confidential medical information of our patients and are vulnerable to potential data breaches or unauthorised access which would adversely affect our business operations.

Our Company is entrusted with handling large volumes of confidential medical information, which is subject to strict data protection regulations and industry standards. There remains a risk of unauthorized access, data breaches, or inadvertent disclosures due to factors such as cyberattacks, system vulnerabilities, human error, or evolving regulatory requirements. Any failure to adequately safeguard patient data could result in reputational damage, regulatory penalties, legal liabilities, and a loss of trust amongst the patients. While our Company has not faced such breach of data in past three years and stub period, there can be no assurance that we shall continue the same in future.

30. We have entered and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms.

We have entered certain transactions with related parties may continue to do so in future. While our Company confirms that all such transactions have been conducted on arms-length basis and is in compliance with the Companies Act, 2013 and other applicable laws, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our company will enter into related party transactions also in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “*Note no. 34- Related Party Transactions*” of restated financials under section titled “*Financial Information*” on page 233 of this Prospectus.

31. Our Promoters have provided personal guarantee for loans availed by us.

In the event of default of the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoter’s ability to manage the affairs of our Company and our Company’s profitability and consequently this may impact our business, prospects, financial condition, and results of operations. Our Company has availed loans in business. Our Promoter has provided personal guarantee in relation to certain loans availed by our Company, for details please see “*Financial Indebtedness*” on page 301. In the event of default in repayment of the loans by the Company, the personal guarantee extended by our Promoter may be invoked by our lenders thereby adversely affecting our Promoter’s ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations.

32. Our Promoters and Promoter Group will be able to exercise significant influence and control over our operations after the offer and may have interests that are different from those of our other shareholders.

As of the date of this Prospectus, our Promoters and Promoter Group collectively hold 69.93% of our issued and outstanding equity share capital. Post the offer, our Promoters and Promoter Group will continue to hold 49.20% of our issued and outstanding Equity Share capital. By virtue of their shareholding, our Promoters and Promoter Group will have the ability to exercise significant control and influence over our affairs and business, including the appointment of Directors, the timing and payment of dividends, the adoption of and amendments to our Memorandum and Articles of Association, the approval of a merger, amalgamation, or sale of substantially all our assets and the approval of most other actions requiring the approval of our shareholders. The interests of our Promoters and Promoter Group may be different from or conflict with the interests of our other shareholders and their influence may result in change of our management or in our control, even if such a transaction may not be beneficial to our other shareholders.

33. Our Promoters, Directors and Key Managerial Personnel may have interest in our Company, other than reimbursement of expenses incurred, remuneration or other benefits received.

Our Promoters, Directors and Key Managerial Personnel may be deemed to be interested to the extent of the Equity Shares held by them and benefits deriving from their shareholding in our Company. 34. Our inability to protect or use our intellectual property rights or comply with intellectual property rights of others may adversely affect our business.

If we are unable to protect our name and logo we may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales, and higher administrative costs. There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation, and goodwill. Our efforts to protect our

intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations, and financial condition. We believe that there may be other companies that operate in the unorganized segment using our brand names. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows, and financial condition. Furthermore, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. While we have protected our intellectual properties in past three years and stub period, there can be no assurance that the same shall continue in future. While we have protected our intellectual properties in past three years, there can be no assurance that the same shall continue in future. For further details, please refer to the chapter titled “*Government and other Approvals*” on page 314 of this Prospectus.

35. Financial difficulties of patients or third-party payers may result in payment delays or require us to write off debts.

We face third-party credit risk, which arises from our dependence on external entities to pay for the services we deliver. Our exposure to this risk varies based on whether we bill patients directly or invoice public or private healthcare providers. If a third-party payer or contractual partner encounters financial troubles, we might struggle to collect the payments owed to us, potentially leading to debt write-offs. Prolonged or frequent payment delays, or instances of bad debts, could negatively impact our business operations, financial health, and future prospects.

Our credit period typically ranges from 15 days to 4 months. However, payments from government agencies may occasionally take longer to process due to procedural delays in approvals and payment disbursements. Over the past three years, there have been no other significant delays in the company’s payment cycle under normal business conditions. There can be no assurance that the same might continue in future.

36. We have not identified any alternate source of financing the “Objects of the Offer”. If we fail to mobilize resources as per our plans, our growth plans may be affected.

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer may delay in the implementation schedule and could adversely affect our growth plans. We hereby confirm that in case of any delay in the implementation schedule, the same would be undertaken as per applicable laws. For further details of object of Offer and schedule of implementation please refer to the chapter titled “*Objects of the Offer*” on page 122 of this Prospectus.

37. Our success depends heavily upon our individual Promoters, promoter group members, Directors, KMPs and SMPs for their continuing services, strategic guidance, and financial support.

Our performance depends largely on the efforts and abilities of our individual Promoters, promoter group members, Directors, KMPs and SMPs. Amar Singh, our Managing Director, and Asmita Singh, our Managing Director have an average experience of over two decades, two decades respectively in the diagnostic industry and other personnels. The inputs and experience of our individual Promoters, promoter group members, Directors, KMPs and SMPs are valuable for the development of business and operations and the strategic directions taken by our Company. Within our employees, we faced no significant attrition of persons for the period ended December 31, 2024 and during the financial years 2024, 2023 and 2022. However, we cannot assure you that we will be able to continue to retain these employees or find adequate replacements in the event of their disassociation, in a timely manner, or at all. We may require a long period

of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires.

In addition, our sustained growth depends on our ability to attract, train, motivate and retain qualified and experienced laboratory professionals, including physicians, radiologists and technicians, and doctors providing medical consultation services through the polyclinics housed in our diagnostic centres. Our inability to retain and/or attract such skilled personnel, especially in smaller cities in India, could result in a decrease in the quality of our services. We also cannot assure you that these individuals will not leave us or join a competitor. Therefore, the loss of services of our healthcare professionals, doctors, and technicians, failure to recruit suitable replacements in a timely manner or the need to incur additional expenses to recruit and train new personnel could adversely affect our operations.

38. Our Company has loans with a total outstanding amount of ₹ 5,192.32 Lakhs as of December 31, 2024, that may be recalled by the lenders at any time.

Our Company has currently availed certain loans. The total outstanding amount of the loan as of December 31, 2024, was ₹ 5,192.32 lakhs. These loans may be recalled by the lenders at any time. The financing agreements that we have entered for availing the secured loans contain negative covenants. Any failure to service such indebtedness, or otherwise perform any obligations under such financing agreements may lead to termination of one or more of our credit facilities or incur penalties and acceleration of payments under such credit facilities, foreclosure on our assets, trigger cross-default provisions under certain of our other financing agreements which may adversely affect our financial condition and our ability to conduct and implement our business plans. Although we have received consents/NOC from our lenders for undertaking the Offer, these restrictive covenants may affect some of the rights of our Shareholders. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company's liquidity. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition, and results of operations. For further details of these unsecured loans, please refer to Chapter titled "Restated Financial Statements" beginning on page 233 of this Prospectus.

39. Our Company's management will have flexibility in utilizing the net proceeds from the Offer and the deployment of the net proceeds from the Offer is not subject to any monitoring by any independent agency.

Our Company intends to primarily use the net proceeds towards capital expenditure in Setting up of a new flagship diagnostic centre in Jankipuram, Lucknow, Uttar Pradesh, setting up of a new central reference laboratory at Ayodhya, Uttar Pradesh and setting up of a new Central Reference laboratory at Ashiyana, Lucknow, Uttar Pradesh. and general corporate purposes as mentioned in "Objects of the Offer" on page 122 of this Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the offer size is not in excess of ₹ 10,000 lakhs. The Audit committee of the Company will be monitoring utilization of funds. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our promoters or controlling shareholders will be required to provide an exit opportunity to the shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI. Our Company shall inform about material deviations in the utilization of Offer proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Accordingly, prospective investors in the offer will need to rely upon our Audit Committee's judgment with respect to the use of net proceeds. If we are unable to enter into arrangements for utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the offer and our business and financial results may suffer.

40. If we are subject to any frauds, theft, or embezzlement by our employees, suppliers, or customers, it could adversely affect our reputation, results of operations, financial condition, and cash flows.

Our operations may be subject to incidents of theft. We may also encounter some inventory loss on account of employee/ supplier/ customer fraud, theft, or embezzlement. Although we have set up various security measures in our office premises, diagnostic centres, and collection centres and there have been no past instances of any theft or embezzlement, there can be no assurance that we will not experience any similar incidents in the future, which could adversely affect our reputation, results of operations, financial condition, and cash flows.

41. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators, and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

42. Our insurance coverage may not adequately protect us against potential risk, and this may have a material adverse effect on our business.

We maintain insurance coverage for key risks relating to our business. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition, not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions, and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition, and cash flows. 43. Certain information in this Prospectus is based on our internal classification methodologies, which may change and which may or may not be consistent with companies operating in our industry, and hence we cannot assure you of the completeness or the accuracy of such data.

Certain statements contained in this Prospectus, such as industry data that has been derived from International Monetary Fund, Monthly Economic Review from Department of Economic Affairs, India Brand Equity Foundation and Research Unit- Press Information Bureau by Ministry of Information and Broadcasting, the categorisation of our customers and revenues generated from our B2C and B2B segments is based on our internal classification methodologies and the way we operate our business. There may be variation in the manner in which we and other companies operating in our industry categorise customers. Depending on our assessment and focus from time to time, this mix may change and there is no assurance that we will continue to see a substantial part of our business as being B2C business. In the future, we may have to focus more on our B2B business, which may result in the reduction of the proportion of our B2C business to our total business, and subject us to competitive pricing, increased discounts and reduced margins, which in turn may adversely affect our results of operations and financial condition.

44. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition, and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition, and results of operations. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

45. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted stakeholders. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

46. Our Company will not receive any proceeds from the Offer for Sale portion, and the Promoter Selling Shareholders, Promoter Group Selling Shareholders and Investor Selling Shareholders shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale. Our Promoter are therefore interested in the Offer in connection with the Equity Shares offered by them in the Offer for Sale.

The Offer includes an offer for sale of such number of Equity Shares aggregating to 22,99,936 by the Selling Shareholders, which includes the Promoter, Promoter Group members and Investors of our Company. The Promoter is, therefore, interested in the Offer Proceeds to the extent of the Equity Shares offered by corporate promoter in the Offer for Sale. The entire proceeds (net of offer expenses) from the Offer for Sale will be paid to the Promoter Selling Shareholder, Promoter Group Member Selling Shareholders and Investor Selling Shareholders and our Company will not receive any such proceeds. Further, except for listing fees of the Offer, which will be borne by our Company, all cost, fees and expenses (including all applicable taxes) in respect of the Offer will be shared amongst our Company and the Promoter Selling Shareholder, Promoter Group Member Selling Shareholders and Investor Selling Shareholders on a pro-rata basis, in proportion to the Equity Shares issued and allotted by our Company in the Fresh Issue and the Offered Shares sold by the Promoter Selling Shareholder in the Offer for Sale, upon successful completion of the Offer. See “*Capital Structure*” and “*Objects of the Offer*” on pages 86 and 122, respectively of this Prospectus.

47. Objects of the Fresh Issue for which the funds are being raised have not been appraised by any bank or financial institution and any variation in the utilization of our Net Proceeds as disclosed in this Prospectus would be subject to certain compliance requirements, including prior shareholders’ approval.

Our Company intends to primarily use the Net Proceeds of the Fresh Issue for funding of capital expenditure requirements towards establishing a new Flagship diagnostic centre in Jankipuram, Lucknow and new Central Reference laboratories at Ayodhya and Ashiyana and general corporate purposes, as described in section “*Objects of the Offer*” on page 122. The plans for utilizing the Net Proceeds of the Fresh Issue are based on management estimates and such intended use of proceeds has not been appraised by any bank or financial institution.

The funding requirements are based on current conditions and are subject to change in response to external circumstances, costs, other financial condition or business strategies. Our Company may have to revise its management estimates from time to time and consequently its requirements may change, which may cause an additional burden on our finance plans, as a result of which, our business, financial condition, results of operations and cash flows could be materially and adversely impacted.

Any change in the Objects of the Fresh Issue may also require shareholders’ approval and may involve considerable time or may not be forthcoming and in such an eventuality it may adversely affect our operations or business. Further, our Promoters would be required to provide an exit opportunity to the shareholders who dissent with our proposal to change the objects of the Offer, which may discourage our Promoters from undertaking steps for the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest.

In light of these factors, we may not be able to undertake any variation in Objects of the Fresh Issue to use any unutilized proceeds of the Fresh Issue even if such variation is in our interest, thereby limiting or delaying our efforts to use the Net Proceeds to achieve profitable growth in our business.

48. The Equity Shares have never been publicly traded, and, after the offer, the equity shares may experience price and volume fluctuations, and an active trading market for the equity shares may not develop. Further, the price of the equity shares may be volatile, and you may be unable to resell the equity shares at or above the offer price, or at all.

Prior to the offer, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the offer. Listing and quotation do not guarantee that a market for the equity shares will develop. The offer price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The trading volume and market price of the equity shares may be volatile following the offer.

The market price of the equity shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements by third parties / governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

49. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

50. We have not independently verified certain data in this Prospectus

We have not independently verified data from the industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to India, its economy, or the industry in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions

are based have not been verified by us and may be incomplete, inaccurate, or unreliable. 51. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ Offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete Allotment pursuant to the Offer within three working days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political, or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

52. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

Our Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before our Equity Shares can be listed and trading of our Equity Shares may commence. Further, in accordance with Indian law, permission for listing of our Equity Shares will be granted only after our Equity Shares in this Offer have been Allotted and all other relevant documents authorizing the issuing of our Equity Shares have been submitted. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately two Working Days from the Bid/ Offer Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to commence within three Working Days of the Bid/ Offer Closing Date. There can be no assurance that our Equity Shares will be credited to investors' demat accounts, or that trading in our Equity Shares will commence, within the prescribed time periods. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the time periods prescribed under law.

53. Any future issuance of Equity Shares may dilute the shareholding of the Investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Offer paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Offer paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Offer, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled "Capital Structure" beginning on page 86 of this Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

External Risk Factors

54. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe, and certain emerging economies in Asia. Financial turmoil in Asia, Europe and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. For example, the full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries has substantially affected the economic stability of the world and such volatility could impact our Company's growth. In addition, the market price of oil has risen sharply since the commencement of hostilities in Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

In addition, the USA is one of India's major trading partners and any possible slowdown in the American economy could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had, and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

55. Challenges that affect the healthcare industry will have an effect on our operations.

As we are engaged in the healthcare industry, we are impacted by challenges that affect the industry in general. These include general economic conditions and outlook, improvements in technologies, increase in operating costs, government regulation and policy and importantly, our competitive position in the market in general. These factors will impact us and our business on an ongoing basis. We will be constrained to respond to changes adequately to remain profitable, including bringing about changes to operations, cutting down on costs, and reassessing growth plans and strategies. We are unable to predict these challenges and cannot assure you that we will continue to maintain our current levels of financial performance.

56. Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

57. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

58. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

59. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 422 of Prospectus.

60. *Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that

the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced

61. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of Equity Shares at a premium to the market price or would otherwise be beneficial to the shareholders. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

62. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

By investing in advanced equipment and leveraging cost-effective strategies, we aim to provide high-quality diagnostic services to our patients.

This is in accordance with the Indenture of deed dated September 23, 2024, executed between M/s Shree Raghunath Ji Complex, a partnership firm, and our Company. We hereby confirm that the lessor is not a related party to the company and the transaction has been conducted at an arm's length price and the agreements are adequately stamped and registered.

We propose to undertake capital expenditure towards the purchase and installation of medical equipment, along with other fixed assets such as computers, furniture, and air conditioners, for the establishment of a Central reference laboratory. The costs includes the acquisition of advanced equipments such as Ultrasound machine, MRI machine, other miscellaneous medical devices, and other miscellaneous fixed assets. GLOBAL OUTLOOK

Global growth is projected to be forecasted, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varied momentum in activity at the turn of the year has somewhat narrowed the output divergence across economies as cyclical factors wane and activity becomes better aligned with its potential. Services price inflation is holding up progress on disinflation, which is complicating monetary policy normalization. Upside risks to inflation have thus increased, raising the prospect of higher-for-even-longer interest rates, in the context of escalating trade tensions and increased policy uncertainty. To manage these risks and preserve growth, the policy mix should be sequenced carefully to achieve price stability and replenish diminished buffers.

Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year’s rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane, and activity becomes better aligned with its potential.

**For India, data and projections are presented on a fiscal year (FY) basis, with FY 2022-23 (starting in April 2022) shown in the 2022 column. India's growth projections are 7.3 percent in 2024 and 6.5 percent in 2025 based on calendar year.

[#]Indonesia, Malaysia, Philippines, Singapore, Thailand.

For advanced economies-

The growth is expected to converge over the coming quarters. In the *United States*, projected growth is revised downward to 2.6 percent in 2024 (0.1 percentage point lower than projected in April), reflecting the slower-than-expected start to the year. Growth is expected to slow to 1.9 percent in 2025 as the labor market cools and consumption moderates, with fiscal policy starting to tighten gradually. By the end of 2025, growth is projected to taper to potential, closing the positive output gap.

For emerging market and developing economies-

The forecast for growth in *emerging market and developing economies* is revised upward; the projected increase is powered by stronger activity in Asia, particularly China and India. For *China*, the growth forecast is revised upward to 5 percent in 2024, primarily on account of a rebound in private consumption and strong exports in the first quarter. In 2025, GDP is projected to slow to 4.5 percent, and to continue to decelerate over the medium term to 3.3 percent by 2029, because of headwinds from aging and slowing productivity growth. The forecast for growth in *India* has also been revised upward, to 7.0 percent, this year, with the change reflecting carryover from upward revisions to growth in 2023 and improved prospects for private consumption, particularly in rural areas.

INDIAN OUTLOOK

The Indian economy closed FY24 strongly with its growth surpassing market expectations, despite strong external headwinds. Early indications suggest a continuation of the economic momentum during the first quarter of FY25. The emerging robust trends in important high frequency indicators of growth like the GST collections, e-way bills, electronic toll collections, sale of vehicles, purchasing managers' indices and the value and number of digital transactions attest to the growing strength of the economy. The retail inflation clocked 4.83 per cent in April 2024, the lowest in the past 11 months

Investment activity continues to display stability despite ongoing geopolitical headwinds. As per the Second Advance Estimates of National Income released by the National Statistical Office (NSO), the Gross Fixed Capital Formation (GFCF) is expected to be the largest GDP growth driver in FY24, with a percentage contribution of 44.9 per cent.

The National Account Statistics 2024 shows GFCF growing by 18.7 per cent in FY23 from ₹ 69.8 lakh crore in FY22 to ₹ 82.9 lakh crore in FY23, with broad-based growth across sectors. GFCF in private non-financial corporations witnessed a most notable CAGR of 10.6 per cent from FY12 to FY23, highlighting a pick-up in private capital expenditure.

The upbeat investment environment is accompanied by increased capacity utilisation in the manufacturing sector, as seen in the RBI's quarterly Order Books, Inventory and Capacity Utilisation Survey (OBICUS) for Q3 of FY 24. The aggregate capacity utilisation in the manufacturing sector picked up significantly from 74 per cent in Q2 to 74.7 per cent in Q3 of FY24. Manufacturing companies received a larger number of orders during this quarter as compared to the corresponding quarter of the previous year.

According to the RBI's consumer confidence survey for April 2024, the Current Situation Index (CSI) rose by 3.4 points to 98.5 in March 2024, the highest level since mid-2019. Consumers are quite optimistic about the general economic situation, income and spending. Consumer confidence for the year ahead improved further on the back of optimism in almost all parameters, such as economic situation, employment, income and spending. The Future Expectations Index (FEI) also rose further by 2.1 points to 125.2, also its highest level since mid-2019.

The growth in service sectors remains robust in April 2024, as gauged by HSBC's Services PMI. The business activity index has stayed in the expansionary zone for 33 consecutive months in a row, maintaining a resilient value of 60.8 in April 2024. The surge was sustained by buoyant domestic demand and growth of new business and output. In addition to the robust domestic demand, companies reported growth in emerging international markets. The year-ahead outlook for business activity has improved, fuelled by enhanced marketing initiatives, gains in efficiency, competitive pricing strategies, and optimistic predictions regarding sustained favourable demand conditions.

As the service sector strengthens, there has been a rise in bank credit to important services. The credit growth in the services sector increased to 20.2 per cent in March 2024 on a YOY basis, propelled by an increase in credit to transport operators and the commercial real estate sector.

We have adopted a ‘hub and spoke’ model organised into clusters, which enhances our economies of scale, ensures greater consistency in testing procedures, and boosts our brand presence by reaching more customers in remote areas. Samples are collected from various locations within a cluster and transported to our laboratories for diagnostic testing. Customers typically visit our diagnostic centres to undergo pathology or radiology tests, either for preventive or curative reasons. Our staff at these centres either collect samples for pathology tests or perform radiology tests. Samples collected at diagnostic centres or via home collection services are transported through our logistics network to a designated satellite laboratory for processing. For tests that are complex or of a specialized nature, samples are sent to our central reference laboratory for analysis.

Of these, 8 laboratories are accredited by NABL, with our flagship central reference laboratory holding the NABL accreditation. Sample transfers between diagnostic centres and laboratories, are managed by third-party logistics couriers.

Flagship Laboratory

Our flagship laboratory, spread over an area of 7,576 square feet was established in 2012 and is co-located with our registered office and corporate office at Jankipuram, Uttar Pradesh. Our flagship laboratory has several departments including (i) clinical biochemistry; (ii) clinical pathology; (iii) histopathology, cytopathology and immune histochemistry (iv) microbiology and serology; (v) molecular pathology; and (vi) cytogenetics. It receives routine and specialized testing requests and related samples for testing from our central reference laboratories, satellite laboratories and collection centres and is equipped to collect all pathology and radiology samples required for our tests.

Central Reference Laboratories

We have nine central reference laboratories across Uttar Pradesh, Uttarakhand and Rajasthan. The central reference laboratories are equipped and processes both routine and specialized testing requests, receiving samples from our satellite laboratories and collection centers. However, not all tests received from satellite centers and collection centers can be conducted at the central reference laboratory. If a specific test is unavailable there, the samples will be transported to the flagship laboratory for processing.

Satellite Laboratory

As on December 31, 2024, we have fifteen and twelve satellite laboratories that located in Uttar Pradesh and Uttarakhand, respectively. They process routine and specialized testing requests and samples from our collection centres. These facilities conduct routine tests in areas of Glucose, Kidney Profile, Lipid Profile etc.

Sample Collection Centres

Our sample collection centres are typically situated near hospitals, nursing homes, pathology labs, clinics, among other places. These centres do not perform testing themselves but serve a radius of approximately 50 kms to 70 kms. As of December 31, 2024, our company operates more than three hundred sample collection centres.

The samples are collected directly from customer's home or office, using secure, transport containers. These samples are then carefully delivered to our designated diagnostic centres and laboratories, depending on the nature of the test.

PROCESS OF ESTABLISHING NEW DIAGNOSTIC CENTRES:

We have a project team which identifies new locations for setting up our diagnostic centres. Our team identifies new locations for expansion opportunities based on the following parameters :

- **Market analysis:** Evaluate demand for diagnostic services by analysing factors such as population density, demographics (age, income levels), existing healthcare infrastructure, and local competition.
- **Accessibility:** Ensure easy access to our target customers by considering factors such as proximity to commercial and residential areas, public transportation options, parking availability, and overall visibility.
- **Space requirements:** Determine the necessary size and layout for new diagnostic centres based on our standard operational needs.
- **Infrastructure and utilities:** Assess the availability and condition of essential utilities (electricity, water, internet) and evaluate the building's condition to identify any required renovations or upgrades.
- **Competitive landscape:** Analyse existing diagnostic centres in the area to understand their services, pricing, and reputation. Identify gaps in service offerings and areas with high demand but limited competition.
- **Potential partnerships:** Explore opportunities to partner with local healthcare providers, clinics, or hospitals to establish referral networks and build credibility.
- **Community needs:** Gather insights on community healthcare needs and preferences through surveys or focus groups. Assess patient visits from various locations to determine the need for diagnostic centres in specific areas.

- Financial feasibility: Analyse costs related to leasing, ongoing operations, and potential revenue based on projected patient volume to assess financial viability.

LOGISTICS AND PROCEDURES:

Logistics and Sample Tracking

We have adopted a hub and spoke model for sample collection and testing. Samples are gathered from various centres, including diagnostic centres, other laboratories, hospitals, corporate sites, and home collections. These samples are then transported to a designated laboratory within the cluster for centralized testing. Depending on the type of test required, samples may be sent to a nearby satellite laboratory or, for specialized tests, to our central reference laboratory. Each cluster's laboratories are linked through a logistics network managed by third-party partners. Samples are transported under strict temperature controls via road networks.

Sample Receipt, Registration and Barcoding

For smooth functioning of our business we have streamlined the identification and tracking of samples, we use pre-labelled barcoded vials. This system ensures that each sample is easily traceable throughout the testing process. When a sample is collected in these barcoded vials, the barcode is scanned and linked to the patient's information in our database. The samples are then transported from collection points to our laboratories. Upon arrival, each sample is checked in and logged into our system. We verify that the samples match their requisition forms and ensure that all necessary information is accurately recorded. Depending on the type of test required, samples undergo specific processing steps. After testing is completed, results are reviewed, interpreted, and reported according to established procedures.

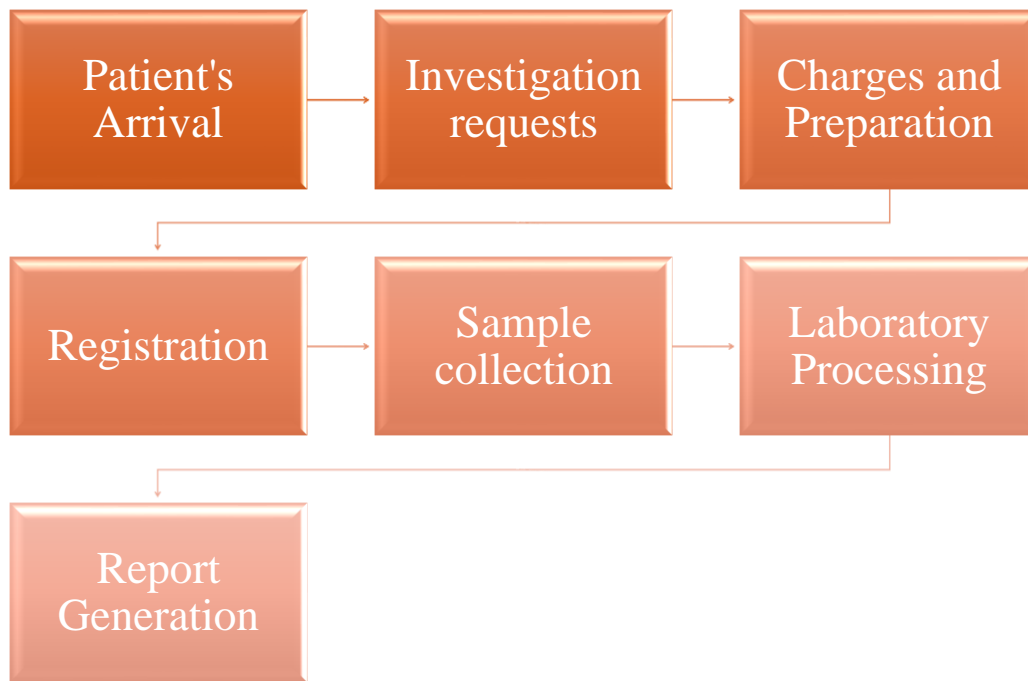

Testing procedures

Most of our pathology tests are performed using fully automated systems. Samples are placed into testing equipment that interfaces with our customized Laboratory Information Management System (LIMS). This setup allows us to configure medically defined protocols directly within LIMS. When a sample's barcode is scanned, the equipment automatically retrieves patient and test details from LIMS. The entire testing process is automated: once testing is complete, results are uploaded into LIMS under the corresponding barcode. Authorized department signatories monitor these results closely and may request additional testing if necessary. Once validated, the results are reviewed by laboratory doctors and authenticated in the final reports.

Reports

We generate detailed reports that include exact values for the requested parameters, along with their biological reference ranges and the methodologies used. When the results are ready, customers receive an SMS notification with instructions to download their report via email, our web portal, or to collect it directly from the centre

PROCESS FLOW CHART:

- ***Patient's Arrival-***

Patients arrive at the diagnostic centre either through a referral from a doctor or by self-referral. Upon arrival, they are guided to the next steps in the process. This initial interaction includes verifying patient information and directing them to the appropriate area for further procedures.

- ***Investigation request-***

Investigation requests are initiated using the doctor's prescription or referral paper, which details the specific tests needed. This documentation is crucial for processing and conducting the required diagnostics. It ensures that all tests are correctly ordered and aligned with the patient's medical needs.

- ***Charges and Preparation-***

The receptionist informs the patient or their attendant the details of the applicable charges and necessary preparation steps, such as fasting or special instructions. Clear information at this stage helps prevent delays and ensures a smooth diagnostic process.

- ***Registration-***

The patient is registered for the diagnostic services, and a unique registration number is created. This number is used as an identifier to track the patient's tests and samples throughout the entire diagnostic process.

- ***Sample collection-***

The patient's fasting status is confirmed if required for the tests, and then samples are collected following specific test protocols. Each sample is properly documented to ensure the accuracy and proper tracking. This careful handling helps maintain the integrity of the samples for reliable test results.

- ***Laboratory Processing-***

The collected samples are first subjected to initial processing upon arrival in the laboratory. The tests are then set up according to the specifications provided by the doctor and aligned with the machine settings. This alignment and processing ensure that the test results are accurate and reliable, adhering to the prescribed diagnostic standards.

- **Report Generation-**

Once testing is complete and the results are approved by the doctor, they are compiled into reports. These reports are then reviewed for accuracy before being finalized. The completed reports are then provided to the patient via mail, SMS and the patient can collect the physical reports at the centre, marking the end of the diagnostic process and ensuring that the patient receives their results in a timely manner.

Revenue from Operations

The Company's revenue from operations in the financial year 2023-24 is ₹ 17,659.01 lakhs. This represents ₹ 3,970.07 lakhs or 29.00% increase compared to the previous financial year's revenue from operations of ₹ 13,688.94 lakhs. This increase is primarily due to increase in sales from products of ₹ 1,765.22 lakhs and sales from services of ₹ 2,203.75 lakhs. During the current financial year, the company successfully expanded its customer base and added more diagnostic centres, due to our strategic approach and experienced team. We gained 2,97,592 new customers over the year. The increase in sales is due to increase in institutional contracts (B2B) and increased footfall of patients in existing centres. Additionally, we increased the number of satellite laboratories from 24 to 26 and collection centres from 344 to 348, which contributed to a growth in revenue. The company has also focused more on preventive tests category resulting in additional sales compared to last year.

This increase was primarily due to dividends received from companies of ₹ 75.98 lakhs and increase in Other non-operating income of ₹ 24.50 lakhs.

Cost of Material Consumed

Material consumption expenses for the financial year 2023-24 amounted to ₹ 1,112.68 lakhs constituting 6.25% of total income.

Purchases of Stock -in-Trade

Purchases of goods increased by 31.73%, reaching ₹ 7,236.76 lakhs in Financial Year 2023-24 as compared to the ₹ 5,493.56 lakhs incurred in the Financial Year 2022-23.

Changes in inventories of Finished goods, WIP and Raw materials

There was an increase of ₹ 264.47 lakhs for Fiscal 2024 as compared to an increase of ₹ 410.16 lakhs for Fiscal 2023, primarily attributable to a higher inventory of Finished goods at the end of Fiscal 2024.

Employee Benefits Expenses

Employee benefit expenses in the Financial Year 2023-24 increased by 38.79%, reaching ₹ 3,537.96 lakhs in comparison to the ₹ 2,549.09 lakhs incurred in the Financial Year 2022-23. This rise in employee expenses primarily stemmed from increases in Salaries and Wages, which went up by ₹ 1,144.46 lakhs and staff welfares which went down by ₹ 198.59 lakhs.

Finance Costs

Finance Costs in the Financial Year 2023-24 increased by 13.76%, reaching ₹ 275.19 lakhs in comparison to the ₹ 241.91 lakhs incurred in the Financial Year 2022-23. This rise in finance costs primarily stemmed from increases in Interest expense which went up by ₹ 67.88 lakhs and other financial charges which went down by 38.48 lakhs.

Depreciation and amortization expenses

Depreciation and amortization in the Financial Year 2023-24 increased by 62.91%, reaching ₹ 340.40 lakhs in comparison to the ₹ 208.95 lakhs incurred in the Financial Year 2022-23.

Other Expenses

Other expenses in the Financial Year 2023-24 decreased by 19.17%, reaching ₹ 3,411.33 lakhs in comparison to the ₹ 3,730.45 lakhs incurred in the Financial Year 2022-23. This decrease in other expenses was primarily attributed to several factors, including ₹ 569.05 lakhs decrease in commission expenses, ₹ 346.92 lakhs decrease in Travelling and Conveyance expense, ₹ 308.71 lakhs increase in Testing expenses.

Tax Expenses

Tax expenses increased by 258.27%, reaching a total of ₹ 510.50 lakhs in the financial year 2023-24, in contrast to the ₹ 142.49 lakhs in the financial year 2022-23.

Profit after Tax (PAT)

Due to the aforementioned factors, the profit experienced an upswing, primarily driven by the growth in total income and a decrease in total expenses as a percentage of total income. The Profit After Tax (PAT) for the financial year 2023-24 reached ₹ 1,635.51 lakhs, marking a notable increase from ₹ 358.63 lakhs in the financial year 2022-23. In the financial year 2023-24, PAT constituted 9.19% of the total revenue, in contrast to 2.62% in the fiscal year 2022-23.

Rationale for increase in Profit After Tax (PAT) compared to total income.

In the last financial year, we reduced the rate of expense growth compared to the previous year. A few centers reached the breakeven point and became profitable, while approximately 15 centers achieved fixed cost recovery parity. Despite lower profitability in certain centers, strategically positioned centers experienced significant sales growth driven by corporate servings. This contributed to an increase in volume, enabling us to improve margins through enhanced operational efficiency. The growth in margins was primarily driven by a rise in both volume and the prices of pharmacy products and diagnostic services, which together accounted for around 29% of total revenue during the period. Additionally, interest income rose substantially, from ₹ 7.75 lakhs in FY 2023 to ₹ 24.50 lakhs

in FY 2024, positively impacting the PAT margin. The company also received dividends amounting to approximately ₹ 76 lakhs from an associated company, further contributing to the positive financial performance.

Also, there were significant reductions in commission and travel expenses. Commission expenses, which totalled to ₹ 569.22 lakhs in FY 2023, were drastically reduced to ₹ 0.17 lakhs in FY 2024, the decrease in commission expenses in FY 2024 is directly related to a strategic shift in employee compensation. While commissions were distributed in FY 2023, no such distribution occurred in FY 2024. This is because we significantly increased employee benefits expenses by ₹988.87 lakhs in FY 2024 compared to FY 2023, effectively compensating employees through higher salaries and benefits. This is reflected in the increase of employee expenses as a percentage of revenue from operations, rising from 18.62% in FY 2023 to 20.03% in FY 2024. Further, the company incurred expenses towards travelling and conveyance expenses of ₹ 1,117.97 lakhs in FY 2023 on account of survey and identification of new locations for setting up new centres, the same expense was reduced to ₹ 771.05 lakhs in FY 2024. These reductions in expenses were key drivers of the substantial increase in PAT for FY 2024.

COMPARISON OF F.Y. 2023 WITH F.Y. 2022:

Revenue from Operations

The Company's revenue from operations in the financial year 2022-23 is ₹ 13,688.94 lakhs. This represents ₹ 1,732.59 lakhs or 14.49% increase compared to the previous financial year's revenue from operations of ₹ 11,956.35 lakhs. This increase is primarily due to increase in sales from products of ₹335.94 lakhs and sales from services of ₹1,396.24 lakhs. The increase in sales is due to increase in institutional contracts (B2B) and increased footfall in existing centres.

Other Income

Other Income in the financial year 2022-23 decreased by ₹ 21.25 lakhs or 60.32%, reaching ₹ 13.98 lakhs in comparison to the ₹ 35.23 lakhs incurred in the Financial Year 2021-22. This decrease was primarily due to non-receipt of dividends received from companies by ₹ 7.16 lakhs and decrease in Other non-operating income of ₹ 14.74 lakhs.

Cost of Material Consumed

Material consumption expenses for the financial year 2022-23 amounted to ₹ 1,388.00 lakhs constituting 10.13% of total income.

Purchases of goods increased by 3.02%, reaching ₹ 5,493.56 lakhs in Financial Year 2022-23 as compared to the ₹ 5,332.58 lakhs incurred in the Financial Year 2021-22.

Changes in inventories of Finished goods, WIP and Raw materials

There was an increase of ₹ 410.16 lakhs for Fiscal 2023 as compared to an increase of ₹ 74.28 lakhs for Fiscal 2022, primarily attributable to a higher inventory of Finished goods at the end of Fiscal 2023.

Employee Benefits Expenses

Employee benefit expenses in the Financial Year 2022-23 increased by 36.10%, reaching ₹ 2,549.09 lakhs in comparison to the ₹ 1,872.98 lakhs incurred in the Financial Year 2021-22. This rise in employee expenses primarily stemmed from increases in Salaries and Wages, which went up by ₹ 462.50 lakhs and staff welfares which went up by ₹ 193.32 lakhs.

Finance Costs

Finance Costs in the Financial Year 2022-23 increased by 41.78%, reaching ₹ 241.91 lakhs in comparison to the ₹ 170.62 lakhs incurred in the Financial Year 2021-22. This rise in finance costs primarily stemmed from increases in Interest expense which went up by ₹ 20.32 lakhs and other financial charges which went up by 50.06 lakhs.

Depreciation and amortization expenses

Depreciation and amortization in the Financial Year 2022-23 increased by 6.57%, reaching ₹ 208.95 lakhs in comparison to the ₹ 196.06 lakhs incurred in the Financial Year 2021-22.

Other Expenses

Other expenses in the Financial Year 2022-23 increased by 2.72%, reaching ₹ 3,730.45 lakhs in comparison to the ₹ 3,631.75 lakhs incurred in the Financial Year 2021-22. This increase in other expenses was primarily attributed to several factors, including ₹ 298.26 lakhs increase in commission expenses, ₹ 102.20 lakhs increase in Travelling and Conveyance expense.

Tax Expenses

Tax expenses increased by 4311.46%, reaching a total of ₹ 142.49 lakhs in the financial year 2022-23, in contrast to the ₹ 3.23 lakhs in the financial year 2021-22.

Profit after Tax (PAT)

Due to the aforementioned factors, the profit experienced an upswing, primarily driven by the growth in total income and a decrease in total expenses as a percentage of total income. The Profit After Tax (PAT) for the financial year 2022-23 reached ₹ 358.63 lakhs, marking a notable increase from loss of ₹ 109.25 lakhs in the financial year 2021-22. In the financial year 2022-23, PAT constituted 2.62% of the total revenue, in contrast to 0.91% loss in the fiscal year 2021-22.

Rationale for increase in Profit After Tax (PAT) compared to total income.

During the current financial year, we increased our customer base and added more diagnostic centers to our business due to our strategy and experienced team. During the year few centers has reached breakeven point and contributing to increased profitability whereas loss making centers have been closed to improve overall profits. New centers have been opened along with call centers and expansion of executive teams have been a major factor which led to substantial increase in direct sales. Despite low profitability for few centers, certain strategic centers have achieved significant sales due to corporate servings and price increase for selected tests. Due to this, we have achieved sufficient volume, which helped us increase our margin through operational efficiency. The increase was primarily due to a rise in volume as well as price of pharmacy products and diagnostic services, which grew around 14.49% of revenue in the current period, contributing to higher PAT margin.

The company had revised its accounting policy regarding the treatment of consumables transferred to diagnostic centers. Under the previous policy, these consumables were expensed at the time of transfer. However, given the significant stock of consumables consistently held at these centers, the company has adopted a new policy where consumables are recognized as inventory at the centers and expensed only when consumed or used. As a result, the profit after tax for the current financial year increased by ₹ 467.88 Lakhs, reflecting a 428.27% rise. This change has a one-time impact on the current year's profit but is not expected to materially affect future profitability. Additionally, the company's revenue grew by 14.15%, while fixed costs remained relatively constant, leading to higher profit margins. In FY 2021-22, the company faced a significant exceptional loss of ₹ 476 Lakhs due to bad debts from the Uttar Pradesh Health Systems Strengthening Project, which negatively impacted profitability. The absence of such a loss in FY 2022-23, combined with improved performance and a reduction in other expenses

from 30.29% of revenue in FY 2022 to 27.25% in FY 2023, contributed to the substantial increase in profit after tax. Please refer to “*Note: 28 of the Restated Consolidated Financial Statement*” on page 233 of the Prospectus.

Phased implementation of UPI for Bids by RIBs as per the UPI Circulars

SEBI has issued the UPI Circulars in relation to streamlining the process of public offer of, inter alia, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 01, 2019, and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI, vide its circular no. *SEBI/HO/CFD/DCR2/CIR/P/2019/133* dated *November 08, 2019*, has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. 456

Subsequently, SEBI, vide its circular no. *SEBI/HO/CFD/DIL2/CIR/P/2020/50* dated *March 30, 2020*, extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: Pursuant to SEBI circular no. *SEBI/HO/CFD/TPD1/CIR/P/2023/140* dated *August 09, 2023*,

Phase III has been notified, and accordingly the revised timeline of T+3 days has been made applicable in two phases i.e., (i) voluntary for all public issues opening on or after September 01, 2023; and (ii) mandatory on or after December 01, 2023. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Circular, once Phase III becomes applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the SEBI circular no. *SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M* dated *March 16, 2021* issued by SEBI, as amended by the SEBI circular no. *SEBI/HO/CFD/DIL2/P/CIR/2021/570* dated *June 02, 2021* and the SEBI circular no. *SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M* dated *April 20, 2022* (the “**UPI Streamlining Circulars**”), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No. *SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M* dated *March 16, 2021* read with SEBI Circular No: *SEBI/HO/CFD/DIL2/CIR/P/2021/570* dated *June 02, 2021* read with SEBI Circular No: *SEBI/HO/CFD/DIL2/CIR/P/2022/51* dated *April 20, 2022* NPCI vide circular reference no. *NPCI/UPI/OC No. 127/ 2021-22* dated *December 09, 2021*, inter alia, has enhanced the per transaction limit in UPI from more than ₹0.20 million to ₹0.50 million for UPI based ASBA in initial public offerings.

If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th Application in each of the lot of the category and these applications will be allotted the shares in that category.
- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the over subscription times.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 has prescribed the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government of India has from time to time made policy pronouncements on foreign direct investment (“**FDI**”) through press notes and press releases.

The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT (formerly Department of Industrial Policy & Promotion) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “**FDI Circular**”), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.
